Täitematerjalide geomeetriliste omaduste katsetamine. Osa 1: Terastikulise koostise määramine. Sõelanalüüs KONSOLIDEERITUD TEKST

Tests for geometrical properties of aggregates - Part 1: Determination of particle size distribution - Sieving method CONSOLIDATED TEXT

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 933-1:2007 sisaldb Euroopa standardi EN 933-1:1997+A1:2005 ingliskeelset teksti.	This Estonian standard EVS-EN 933-1:2007 consists of the English text of the European standard EN 933-1:1997+A1:2005.
Standard on kinnitatud Eesti Standardikeskuse 09.03.2000 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.	This standard is ratified with the order of Estonian Centre for Standardisation dated 09.03.2000 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.
Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kätesaadavaks tegemise kuupäev on 20.08.1997.	Date of Availability of the European standard text 20.08.1997.
Standard on kätesaadav Eesti standardiorganisatsionist.	The standard is available from Estonian standardisation organisation.

EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

EN 933-1

August 1997

ICS 91.100.20

Descriptors: Grading, aggregates, testing, sieve analysis.

English version

Tests for geometrical properties of aggregates Part 1: Determination of particle size distribution – Sieving method

Essais pour déterminer les caractéristiques géométriques des granulats – Partie 1: Détermination de la granularité – Analyse granulométrique par tamisage

Prüfverfahren für geometrische Eigenschaften von Gesteinskörnungen – Teil 1: Bestimmung der Korngrößenverteilung – Siebverfahren

This European Standard was approved by CEN on 1997-07-16.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 154 "Aggregates", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 1998, and conflicting national standards shall be withdrawn at the latest by February 1998.

This Standard forms part of a series of tests for geometrical properties of aggregates. Test methods for other properties of aggregates will be covered by Parts of the following European Standards:

EN 932	Tests for general properties of aggregates
EN 1097	Tests for mechanical and physical properties of aggregates
EN 1367	Tests for thermal and weathering properties of aggregates
EN 1744	Tests for chemical properties of aggregates

A European Standard "Test for filler aggregate used in bituminous mixtures" is in preparation.

The other parts of EN 933 will be:

Part 2:	Determination of particle size distribution - Test sieves, nominal size of apertures
Part 3:	Determination of particle shape - Flakiness index
Part 4:	Determination of particle shape - Shape index
Part 5:	Determination of crushed and broken surfaces in coarse aggregate particles
Part 6:	Determination of texture/shape - Flow coefficient of coarse aggregates
Part 7:	Determination of shell content - Percentage of shells for coarse aggregates
Part 8:	Assessment of fines - Sand equivalent test
Part 9:	Assessment of fines - Methylene blue test
Part 10:	Determination of fines - Grading of fillers (air jet sieving)

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

1 Scope

This Part of this European Standard specifies a method, using test sieves, for the determination of the particle size distribution of aggregates. It applies to aggregates of natural or artificial origin, including lightweight aggregates, up to 63 mm nominal size, but excluding filler.

NOTE: The determination of the grading of fillers will be specified in prEN 933-10 Tests for geometrical properties of aggregates Part 10: Determination of fines - Grading of fillers.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references, the latest edition of the publication referred to applies.

prEN 932-2	Tests for general properties of aggregates Part 2: Methods for reducing laboratory samples
prEN 932-5	Tests for general properties of aggregates Part 5: Common equipment and calibration
EN 933-2 : 1995	Tests for geometrical properties of aggregates Part 2: Determination of particle size distribution - Test sieves, nominal size of apertures
prEN 1097-6	Tests for mechanical and physical properties of aggregates Part 6: Determination of particle density and water absorption
ISO 3310-1:1990	Test sieves - Technical requirements and testing. Part 1: Test sieves of metal wire cloth
ISO 3310-2:1990	Test sieves - Technical requirements and testing. Part 2: Test sieves of perforated metal plate
