**Käsitlusala**

Standard sätestab raamatu tiitellehele trükitavad andmed ja viisi, kuidas need andmed peavad olema esitatud ning paigutatud tiitellehe esiküljel, tiitellehe pöördel ja eestitüttelhel. Standardi eesmärk on aidata kirjastajatel koostada tiitellehti, mis soodustavad kasutajatel (nt raamatumiüjud, dokumentalistid, autorid, bibliograafid, kataloogijad, andmebaasikoostajad) trükise ülemöttelist kirjeldamist ja viitamist.

Selle standardi mõistes on raamatuteks monograafiad, kogumikud, õppematerjalid (öpikud, töövihikud jm), pildilised väljaanded (kunsti- ja fotoalbumid, värvilised raamatud), atlased, väitekirjad, konverentsikogumikud, teaduslikud ja tehnilised aruanded, kalender-teatmikud, aastaraamatud, toimetised, noodid jms. Neid võib publitseerida üksikteostena, mitmeköiteliste väljaannete raamiona või sarja osadena.

Eesti standardi märkus. Standard on rakendatav ka neile e-raamatutele, mis on trükitud raamatu analoogid.

Standard kehtib horisontaalse laoga raamatute kohta (mille teksti loetakse horisontaalselt vasakult paremale).

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 1086 was prepared by Technical Committee ISO/TC 46, *Information and documentation*, Sub-Committee SC 9, *Presentation, identification and description of documents*.

This second edition cancels and replaces the first edition (ISO 1086:1975). The text has been reorganized and enlarged to cover additional data relating to various types of books.

# Information and documentation — Title leaves of books

## 1 Scope

This International Standard specifies the information to be printed on title leaves of books and the manner in which this information should be presented and arranged. Its purpose is to help editors and publishers to produce title leaves that facilitate unambiguous citation by users such as booksellers, librarians, documentalists, authors, indexers, cataloguers, database producers, etc.

Books may be monographs, collections, textbooks, pictorial works, atlases, theses, conference proceedings, technical reports, etc. They may be published as individual works as well as multi-volume works or parts of series.

This International Standard applies to books that have horizontal composition (in which the printed text is to be read horizontally from left to right).

## 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 832:1975, *Documentation — Bibliographical references — Abbreviations of typical words*.
