Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 8, *Ships and marine technology*.

This first edition of ISO 28007-1 cancels and replaces ISO/PAS 28007:2012.

Introduction

ISO 28000 is the certifiable security management system standard for organizations which has been developed along the format of other management system standards (ISO 9001 and ISO 14001) with the same management system requirements.

ISO 28000 was developed in response to demand from industry for a security management standard with the objective to improve the security of supply chains and is certifiable in accordance with the International Accreditation Forum. In effect ISO 28000 is a risk-based quality management system for the security of operations and activities conducted by organizations. Organisations seeking to be certified to this International Standard should respect the human rights of those affected by the organisations operations within the scope of this International Standard, including by conforming with relevant legal and regulatory obligations and the UN Guiding Principles on Business and Human Rights. This part of ISO 28007 sets out the guidance for applying ISO 28000 to Private Maritime Security Companies (PMSC).

Ships and marine technology — Guidelines for Private Maritime Security Companies (PMSC) providing privately contracted armed security personnel (PCASP) on board ships (and pro forma contract) —

Part 1: General

This document is a preview generated by EVS

1 Scope

This part of ISO 28007 gives guidelines containing additional sector-specific recommendations, which companies (organizations) who comply with ISO 28000 can implement to demonstrate that they provide Privately Contracted Armed Security Personnel (PCASP) on board ships. To claim compliance with these guidelines, all recommendations ("shoulds") should be complied with.

Compliance with this part of ISO 28007 can be by first, second and third party (certification). Where certification is used, it is recommended the certificate contains the words: "This certification has been prepared using the full guidelines of ISO 28007-1 as a Private Maritime Security Company providing Privately Contracted Armed Security Personnel".

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 28000, *Specification for security management systems for the supply chain*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1
Private Maritime Security Company
PMSC
organization which provides security personnel, either armed or unarmed or both, on board for protection against piracy

Note 1 to entry: Henceforth throughout this International Standard, the word "organization" refers to the PMSC.

3.2
Privately Contracted Armed Security Personnel
PCASP
armed employee or subcontractor of the Private Maritime Security Company (PMSC)

3.3
area of high risk of piracy
area identified as having an increased likelihood of piracy
