INTERNET OF THINGS (IoT) – REFERENCE ARCHITECTURE

C O R R I G E N D U M   1

INTRODUCTION

In the sixth paragraph, replace the second sentence with the following new sentence:

"The contexts can be of different kinds including the business context, the regulatory context and the technological context, e.g. industry verticals, technological requirements and/or nation-specific requirement sets."

6.1   General

In the first paragraph, replace the second sentence with the following new sentence:

"The IoT RA outlines the overall structured approach for the construction of IoT systems by providing an architectural structure framework."
