## 1 Modification to 6.6.2

*Modify the cross references in 6.6.2 for consistency with 7.7.2:*

"Except for B<sub>14</sub> appliances, appliances equipped with a supervision device for combustion air or combustion products according to 5.1.6.5.2 shall meet at least one of the following requirements:

- a) under the test conditions specified in 7.7.2 c) 1), the gas supply shall be shut off before the CO concentration exceeds 0,20 %;
- b) ignition of the appliance at ambient temperature shall not be possible with the degree of blockage determined under the test conditions specified in 7.7.2 c) 2);
- c) under the test conditions specified in 7.7.2 c) 3), the gas supply shall be shut off before the CO concentration exceeds 0,20 %;
- d) ignition of the appliance at ambient temperature shall not be possible with the voltage at the fan terminals determined under the test conditions specified in 7.7.2 c) 4).

For type B<sub>14</sub> appliances, under the test conditions specified in 7.7.2, the products of combustion shall escape only through the flue outlet."
