#### INTERNATIONAL STANDARD RECOMMENDATION ITU-T

## Information technology – JPEG 2000 image coding system: Conformance testing

**Technical Corrigendum 1** 

**Correction to clause G.4.4** 

#### 1) Subclause G.4.4

Add the following paragraph to the beginning of clause G.4.4:

file1.jp2 and other test files contain the value 0x00000001 in the Compatibility List of the File Type box. This value does not correspond to any current ISO decoder or any profile of the standard, and is reserved for ISO use. Its inclusion in the test files is to ensure that decoders are able to decode files that contain items from the Compatibility List that are unknown to the decoder.
