

Stationary waste containers up to 5 000 l, top lifted and bottom emptied - Part 2: Additional requirements for underground or partly underground systems

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN 13071-2:2019 sisaldab Euroopa standardi EN 13071-2:2019 ingliskeelset teksti.	This Estonian standard EVS-EN 13071-2:2019 consists of the English text of the European standard EN 13071-2:2019.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 10.07.2019.	Date of Availability of the European standard is 10.07.2019.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

English Version

**Stationary waste containers up to 5 000 l, top lifted and
bottom emptied - Part 2: Additional requirements for
underground or partly underground systems**

Conteneurs fixes à déchets de capacité inférieure ou
égale à 5 000 l, levés par le haut et vidés par le bas -
Partie 2 : Exigences complémentaires relatives aux
systèmes enterrés ou semi-enterrés

Stationäre Abfallsammelbehälter bis 5 000 l, mit
Behälteraufnahme an der Oberseite und
Bodenentleerung - Teil 2: Zusätzliche Anforderungen
für unterirdische oder teilweise unterirdische Systeme

This European Standard was approved by CEN on 19 May 2019.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 13071-2:2019) has been prepared by Technical Committee CEN/TC 183 “Waste management”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2020, and conflicting national standards shall be withdrawn at the latest by January 2020.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 13071-2:2008+A1:2013.

The main changes compared to the previous edition are listed below:

- a) addition of an introduction;
- b) review of definitions 3.2 and 3.7;
- c) replacement of term „housing“ with „column“ (3.4);
- d) addition of further requirements for the design (4.2);
- e) updating of safety requirements for holes (4.3.1), pedestrian platforms (4.3.2), safety platforms (4.3.3), and safety barrier (4.3.4);
- f) deletion of clause 7 “Recommendations”.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

According to the European health and safety requirements, work equipment have to be designed and constructed so that it can be operated without putting persons at risk. The manufacturer has to consider the intended conditions of use, but also any reasonably foreseeable misuse.

For that purpose he will carry out a risk analysis in order to determine the hazards which the operators and users are exposed to. The equipment will then be designed and constructed taking into account the results of this assessment, by an iterative process of risk assessment and risk reduction.

As specified in the guidance document “Classification of equipment used for lifting loads with lifting machinery” (Machinery Working Group — January 2012), containers used for collecting and lifting bulk material are not covered by Directive 2006/42/CE.

However, a large number of the hazards which the operators using such equipment and the persons present in the vicinity of lifting/handling operations are exposed to are the same as those resulting from the use of lifting appliances proper.

These are the reasons why CEN/TC 183 decided to include into this standard requirements intended to support the corresponding essential health and safety requirements of Directive 2006/42, in particular those related to lifting operations (part 4 of Annex I).

1 Scope

This document specifies the additional requirements for underground or partly underground systems top lifted and bottom emptied, used for collection of solid non-hazardous wastes with a capacity up to 5 000 l.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 13071-1:2019, *Stationary waste containers up to 5 000 l, top lifted and bottom emptied — Part 1: General requirements*

EN 10346, *Continuously hot-dip coated steel flat products for cold forming — Technical delivery conditions*

EN ISO 1461, *Hot dip galvanized coatings on fabricated iron and steel articles — Specifications and test methods (ISO 1461)*

EN ISO 2081, *Metallic and other inorganic coatings — Electroplated coatings of zinc with supplementary treatments on iron or steel*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 13071-1:2019 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1

underground or partly underground system

waste container with an emptying device located below surrounding ground level at any point

Note 1 to entry: See Figure 1. Safety devices are not shown in Figure 1.
