

Batch control -- Part 3: General and site recipe models and representation

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 61512-3:2008 sisaldb Euroopa standardi EN 61512-3:2008 ingliskeelset teksti.	This Estonian standard EVS-EN 61512-3:2008 consists of the English text of the European standard EN 61512-3:2008.
Standard on kinnitatud Eesti Standardikeskuse 24.11.2008 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.	This standard is ratified with the order of Estonian Centre for Standardisation dated 24.11.2008 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.
Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kätesaadavaks tegemise kuupäev on 25.09.2008.	Date of Availability of the European standard text 25.09.2008.
Standard on kätesaadav Eesti standardiorganisatsionist.	The standard is available from Estonian standardisation organisation.

**Batch control -
Part 3: General and site recipe models and representation
(IEC 61512-3:2008)**

Contrôle-commande des processus
de fabrication par lots
Partie 3: Modèles et représentation
des recettes générales
et des recettes de site
(CEI 61512-3:2008)

Chargenorientierte Fahrweise -
Teil 3: Modelle und Darstellungen
von Verfahrens- und Werksrezepten
(IEC 61512-3:2008)

This European Standard was approved by CENELEC on 2008-08-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Foreword

The text of document 65A/496/CDV, future edition 1 of IEC 61512-3, prepared by SC 65A, System aspects, of IEC TC 65, Industrial-process measurement, control and automation, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 61512-3 on 2008-08-01.

EN 61512-3 is to be used in conjunction with EN 61512-1 and EN 61512-2.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2009-05-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2011-08-01

Annex ZA has been added by CENELEC.

Endorsement notice

The text of the International Standard IEC 61512-3:2008 was approved by CENELEC as a European Standard without any modification.

This document is a preview generated by EVS

Annex ZA
(normative)**Normative references to international publications
with their corresponding European publications**

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE When an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

INTRODUCTION

IEC 61512-1 provides models and terminology applicable to batch control, IEC 61512-2 addresses data structures and guidelines for languages. This part of IEC 61512 defines additional information on general and site recipes. Clause 4 of this part of IEC 61512 contains definitions of general and site recipes in greater detail than in IEC 61512-1. Clause 5 defines detailed description of the contents of general and site recipes. Clause 6 defines a data model that identifies objects and relationships that were addressed in Clauses 4 and 5. Clause 7 defines a method for depiction of general and site recipes that can be used for both simple and complex processing requirements, using both a tabular and a graphical notation. Clause 8 describes some aspects of general or site to master recipe transformation. The annexes provide complementary information.

Although this part of IEC 61512 is intended primarily for batch processes, it may have considerable value for other types of processes as well.

BATCH CONTROL –

Part 3: General and site recipe models and representation

1 Scope

This part of IEC 61512 on Batch Control defines a model for general and site recipes; the activities that describe the use of general and site recipes within a company and across companies; a representation of general and site recipes; and a data model of general and site recipes.

3 Terms, definitions and abbreviations

3.1 Terms and definitions

For the purposes of this document, the terms and definitions given in IEC 61512-1, IEC 61512-2 and IEC 60050-351, as well as the following, apply.

3.1.1

equipment-independent recipe

recipe type that defines general requirements for equipment but is not specifically tailored for a precise class or size of equipment.

3.1.2

master recipe transform component

part of a master recipe that is used in the transformation of an equipment-independent recipe into a complete master recipe.
