European ICT professional role profiles - Part 3: Methodology documentation

This CEN Workshop Agreement has been drafted and approved by a Workshop of representatives of interested parties, the constitution of which is indicated in the foreword of this Workshop Agreement.

The formal process followed by the Workshop in the development of this Workshop Agreement has been endorsed by the National Members of CEN but neither the National Members of CEN nor the CEN-CENELEC Management Centre can be held accountable for the technical content of this CEN Workshop Agreement or possible conflicts with standards or legislation.

This CEN Workshop Agreement can in no way be held as being an official standard developed by CEN and its Members.

This CEN Workshop Agreement is publicly available as a reference document from the CEN Members National Standard Bodies.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

CWA 16458-3:2018 was developed in accordance with CEN-CENELEC Guide 29 “CEN/CENELEC Workshop Agreements – The way to rapid agreement” and with the relevant provisions of CEN/CENELEC Internal Regulations - Part 2. It was agreed on 2018-06-07 in a Workshop by representatives of interested parties, approved and supported by CEN following a public call for participation made on 2018-02-16. It does not necessarily reflect the views of all stakeholders that might have an interest in its subject matter.

The final text of CWA 16458-3 was submitted to CEN for publication on 2018-06-08. It was developed and approved by:

- (ISC)2
- AICA
- ATI-Asociación de Técnicos de Informática
- BCS
- the Chartered Institute for IT
- CEPIS
- Cigref
- CompTIA
- ECDL Foundation
- European e-Skills Association (EeSA)
- EMF
- eExcellence
- ESI-CEE
- E-SCN
- EuroCIO
- EXIN
- HBO-I
- IVI - Innovation Value Institute
- IT Staffing
- Internatinal Webmasters' association (IWA) Italy
- Linux Professional Institute
- Microsoft
- Pasc@line
- Thames Communication
- Trinity College Dublin

It is possible that some elements of CWA 16458-3 may be subject to patent rights. The CEN-CENELEC policy on patent rights is set out in CEN-CENELEC Guide 8 “Guidelines for Implementation of the

Common IPR Policy on Patents (and other statutory intellectual property rights based on inventions)”. CEN shall not be held responsible for identifying any or all such patent rights.

The Workshop participants have made every effort to ensure the reliability and accuracy of the technical and non-technical content of CWA 16458-3, but this does not guarantee, either explicitly or implicitly, its correctness. Users of CWA 16458-3 should be aware that neither the Workshop participants, nor CEN can be held liable for damages or losses of any kind whatsoever which may arise from its application. Users of CWA 16458-3 do so on their own responsibility and at their own risk.

0. Executive overview

This CEN Workshop Agreement (CWA) Part 3 **Methodology Documentation** explains the overall methodological approach and main choices underpinning the European ICT Professional Role Profiles development.

The main purpose of this Methodology Documentation is to provide confidence to users that the European ICT Professional Role Profiles have been developed applying a sound conceptual framework combined with in-depth ICT sector and HR development expertise, and with thorough and widespread stakeholder consultation.

As the ICT Profiles are based on the e-CF, the methodological approach is based on e-CF development methodology, details of which can be found in CEN TR 16234-3:2017 “Building the e-CF. A combination of sound methodology and expert contribution”. Furthermore, the Profiles of this current version 2.0 are closely aligned to the method used in developing the first version of the ICT Role Profiles (CEN CWA 16458:2012). The aim of the update was to maintain consistency with previously established ICT Profiles concepts that had proved to be valuable. This included maintaining the close relationship to the e-CF and enhancing the methodology approach by updating the ICT Role Profiles in view of extensive stakeholder consultation. Details of stakeholders consulted are given in the acknowledgement section.

This document also provides a sound methodology approach to experts and stakeholders from other sectors who may wish to transfer the overall approach of European Role Profile creation for implementation in other, not-ICT specific environments.

The overall aim of developing the European ICT Professional Role Profiles and the underpinning concepts is to provide a means of summarising and organising the insights of experts and stakeholders into a reference tool. Although the profiles are focused upon ICT professional competence and performance the ultimate objective is to influence the ability of organisations to leverage ICT for better performance.

1. European ICT Professional Role Profiles basic principles

1.1. ICT professional role profiles versus competences and jobs

Jobs, roles and competences are terms commonly used when describing the actions, responsibilities, tasks and skills of people in the workplace. The terminology is often used interchangeably and in common use it requires limited explanation. However, when applying ICT Professional Role Profiles, it is useful to have a clear understanding of how these terms are defined in this CWA.

Competence is based entirely upon the e-CF definition; it is a demonstrated ability to apply knowledge, skills and attitudes to achieving observable results. ***e-CF competences are a key component of ICT Professional Profiles.***

Roles, in this case the European ICT Professional Role Profiles, provide a broad picture of the activities performed by individuals engaged in the multitude of positions that make up the ICT profession. These profiles reflect a collection of typical tasks, competences and responsibilities that are to be fulfilled and each profile is given a common use title for ease of identification. ***ICT Professional Role Profiles are key components of ICT jobs.***

Jobs of ICT professionals are normally described using job descriptions that are more detailed and are specific to an individual and the organisation. They contain personalised information such as terms and conditions of employment, remuneration and organisation cultural values. ***Jobs are detailed descriptions in context.***
