About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 21 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 Measuring conditions.....	7
4.1 Standard measuring environmental conditions	7
4.2 Standard lighting conditions	7
4.2.1 Darkroom conditions.....	7
4.2.2 Ambient illumination conditions.....	7
4.2.3 Ambient illumination spectra	8
4.3 Standard setup conditions.....	9
4.3.1 Starting conditions of measurements	9
4.3.2 Standard measuring positions.....	9
4.3.3 Conditions of measuring equipment	9
5 Measuring methods of transparent properties	11
5.1 Hemispherical transmittance factor with specular included	11
5.1.1 Purpose	11
5.1.2 Measuring conditions.....	11
5.1.3 Measuring method	12
5.2 Transmitted haze	13
5.2.1 General	13
5.2.2 Transmitted haze under hemispherical illumination	13
5.2.3 Transmitted haze with directly incident light.....	15
5.3 Directional transmittance factor.....	18
5.3.1 Purpose	18
5.3.2 Measuring conditions.....	18
5.3.3 Measuring method	19
5.4 Degree of clear distinction of see-through objects.....	20
5.4.1 General	20
5.4.2 Purity.....	20
5.4.3 Clarity (measurement method using a stripe pattern with a rigid width.).....	23
5.4.4 Clarity (Measuring method using a stripe pattern with gradually changed width)	26
5.5 Colour variation caused by a transparent display	28
5.5.1 Purpose	28
5.5.2 Measuring conditions.....	28
5.5.3 Measuring method	28
6 Measuring methods of on-screen properties	30
6.1 Ambient contrast ratio	30
6.1.1 Purpose	30
6.1.2 Measuring conditions.....	30
6.1.3 Measuring method	31
6.2 Display ambient colour measurement.....	32
6.2.1 Purpose	32
6.2.2 Measuring conditions.....	32
6.2.3 Measuring method	32

6.3	Contrast ratio and colour coordinate with the incident illumination originating from objects behind the screen	33
6.3.1	Purpose	33
6.3.2	Measuring method with white light source	35
6.3.3	Measuring method with collimated or directional light source	37
	Bibliography	39
	Figure 1 – Measurement points	9
	Figure 2 – Layout diagram of measurement setup	10
	Figure 3 – Side view of measuring concept for the hemispherical transmittance factor measurement with specular included or excluded	13
	Figure 4 – Schematic arrangement of haze measurement	15
	Figure 5 – Schematic arrangement of the apparatus (TOP view)	17
	Figure 6 – Side view of measuring concept for the hemispherical transmittance factor measurement with specular included or excluded	20

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTRONIC DISPLAY DEVICES –**Part 2-5: Transparent displays –
Measurements of optical characteristics**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC TR 62977-2-5, which is a technical report, has been prepared by IEC technical committee 110: Electronic display devices.

The text of this technical report is based on the following documents:

Draft TR	Report on voting
110/919/DTR	110/935B/RVDTR

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62977 series, published under the general title *Electronic display devices*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

ELECTRONIC DISPLAY DEVICES –

Part 2-5: Transparent displays – Measurements of optical characteristics

1 Scope

This part of IEC 62977 describes the conditions and measuring methods for determining the displayed properties (on-screen) and the through-screen properties of transparent direct-view-type liquid crystal displays (LCDs) and those of organic light emitting diode (OLED) displays.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 62341-6-4:2017, *Organic light emitting diode (OLED) displays – Part 6-4: Measuring methods of transparent properties*

IEC 62341-6-2, *Organic light emitting diode (OLED) displays – Part 6-2: Measuring methods of visual quality and ambient performance*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1

transparent display module

display module which can show the information on the screen and allow objects behind the display to be viewed through the screen

3.2

on-screen property

image quality attributes when the intended information is on the display panel

3.3

through-screen property

image quality attributes when the intended information is behind the display panel and is viewed through it

3.4

transmittance

ratio of the transmitted radiant or luminous flux to the incident flux in the given conditions
