About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: www.iec.ch/webstore/custserv

If you wish to give us your feedback on this publication or need further assistance, please visit the Customer Service Centre FAQ or contact us:

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: www.iec.ch/searchpub/cur_fut-f.htm

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: www.iec.ch/online_news/justpub

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: www.iec.ch/webstore/custserv/custserv_entry-f.htm

CONTENTS

FOREWORD.....	13
INTRODUCTION.....	15
1 Scope	17
2 Normative references	17
3 Terms, definitions, symbols, abbreviated terms and conventions	18
3.1 Terms and definitions	18
3.2 Symbols and abbreviated terms	21
4 Classification.....	22
4.1 General	22
4.2 Network specifications	24
4.3 Components	24
4.4 CompoNet communication model	25
4.5 CompoNet and CIP	25
5 Characteristics	26
5.1 Communication cycle.....	26
5.1.1 General	26
5.1.2 Time domains	26
5.1.3 A typical communication cycle.....	27
5.2 Messaging protocol.....	27
5.2.1 Message frame format	27
5.2.2 Message frame types	29
5.2.3 Explicit messaging	52
5.2.4 Explicit messaging client/server timing requirement	62
5.3 CompoNet communication object classes.....	64
5.3.1 General	64
5.3.2 Identity object class definition (class ID code: 01 _{Hex})	64
5.3.3 Message router object class definition (class ID code: 02 _{Hex}).....	64
5.3.4 Connection object class definition (class ID code: 05 _{Hex})	64
5.3.5 CompoNet Link object class definition (class ID code: F7 _{Hex}).....	74
5.3.6 CompoNet Repeater object (class ID code: F8 _{Hex}).....	80
5.4 Network access state machine	82
5.4.1 General	82
5.4.2 Network access events	82
5.4.3 State transition diagram	84
5.4.4 Data rate auto-detection.....	85
5.4.5 Duplicate MAC ID detection.....	86
5.4.6 Repeater behaviour.....	87
5.5 I/O connection	88
5.6 TDMA.....	88
5.6.1 General	88
5.6.2 Data link timing features.....	89
5.6.3 Calculation of Time Domain.....	92
5.7 Physical layer	98
5.7.1 General	98
5.7.2 Physical signalling	98
5.7.3 Master port requirements	98

5.7.4	Slave port requirements	101
5.7.5	Receiving signal requirements for master and slave ports	104
5.7.6	Requirements for digital processing	105
5.7.7	Recommended circuits and component parameters	108
5.7.8	Isolation.....	113
5.7.9	Transmission medium	114
5.7.10	Topology.....	115
5.7.11	Link power.....	121
5.7.12	Repeater implementation	124
6	Product information	125
7	Normal service, mounting and transport conditions.....	125
7.1	Normal service conditions	125
7.1.1	General	125
7.1.2	Ambient air temperature	126
7.1.3	Altitude	126
7.1.4	Climatic conditions	126
7.2	Conditions during transport and storage	126
7.3	Mounting	126
8	Constructional and performance requirements.....	126
8.1	Indicators and configuration switches	126
8.1.1	Status indicators	126
8.1.2	Switches	128
8.1.3	CompoNet marking	129
8.2	CompoNet cable	130
8.2.1	Overview	130
8.2.2	Cable profile template	131
8.2.3	Round cable I profile	132
8.2.4	Round cable II profile	134
8.2.5	Flat cable I profile	136
8.2.6	Flat cable II profile	139
8.3	Terminator.....	141
8.3.1	General	141
8.3.2	Terminating resistor	141
8.3.3	Terminating capacitor.....	141
8.4	Connectors.....	141
8.4.1	General	141
8.4.2	Template	141
8.4.3	Engaging specification for connector profiles: open, flat I, flat II	143
8.4.4	Specifications of hooks for connector profiles: open, flat I, flat II	145
8.4.5	Open connector profile	146
8.4.6	Profile of flat connector I	150
8.4.7	Profile of flat connector II	155
8.4.8	Profile of sealed M12 connector	158
8.5	Node power supply implementation	159
8.5.1	General	159
8.5.2	Requirement for node power supply connection	159
8.5.3	The requirements for nodes powered by network power supplies:	160
8.6	Miswiring protection.....	161
8.7	Electromagnetic compatibility (EMC)	161

8.7.1	General	161
8.7.2	Immunity.....	161
8.7.3	Emissions	162
9	Tests.....	162
9.1	General	162
9.2	Electrical testing	163
9.2.1	Slave port operation voltage test	163
9.2.2	Reverse connected power supply line.....	163
9.2.3	Momentary power interruption	164
9.2.4	Isolation.....	164
9.2.5	Input impedance	165
9.2.6	Output waveform.....	166
9.2.7	Minimum input waveform.....	166
9.2.8	Electromagnetic compatibility testing	167
9.3	Mechanical test	168
9.4	Logical test.....	168
9.4.1	General	168
9.4.2	Test of slaves and repeaters	168
9.4.3	Test of master.....	171
Annex A	(normative) CompoNet common services.....	174
Annex B	(normative) CompoNet error codes	175
Annex C	(normative) Connection path attribute definition	176
Annex D	(normative) Data type specification and encoding	177
Annex E	(normative) Communication objects library	181
Annex F	(normative) Value ranges	182
Annex G	(normative) CN default time domain	183
Bibliography	187

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**LOW-VOLTAGE SWITCHGEAR AND CONTROLGEAR –
CONTROLLER-DEVICE INTERFACES (CDIs) –****Part 7: CompoNet****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

International Standard IEC 62026-7 has been prepared by subcommittee 17B: Low-voltage switchgear and controlgear, of IEC technical committee 17: Switchgear and controlgear.

This standard cancels and replaces IEC/PAS 62026-7 published in 2009. This first edition constitutes a general technical revision with clarifications only and with no significant change in the technology.

The text of this standard is based on the following documents:

FDIS	Report on voting
17B/1712/FDIS	17B/1722/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 62026 series can be found, under the general title *Low-voltage switchgear and controlgear – Controller-device interfaces (CDIs)*, on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

CompoNet™ is intended for use in, but is not limited to, industrial automation applications. These applications may include devices such as limit switches, proximity sensors, electro-pneumatic valves, relays, motor starters, operator interface panels, analogue inputs, analogue outputs and controllers.

Patent declaration

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this document may involve the use of the following patents owned by OMRON Corporation:

JP Patent Number 4023342	DUPLICATE MAC ADDRESS DETECTING METHOD, SLAVE AND MASTER IN FIELD BUS SYSTEM, AND FIELD BUS
JP Patent Number 4107110	FIELD BUS SYSTEM, CONNECTION CONFIRMING METHOD AND MASTER
JP Patent Number 3293089	REMOTE I/O SYSTEM FOR PLC AND EXECUTION METHOD THEREOF
JP Patent Number 3925660 and its counterpart patents in other countries	STARTING CONTROL METHOD OF COMMUNICATION MASTER
JP Patent Number 4006605 and its counterpart patents in other countries	COMMUNICATION SYSTEM REDUCED IN INFLUENCE OF REPEATER DELAY
JP Application Number 2004-059864	COMMUNICATION DEVICE AND NETWORK SYSTEM
JP Application Number 2004-022243	CONNECTOR FOR CONNECTION CABLE
JP Application Number 2007-167281	COMMUNICATION SYSTEM REDUCED IN INFLUENCE OF REPEATER DELAY
JP Application Number 2005-252414	NETWORK REPEATING WITH FILTERING FUNCTION
JP Application Number 2005-252758	A EVENT COMMUNICATION METHOD FOR PROGRAMMABLE CONTROLLER SYSTEMS
JP Application Number 2005-203496	GETTING NETWORK CONFIGURATION INFORMATION IN PLC SYSTEMS
JP Application Number 2002-334265	A I/O MAPPING METHOD FOR NETWORK SYSTEMS AND CONTROLLERS
JP Application Number 2005-252682	A SCHEDULING METHOD FOR EVENT COMMUNICATIONS
JP Application Number 2005-105543 and its counterpart patents in other countries	RECEIVED DATA COMPENSATION DEVICE

IEC takes no position concerning the evidence, validity and scope of these patent rights.

The holder of this patent right has assured the IEC that he/she is willing to negotiate licences under reasonable and non-discriminatory terms and conditions with applicants throughout the

world. In this respect, the statement of the holder of this patent right is registered with IEC. Information may be obtained from:

ODVA, Inc.
2370 E. Stadium Boulevard #1000
Ann Arbor, Michigan U.S.A. 48104

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. IEC shall not be held responsible for identifying any or all such patent rights.

ISO (www.iso.org/patents) and IEC (http://www.iec.ch/tctools/patent_decl.htm) maintain on-line data bases of patents relevant to their standards. Users are encouraged to consult the data bases for the most up to date information concerning patents.

LOW-VOLTAGE SWITCHGEAR AND CONTROLGEAR – CONTROLLER-DEVICE INTERFACES (CDIs) –

Part 7: CompoNet

1 Scope

This part of IEC 62026 specifies an interface system providing bit-level and word-level communication between a controller and control circuit devices such as sensors, actuators, and switching elements. The interface system uses cabling with round or flat profiles containing a two conductor signalling pair and optionally a two conductor power supply pair. This part establishes requirements for the interchangeability of components with such interfaces.

This part of IEC 62026 specifies the following particular requirements for CompoNetTM 1):

- requirements for interfaces between a controller and control circuit devices;
- normal service conditions for devices;
- constructional and performance requirements;
- tests to verify conformance to requirements.

These particular requirements apply in addition to the general requirements of IEC 62026-1.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60512-1, *Connectors for electronic equipment – Tests and measurements – Part 1: General*

IEC 60529, *Degrees of protection provided by enclosures (IP Code)*

IEC 61000-4-2, *Electromagnetic compatibility (EMC) – Part 4-2: Testing and measurement techniques – Electrostatic discharge immunity test*

IEC 61000-4-3, *Electromagnetic compatibility (EMC) – Part 4-3: Testing and measurement techniques – Radiated, radio-frequency, electromagnetic field immunity test*

IEC 61000-4-4, *Electromagnetic compatibility (EMC) – Part 4-4: Testing and measurement techniques – Electrical fast transient/burst immunity test*

IEC 61000-4-5, *Electromagnetic compatibility (EMC) – Part 4-5: Testing and measurement techniques – Surge immunity test*

1) CompoNetTM is a trade name of Open DeviceNet Vendor Association, Inc. This information is given for the convenience of users of this International Standard and does not constitute an endorsement by IEC of the trademark holder or any of its products. Compliance to this standard does not require use of the trade name CompoNetTM. Use of the trade name CompoNetTM requires permission of Open DeviceNet Vendor Association, Inc.

IEC 61000-4-6, *Electromagnetic compatibility (EMC) – Part 4-6: Testing and measurement techniques – Immunity to conducted disturbances, induced by radio-frequency fields*

IEC 61076-2-101, *Connectors for electronic equipment – Product requirements – Part 2-101: Circular connectors – Detail specification for M12 connectors with screw-locking*

IEC 61131-2, *Programmable controllers – Part 2: Equipment requirements and tests*

IEC 61158-5-2:2007, *Industrial communication networks – Fieldbus specifications – Part 5-2: Application layer service definition – Type 2 elements*

IEC 61158-6-2:2007, *Industrial communication networks – Fieldbus specifications – Part 6-2: Application layer protocol specification – Type 2 elements*

IEC 61918:2010, *Industrial communication networks – Installation of communication networks in industrial premises*

IEC 62026-1, *Low-voltage switchgear and controlgear – Controller-device interfaces (CDIs) – Part 1: General rules*

CISPR 11:2009, *Industrial, scientific and medical equipment – Radio-frequency disturbance characteristics – Limits and methods of measurement*

ISO/IEC 7498-1, *Information technology – Open Systems Interconnection – Basic Reference Model: The Basic Model*

3 Terms, definitions, symbols and abbreviated terms

3.1 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1.1

BEACON

frame generated by the master to notify slaves and repeaters of the present transmission speed and network connection information

3.1.2

bit slave

I/O device working with data lengths not more than 4 bits

3.1.3

branch

a piece of cable making a T connection to a trunk or sub-trunk

3.1.4

CDI status indicator

visual indication reporting the status of the communication link at a CompoNet device

3.1.5

circuit speed

baud rate

communication rate in signalling symbols or marks/s on the transmission medium

NOTE Each CompoNet bit is Manchester encoded using two marks so a circuit speed of 6 Mmarks/s gives a transmission speed or data rate of 3 Mbits/s.
