## EESTI STANDARDI EESSÕNA

## NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 62149-5:2011 sisaldb Euroopa standardi EN 62149-5:2011 ingliskeelset teksti.	This Estonian standard EVS-EN 62149-5:2011 consists of the English text of the European standard EN 62149-5:2011.
Standard on kinnitatud Eesti Standardikeskuse 28.02.2011 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.	This standard is ratified with the order of Estonian Centre for Standardisation dated 28.02.2011 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.
Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kätesaadavaks tegemise kuupäev on 21.01.2011.	Date of Availability of the European standard text 21.01.2011.
Standard on kätesaadav Eesti standardiorganisatsionist.	The standard is available from Estonian standardisation organisation.

ICS 33.180.20

Supersedes EN 62149-5:2003

English version

**Fibre optic active components and devices -  
Performance standards -  
Part 5: ATM-PON transceivers with LD driver and CDR ICs  
(IEC 62149-5:2009)**

Composants et dispositifs actifs à fibres optiques -  
Normes de fonctionnement  
Partie 5: Emetteurs-récepteurs ATM-PON avec programme de gestion LD et ICs CDR  
(CEI 62149-5:2009)

Aktive Lichtwellenleiterbauelemente und -geräte -  
Betriebsverhalten -  
Teil 5: ATM-PON Sende- und Empfangsmodule mit Laserdiodentreiberschaltungen und Takt- und Datenrückgewinnungs-ICs  
(IEC 62149-5:2009)

This European Standard was approved by CENELEC on 2011-01-02. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## Foreword

The text of document 86C/891/FDIS, future edition 2 of IEC 62149-5, prepared by SC 86C, Fibre optic systems and active devices, of IEC TC 86, Fibre optics, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 62149-5 on 2011-01-02.

This European Standard supersedes EN 62149-5:2003.

The main changes with respect to EN 62149-5:2003 are listed below:

- Normative references have been updated;
- Incorrect “Letter symbols” have been corrected;
- Some “Notes” in tables have been revised in order to harmonize with EN 62150-2:2004.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN and CENELEC shall not be held responsible for identifying any or all such patent rights.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2011-10-02
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2014-01-02

Annex ZA has been added by CENELEC.

## Endorsement notice

The text of the International Standard IEC 62149-5:2009 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60617 series	NOTE Harmonized in EN 60617 series (not modified).
IEC 60793 series	NOTE Harmonized in EN 60793 series (partially modified).
IEC 60794 series	NOTE Harmonized in EN 60794 series (not modified).
IEC 60825 series	NOTE Harmonized in EN 60825 series (not modified).
IEC 60874 series	NOTE Harmonized in EN 60874 series (not modified).
IEC 61076 series	NOTE Harmonized in EN 61076 series (not modified).
IEC 61280 series	NOTE Harmonized in EN 61280 series (not modified).
IEC 61281-1:1999	NOTE Harmonized as EN 61281-1:1999 (not modified).
IEC 61754 series	NOTE Harmonized in EN 61754 series (partially modified).
IEC 62007-1:1999	NOTE Harmonized as EN 62007-1:2000 (not modified).
IEC 62007-2:1999	NOTE Harmonized as EN 62007-2:2000 (not modified).
IEC 62148-1:2002	NOTE Harmonized as EN 62148-1:2002 (not modified).

## Annex ZA (normative)

### Normative references to international publications with their corresponding European publications

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

**NOTE** When an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

## INTRODUCTION

Fibre optic transceivers are used to convert electrical signals into optical signals and vice versa. The optical performance criteria are generally well specified for a number of internationally agreed applications areas such as ITU-T Recommendation G.983.1 and IEEE 802.3. This standard aims to assure inter-changeability in performance between fibre optic transceivers for ATM-PON systems supplied by different manufacturers, but does not guarantee operation between fibre optic transceivers.

Manufacturers using the standards are responsible for meeting the required performance and/or reliability and quality assurance under a recognized scheme.

This document is a preview generated by EVS

## FIBRE OPTIC ACTIVE COMPONENTS AND DEVICES – PERFORMANCE STANDARDS –

### Part 5: ATM-PON transceivers with LD driver and CDR ICs

#### 1 Scope

This part of IEC 62149 specifies performance on the transceiver modules for asynchronous-transfer-mode passive optical network (ATM-PON) systems recommended by the International Telecommunication Union (ITU) in ITU-T Recommendation G.983.1.

#### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

### 3 Term, definitions and abbreviations

For the purposes of this document, the following terms, definitions and abbreviations apply.

Further terminology concerning related physical concepts, types of devices, general terms, and terms related to ratings and characteristics can be found in IEC 61931.

It is also recommended to refer to ITU-T Recommendation G.983.1.

#### 3.1 Terms and definitions

##### 3.1.1

**optical access network**

**OAN**

set of access links sharing the same network-side interfaces and supported by optical access transmission systems.

NOTE The OAN may include a number of ODNs connected to the same OLT.

##### 3.1.2

**optical distribution network**

**ODN**

apparatus or component that provides the optical transmission means from the OLT to the users, and vice versa. It utilizes passive optical components

##### 3.1.3

**optical line termination**

**OLT**

apparatus that provides the network-side interface of the OAN, and is connected to one or more ODNs

##### 3.1.4

**optical network unit**

**ONU**

apparatus that provides (directly or remotely) the user-side interface of the OAN, and is connected to the ODN
