## About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: [www.iec.ch/webstore/custserv](http://www.iec.ch/webstore/custserv)

If you wish to give us your feedback on this publication or need further assistance, please visit the Customer Service Centre FAQ or contact us:

## A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: [www.iec.ch/searchpub/cur\\_fut-f.htm](http://www.iec.ch/searchpub/cur_fut-f.htm)

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: [www.iec.ch/webstore/custserv/custserv\\_entry-f.htm](http://www.iec.ch/webstore/custserv/custserv_entry-f.htm)

4.4 Resistance measurements .....	19
4.4.1 Contact resistance – Millivolt level .....	19
4.4.2 Contact resistance – Specified current .....	21
4.4.3 Resistance from actuator to mounting bushing (surface) .....	22
4.4.4 Insulation resistance .....	23
4.5 Dielectric strength .....	23
4.5.1 Dielectric strength at standard atmospheric conditions .....	23
4.5.2 Dielectric strength at low air pressure .....	24
4.6 Heating .....	25
4.6.1 Object .....	25
4.6.2 Method .....	25
4.6.3 Requirement .....	26
4.6.4 Details to be specified .....	26
4.7 Dynamic stress .....	26
4.7.1 Shock .....	26
4.7.2 Vibration .....	27
4.7.3 Contact disturbance .....	28
4.8 Mechanical strength .....	28
4.8.1 Robustness of actuator .....	28

4.8.2 Robustness of mounting bushing .....	31
4.8.3 Robustness of screw mounting .....	31
4.8.4 Robustness of terminations .....	31
4.9 Mechanical endurance.....	32
4.9.1 Mechanical endurance – Standard atmospheric conditions .....	32
4.9.2 Mechanical endurance – Category temperature range .....	33
4.10 Electrical endurance.....	33
4.10.1 Electrical endurance – Standard atmospheric conditions .....	33
4.10.2 Electrical endurance – Upper category temperature.....	35
4.10.3 Electrical endurance – Category temperature range .....	36
4.10.4 Electrical endurance – Low air pressure .....	36
4.10.5 Logic loads (TTL) .....	37
4.10.6 Low level endurance test.....	38
4.11 Overload .....	39
4.11.2 Electrical overload.....	39
4.11.3 Capacitive load switching .....	40
4.12 Environmental testing.....	41
4.12.1 Climatic sequence .....	41
4.12.2 Damp heat, steady state .....	43
4.12.3 Rapid change of temperature.....	44
4.12.4 Mould growth (resistance) .....	44
4.12.5 Corrosion, industrial atmosphere .....	45
4.12.6 Dust and sand .....	46
4.12.7 Contact resistance stability.....	48
4.13 Soldering.....	49
4.13.1 Solderability, wetting, solder bath method.....	49
4.13.2 Solderability, wetting, soldering iron method.....	50
4.13.3 Solderability, de-wetting .....	51
4.13.4 Resistance to soldering heat, solder bath method.....	51
4.13.5 Resistance to soldering heat, soldering iron method .....	52
4.14 Panel seal .....	53
4.14.1 Drip – Proof.....	53
4.14.2 Splash – Proof.....	53
4.14.3 Immersion .....	53
4.14.4 Submersion .....	54
4.15 Enclosure seal.....	55
4.15.1 Watertight immersion.....	55
4.15.2 Resilient or hermetic seal .....	55
4.16 Fluid resistance.....	56
4.16.1 Immersion in cleaning solvents (marking) .....	56
4.17 Fire hazard.....	56
4.18 Capacitance .....	56
4.18.1 Object .....	56
4.18.2 Method .....	56
4.18.3 Requirement.....	57
4.18.4 Details to be specified .....	57
4.19 Illumination.....	57
4.19.1 Chromaticity .....	57
4.19.2 Transmittancy.....	57

4.19.3 Temperature of illuminated surface.....	58
4.20 Soldering for surface mounting switches .....	58
4.20.1 Solderability, solder bath method (surface mounting switches) .....	58
4.20.2 Solderability, reflow method (surface mounting switches) .....	59
4.20.3 Solderability, soldering iron method (surface mounting switches) .....	60
4.20.4 Resistance to soldering heat , solder bath method (surface mounting switches) .....	60
4.20.5 Resistance to soldering heat, reflow method (surface mounting switches) .....	61
4.20.6 Resistance to soldering heat, soldering iron method (surface mounting switches).....	62
4.21 Mechanical strength (surface mounting switches).....	62
4.21.1 Substrate bending (surface mounting switches) .....	62
4.21.2 Pull-off and push-off (surface mounting switches).....	63

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ELECTROMECHANICAL SWITCHES  
FOR USE IN ELECTRICAL AND ELECTRONIC EQUIPMENT –****Part 1: Generic specification****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61020-1 has been prepared by subcommittee 23J: Switches for appliances, of IEC technical committee 23: Electrical accessories.

This second edition cancels and replaces the first edition published in 1991. This second edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition.

- a) The requirements of the IEC 60512 series of standards have been integrated in this second edition of IEC 61020-1. In particular the test methods, terminology, symbols and other necessary information concerning switches as specified in IEC 60512 have been implemented in this standard.
- b) Additionally, the following items have been updated with respect to the first edition:
  - test methods were reviewed for detailed description;

- the explanation for the test method of the operating force was rewritten in more detail;
- the test voltage for measurement for contact bounce was reviewed;
- the electrical endurance “ON” duration in the duty cycle was harmonized with IEC 61058;
- the requirements for fire hazards have been deleted;
- testing methods of surface mounting switches based on the Japanese industrial standard were added.

The text of this standard is based on the following documents:

FDIS	Report on voting
23J/325/FDIS	23J/328/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## INTRODUCTION

This generic specification covers the general requirements and test methods for electromechanical switches with optional quality assurance procedures. It provides the general requirements and test methods for use in any detail specifications for pushbutton switches, rotary switches, sensitive switches, toggle switches, and other electromechanical switches. It also provides guidelines for appropriate quality assurance procedures in Annex A (informative).

Where it is intended that an electromechanical switch comply with requirements related to safety, the specific safety requirements are specified in IEC 61058-1.

## ELECTROMECHANICAL SWITCHES FOR USE IN ELECTRICAL AND ELECTRONIC EQUIPMENT –

### Part 1: Generic specification

## 1 Scope and object

### 1.1 Scope

This generic specification relates to electromechanical switches intended for use in electrical and electronic appliances. Switches covered by this specification:

- a) are devices which open, close, or change the connection of a circuit by the mechanical motion of conducting parts (contacts);
- b) have a maximum rated voltage of 480 V;
- c) have a maximum rated current of 63 A.

This generic specification does not include keyboards and keypads which are intended for use in information-handling systems. Electromechanical key switches may be included under the scope of this generic specification.

Switch families shall be described in any detail specifications that will reference this generic specification.

### 1.2 Object

The object of this generic specification is to provide consistency in detail specifications for electromechanical switches by specifying the terminology, symbols, test methods and other necessary information.

## 2 General

### 2.1 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60027 (all parts), *Letter symbols to be used in electrical technology*

IEC 60050-581:2008, *International Electrotechnical Vocabulary – Part 581: Electromechanical components for electronic equipment*

IEC 60068-1:1988, *Environmental testing – Part 1: General and guidance*  
Amendment 1 (1992)

IEC 60068-2-6:2007, *Environmental testing – Part 2-6: Tests – Test Fc: Vibration (sinusoidal)*

IEC 60068-2-1:2007, *Environmental testing – Part 2-1: Tests – Test A: Cold*

IEC 60068-2-2:2007, *Environmental testing – Part 2-2: Tests – Test B: Dry heat*

IEC 60068-2-10:2005, *Environmental testing – Part 2-10: Tests – Test J and guidance: Mould growth*

IEC 60068-2-13:1983, *Environmental testing – Part 2-13: Tests – Test M: Low air pressure*

IEC 60068-2-14:2009, *Environmental testing – Part 2-14: Tests – Test N: Change of temperature*

IEC 60068-2-17:1994, *Environmental testing – Part 2-17: Tests – Test Q: Sealing*

IEC 60068-2-20:2008, *Environmental testing – Part 2-20: Tests – Test T: Test methods for solderability and resistance to soldering heat of devices with leads*

IEC 60068-2-21:2006, *Environmental testing – Part 2-21: Tests – Test U: Robustness of terminations and integral mounting devices*

IEC 60068-2-30:2005, *Environmental testing – Part 2-30: Tests – Test Db: Damp heat, cyclic (12+12-hour cycle)*

IEC 60068-2-42:2003, *Environmental testing – Part 2-42: Tests – Test Kc: Sulphur dioxide test for contacts and connections*

IEC 60068-2-43:2003, *Environmental testing – Part 2-43: Tests – Test Kd: Hydrogen sulphide test for contacts and connections*

IEC 60068-2-45:1980, *Environmental testing – Part 2-45: Tests – Test XA and guidance: Immersion in cleaning solvents*  
Amendment 1 (1993)

IEC 60068-2-49:1983, *Environmental testing – Part 2-49: Tests – Guidance to Test Kc: Sulphur dioxide test for contacts and connections*

IEC 60068-2-58:1999, *Environmental testing Part 2-58: Tests – Tests Td: Test methods for solderability, resistance to dissolution of metallization and to soldering heat of surface mounting devices (SMD)*

IEC 60068-2-61:1991, *Environmental testing – Part 2-61: Test methods – Test Z/ABDM: Climatic sequence*

IEC 60068-2-68:1994, *Environmental testing – Part 2-68: Tests – Test L: Dust and sand*

IEC 60068-2-78:2001, *Environmental testing – Part 2-78: Tests – Test Cab: Damp heat, steady state*

IEC 60529:1989, *Degrees of protection provided by enclosures (IP Code)*  
Amendment 1 (2001)

IEC 60617, *Graphical symbols for diagrams*

IEC 61058-1:2000, *Switches for appliances – Part 1: General requirements*  
Amendment 1 (2001)  
Amendment 2 (2007)

ISO 1000:1992, *SI units and recommendation for the use of their multiples and of certain other units*
