English version

Sacks for the transport of food aid

Sacks made of woven cotton/polyolefin fabric

Sacs pour le transport de l'aide alimentaire; sacs faits en toile de coton/ polyoléfine tissée Säcke für den Transport von Lebensmitteln für die Nahrungsmittelhilfe; Säcke aus Baumwoll/Polyolefin-Mischgewebe

This European Standard was approved by CEN on 1994-05-12.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by CEN/TC 120 'Sacks for the transport of food aid', the Secretariat of which is held by NNI.

This European Standard has been prepared under a mandate given to CEN by the Commission of the European Communities and the European Free Trade Association, and supports essential requirements of the relevant EC Directive(s).

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, and conflicting national standards withdrawn, by November 1994 at the latest.

In accordance with the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard:

Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, a, and a second an Portugal, Spain, Sweden, Switzerland and United Kingdom.

1 Scope

This European Standard specifies the general characteristics, requirements and methods of test for sacks made of woven cotton/polyolefin fabric.

This European Standard is applicable to sacks made of woven cotton/polyolefin fabric, having a filling mass up to 50 kg, intended for the transport of food aid.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references subsequent amendments to, or revisions of, any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

ASTM G 53-88	Standard practice for operating light and water exposure apparatus (Fluorescent UV-condensation type) for exposure of non-metallic materials

3 Definitions

For the purposes of this standard, the following definitions apply:

NOTE: Other terms used in the manufacture of sacks are defined in EN 26590-1 for paper sacks and in EN 26590-2 for sacks made of thermoplastic flexible film. Most of these terms can also be applied to sacks made of cotton/polyolefin fabric.

3.1 Woven cotton/polyolefin sack

A container made of woven cotton/polyolefin fabric, closed at least at one end, possibly in combination with other flexible materials used for the liner, to provide the properties required for filling and the goods distribution chain.

NOTE: Hereafter where the word "sack" is used in the text of this European Standard, a sack made of cotton/polyolefin fabric is to be understood.
