### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

## CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references .....	7
3 Terms, definitions, abbreviated terms and conventions.....	7
3.1 Terms and definitions.....	7
3.2 Abbreviated terms.....	10
3.3 Conventions.....	11
4 Definition of models.....	11
4.1 General.....	11
4.2 Conducted emission model .....	11
4.3 Radiated emission model .....	11
4.4 Conducted immunity model .....	12
4.5 Radiated immunity model.....	12
4.6 Conducted pulse immunity model.....	12
5 Modelling approaches.....	12
5.1 General.....	12
5.2 Black box modelling approach.....	13
5.3 Equivalent circuit modelling approach .....	13
5.4 Other modelling approaches .....	14
5.4.1 General .....	14
5.4.2 Electromagnetic modelling approach .....	14
5.4.3 Statistical modelling approach .....	14
6 Requirements of model description.....	14
7 Model data exchange format.....	14
7.1 General.....	14
7.2 IC EMCML structure.....	15
7.3 IC EMCML components.....	16
7.3.1 Root element .....	16
7.3.2 Global element .....	16
7.3.3 Header section .....	16
7.3.4 Lead element.....	17
7.3.5 Lead_definitions section .....	17
7.3.6 Macromodels section .....	17
7.3.7 Frequency section .....	18
7.3.8 Validity section .....	19
7.3.9 Pdn section .....	20
7.3.10 Nlb section .....	21
7.3.11 lbc section .....	21
7.3.12 Ia section.....	21
7.3.13 Ib section.....	22
7.3.14 Fb section.....	22
7.3.15 Voltage, Current and Power sections .....	23
7.3.16 Table section.....	23
7.3.17 Coordinate_system section.....	24
7.3.18 Reference section.....	24
Annex A (normative) Requirements for EMC IC models .....	25

Annex B (normative) Preliminary definitions for XML representation .....	26
B.1 XML basics .....	26
B.1.1 XML declaration.....	26
B.1.2 Basic elements .....	26
B.1.3 Root element .....	26
B.1.4 Comments .....	26
B.1.5 Line terminations .....	27
B.1.6 Element hierarchy.....	27
B.1.7 Element attributes .....	27
B.2 Keyword requirements .....	27
B.2.1 General .....	27
B.2.2 Keyword characters .....	27
B.2.3 Keyword syntax .....	28
B.2.4 File structure .....	28
B.2.5 Values .....	30
Annex C (normative) IC_EMCMML valid keywords and usage .....	32
C.1 Root element keywords.....	32
C.2 Global keywords .....	33
C.3 File header keywords.....	33
C.4 <i>Lead</i> keyword attributes .....	35
C.5 <i>Submodel</i> element attributes.....	36
C.6 <i>Vector</i> element keywords .....	36
C.7 <i>Lead_definitions</i> section attributes.....	37
C.7.1 General .....	37
C.7.2 <i>Lead</i> element attributes .....	38
C.8 <i>Validity</i> section keywords.....	38
C.9 <i>Subckt</i> section attributes.....	38
C.10 <i>Netlist</i> section keywords .....	39
C.11 <i>Pdn</i> and <i>lbc</i> section keywords.....	39
C.11.1 General .....	39
C.11.2 <i>Lead</i> element attributes in the <i>Pdn</i> section .....	40
C.11.3 <i>Lead</i> element attributes in the <i>lbc</i> section.....	42
C.12 <i>Ia</i> section keywords .....	44
C.12.1 General .....	44
C.12.2 <i>Lead</i> element attributes .....	44
C.12.3 <i>Voltage</i> section keywords .....	45
C.12.4 <i>Current</i> section keywords .....	46
C.12.5 <i>Pulse</i> element keywords .....	48
C.13 <i>Ib</i> section keywords .....	50
C.13.1 <i>Lead</i> element keywords .....	50
C.13.2 <i>Max_power_level</i> section keywords .....	51
C.13.3 <i>Voltage</i> section keywords .....	51
C.13.4 <i>Current</i> section keywords .....	52
C.13.5 <i>Power</i> section keywords .....	53
C.13.6 <i>Test_criteria</i> section keywords.....	54
C.14 <i>Nlb</i> section keywords .....	55
C.15 <i>Fb</i> section keywords .....	56
C.15.1 <i>Lead</i> element keywords .....	56
C.15.2 Table element keywords .....	57

C.15.3 Test_characteristics element attributes .....	58
Bibliography.....	59
Figure B.1 – Multiple XML files .....	29
Figure B.2 – XML files with data files (*.dat) .....	29
Figure B.3 – XML files with additional files .....	30
Figure C.1 – Pulse signal as defined using the Pulse element.....	50
Table 1 – Attributes of <i>Lead</i> keyword in the <i>Lead_definitions</i> section .....	17
Table 2 – General definition of the <i>Subckt</i> attributes .....	18
Table 3 – Definition of the <i>Validity</i> section .....	19
Table A.1 – Requirements for model description .....	25
Table B.1 – Valid logarithmic units .....	31
Table C.1 – <i>Root</i> element keywords.....	32
Table C.2 – Global keywords .....	33
Table C.3 – <i>Header</i> element keywords.....	34
Table C.4 – <i>Lead</i> element keywords .....	35
Table C.5 – <i>Submodel</i> element keywords .....	36
Table C.6 – <i>Vector</i> element keywords .....	37
Table C.7 – Valid elements in the <i>Lead_definitions</i> section .....	37
Table C.8 – Attributes of the <i>Lead</i> element in the <i>Lead_definitions</i> section .....	38
Table C.9 – <i>Validity</i> element keywords.....	38
Table C.10 – <i>Subckt</i> element keywords .....	39
Table C.11 – <i>Netlist</i> element keywords .....	39

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**EMC IC MODELLING –****Part 1: General modelling framework****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62433-1 has been prepared by subcommittee 47A: Integrated circuits, of IEC technical committee 47: Semiconductor devices.

IEC 62433-1 cancels and replaces IEC TS 62433-1 published in 2011. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to IEC TS 62433 1:2011:

Incorporation of a data exchange format for an integrated circuit's model representation.

The text of this International Standard is based on the following documents:

CDV	Report on voting
47A/1042/CDV	47A/1055/RVC

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 62433 series, under the general title *EMC IC modelling*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## EMC IC MODELLING –

### Part 1: General modelling framework

#### 1 Scope

This part of IEC 62433 specifies the framework and methodology for EMC IC macro-modelling. Terms that are commonly used in IEC 62433 (all parts), different modelling approaches, requirements and data-exchange format for each model category that is standardized in this series are defined in this document.

#### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 62433 (all parts), *EMC IC modelling*

ISO 8879, *Information processing – Text and office systems – Standard Generalized Markup Language (SGML)*

ANSI INCITS 4:1986, *Information Systems – Coded Character Sets – 7-Bit American National Standard Code for Information Interchange (7-Bit ASCII)*

#### 3 Terms, definitions, abbreviated terms and conventions

##### 3.1 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

##### 3.1.1

##### **ICEM-CE**

Integrated Circuit Emission Model – Conducted Emissions  
macro-model of an integrated circuit (IC) to simulate the conducted electromagnetic emissions

Note 1 to entry: An ICEM-CE macro-model can be used for modelling an IC-die, a functional block and an Intellectual Property (IP) block.

##### 3.1.2

##### **ICEM-RE**

Integrated Circuit Emission Model – Radiated Emissions  
macro-model of an integrated circuit (IC) to simulate the radiated electromagnetic emissions
