Safety of woodworking machines - One side thickness planing machines CONSOLIDATED TEXT

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN 860:2007+A2:2012 sisaldb Euroopa standardi EN 860:2007+A2:2012 ingliskeelset teksti.	This Estonian standard EVS-EN 860:2007+A2:2012 consists of the English text of the European standard EN 860:2007+A2:2012.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kätesaadavaks 27.06.2012.	Date of Availability of the European standard is 27.06.2012.
Standard on kätesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

EUROPEAN STANDARD

EN 860:2007+A2

NORME EUROPÉENNE

EUROPÄISCHE NORM

June 2012

ICS 79.120.10

Supersedes EN 860:2007+A1:2009

English Version

Safety of woodworking machines - One side thickness planing machines

Sécurité des machines pour le travail du bois - Machines à raboter sur une face

Sicherheit von Holzbearbeitungsmaschinen - Dickenhobelmaschinen für einseitige Bearbeitung

This European Standard was approved by CEN on 10 May 2007 and includes Amendment 1 approved by CEN on 16 July 2009 and Amendment 2 approved by CEN on 20 May 2012.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword

This document (EN 860:2007+A2:2012) has been prepared by Technical Committee CEN/TC 142 "Woodworking machines - Safety", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2012, and conflicting national standards shall be withdrawn at the latest by December 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document includes Amendment 1, approved by CEN on 2009-07-16 and Amendment 2, approved by CEN on 2012-05-20.

This document supersedes ^{A2} EN 860:2007+A1:2009 _{A2}.

The start and finish of text introduced or altered by amendment is indicated in the text by tags ^{A1} _{A1} and ^{A2} _{A2}.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of the Machinery Directive.

^{A2} For relationship with EU Directive, see informative Annex ZA, which is an integral part of this document. _{A2}

Organisation contributing to the preparation of the European Standard include the European Association of Manufacturer of Woodworking Machines "EUMABOIS".

The European Standards produced by CEN/TC 142 are particular to woodworking machines and complement the relevant A and B standards on the subject of general safety (see introduction of ^{A2} EN ISO 12100:2010 _{A2} for a description of A, B and C standards).

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

This document has been prepared to be a harmonised standard to provide one means of conforming to the essential safety requirements of the Machinery Directive, and associated EFTA regulations.

This document is a type C standard as defined in [EN ISO 12100:2010](#).

The machinery concerned and the extent to which hazards, hazardous situations and events are covered are indicated in the scope of this document.

When provisions of this type C standard are different from those which are stated in type A or B standards, the provisions of this type C standard take precedence over the provisions of other standards, for machines that have been designed and built according to the provisions of this type C standard.

The requirements of this document are directed to manufacturers and their authorised representatives of one side thickness planing machines. They are also useful for designers and importers.

This document also includes provisions and examples of information to be provided by the manufacturer to the user.

Common requirements for tooling are given in [EN 847-1:2005+A1:2007](#).

1 Scope

This document **[A]** specifies all significant **[A]** hazards, hazardous situations and events as listed in Clause 4, relevant to stationary and displaceable one side thickness planing machines fitted with an integrated feed and with cutterblock fixed in position and manual loading and unloading of the work-piece, hereinafter referred to as "machines", designed to cut solid wood, chipboard, fibreboard and plywood when they are used as intended and under the conditions foreseen by the manufacturer **[A]** including reasonably foreseeable misuse **[A]**.

[A] Machines which are designed to work wood based materials may also be used for working hardened plastic materials with similar physical characteristics as wood. **[A]**

This document does not apply to:

- a) machines set up on a bench or a table similar to a bench, which is intended to carry out work in a stationary position, capable of being lifted by one person by hand;

NOTE 1 Transportable motor-operated electric tools are dealt with in **[A]** EN 61029-1:2009 **[A]** together with **[A]** EN 61029-2-3:2011 **[A]**.

- b) hand held planers or any adaptation permitting their use in a different mode, i.e. bench mounting;

NOTE 2 Hand-held motor-operated electric tools are dealt with in **[A]** EN 60745-1:2009 **[A]** together with **[A]** EN 60745-2-14:2009 **[A]**.

- c) thickness planing machines where the cutterblock is adjustable for depth of cut setting.

This document is not applicable to one side thickness planning machines fitted with an integrated feed and with cutterblock fixed in position which are manufactured before the date of its publication as EN.

NOTE 3 Machines covered by this European Standard are listed under **[A]** 3 of Annex IV **[A]** of the Machinery Directive.

2 Normative references

3 Terms and definitions

3.1 General

For the purposes of this document, the terms and definitions given in EN ISO 12100:2010 and the following apply:

3.2 Definitions

3.2.1

one side thickness planing machine

machine designed for cutting off layers of the upper surface of a work-piece by a cutterblock rotating around a horizontal axis, mounted at right angles to the infeed direction above the table designed to position and support the work-piece

NOTE The cutterblock is a cylindrical shaped complex tool equipped with blades with horizontal straight cutting line that cuts while rotating (see also EN 847-1:2005+A1:2007 for a description of the complex tool). The work-piece is fed into the machine against the direction of the cut

3.2.2

table

table used to support the work-piece at the machine which may comprise an assembly of rollers, belts or other fixed or moving mechanical elements

3.2.3

cutterblock

machine component designed to hold the cutting knives or cutting blades

³⁾ EN ISO 13849-1:2006 superseded EN 954-1:1996.
