## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 127, *Earth-moving machinery*, Subcommittee SC 3, *Machine characteristics, electrical and electronic systems, operation and maintenance*.

This first edition of ISO/TR 6750-2, together with ISO 6750-1, cancels and replaces ISO 6750:2005.

A list of all parts in the ISO 6750 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

## Introduction

This document is published as a Technical Report to allow it to be updated as changes are made to any of the referenced standards or as other standards are published that provide requirements for information to be included in the operator's manual.

# Earth-moving machinery — Operator's manual —

## Part 2: List of references

### 1 Scope

This document provides a list of standards, referenced in ISO 20474-1 and EN 474-1, that include requirements for information to be included in the operator's manual. This list of standards is being provided as guidance in creating operator's manuals.

### 2 Normative references

There are no normative references in this document.

### 3 Terms and definitions

No terms and definitions are listed in this document.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>

### 4 References for information to be included in operator's manual

[Table 1](#) is a list of standards referenced in ISO 20474-1 and EN 474-1 that make reference to information to be included in the operator's manual, if applicable, that are not already included in ISO 6750-1.

NOTE 1 Subject titles are either selected from all of or part of the cited ISO titles, e.g. from ISO 5006 "Earth-moving machinery — Operator's field of view — Test method and performance criteria" to "operator's field of view", and from ISO 14990-1 "Earth-moving machinery — Electrical safety of machines utilizing electric drives and related components and systems — Part 1: General Requirements" to "electric drive systems".

NOTE 2 The subjects are listed in alphabetical order.

**Table 1 — References for information to be included in operator's manual**

Subject	Reference	Clause
access systems	ISO 2867:2011, <i>Earth-moving machinery — Access systems</i>	4.1.3
		4.1.8
		4.1.11
		4.1.12
		4.1.14
		6.4
		B.5
	ISO 14122-4:2016, <i>Safety of machinery — Permanent means of access to machinery — Part 4: Fixed ladders</i>	7.1
		7.2
