

Clay geosynthetic barriers (GBR-C) - Determination of water absorption of bentonite (ISO 10769:2011)

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN ISO 10769:2011 sisaldb Euroopa standardi EN ISO 10769:2011 ingliskeelset teksti.	This Estonian standard EVS-EN ISO 10769:2011 consists of the English text of the European standard EN ISO 10769:2011.
Standard on kinnitatud Eesti Standardikeskuse 30.06.2011 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.	This standard is ratified with the order of Estonian Centre for Standardisation dated 30.06.2011 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.
Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kätesaadavaks tegemise kuupäev on 01.06.2000.	Date of Availability of the European standard text 01.06.2000.
Standard on kätesaadav Eesti standardiorganisatsionist.	The standard is available from Estonian standardisation organisation.

NORME EUROPÉENNE

EUROPÄISCHE NORM

June 2011

ICS 59.080.70

English Version

Clay geosynthetic barriers - Determination of water absorption of bentonite (ISO 10769:2011)

Géosynthétiques bentonitiques - Détermination de l'absorption d'eau par la bentonite (ISO 10769:2011)

Geosynthetische Tondichtungsbahnen (GBR-C) - Bestimmung der Wasseraufnahme von Bentonit (ISO 10769:2011)

This European Standard was approved by CEN on 31 May 2011.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN ISO 10769:2011) has been prepared by Technical Committee ISO/TC 221 "Geosynthetics" in collaboration with Technical Committee CEN/TC 189 "Geosynthetics" the secretariat of which is held by NBN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2011, and conflicting national standards shall be withdrawn at the latest by December 2011.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of ISO 10769:2011 has been approved by CEN as a EN ISO 10769:2011 without any modification.

Clay geosynthetic barriers — Determination of water absorption of bentonite

1 Scope

This International Standard specifies a method for determining the water absorption of bentonite. The bentonite component is a part of clay geosynthetic barriers (GBR-C). Water absorption depends on the specific surface of the fine particles and the surface activity of the bentonite. The test provides an index value for production control testing of GBR-C.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3310-1, *Test sieves — Technical requirements and testing — Part 1: Test sieves of metal wire cloth*

ISO 4793:1980, *Laboratory sintered (fritted) filters — Porosity grading, classification and designation*

ISO 11465, *Soil quality — Determination of dry matter and water content on a mass basis — Gravimetric method*

DIN 18132, *Soil, testing procedures and testing equipment — Determination of water absorption*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1

water absorption

w_A

ratio of the mass of water, m_{wg} , absorbed by the dry bentonite specimen in the test apparatus to the dry mass, m_d , of the bentonite specimen

NOTE 1 $w_A = \frac{m_{wg}}{m_d}$

where m_{wg} is the limiting value of the absorbed water absorbed over the test period.

NOTE 2 The result may also be expressed as the proportion by mass, in %.
