Non-destructive testing of steel tubes —

Part 6:

Radiographic testing of the weld seam of welded steel tubes for the detection of imperfections

1 Scope

This part of ISO 10893 specifies requirements for film-based radiographic X-ray testing of the longitudinal or helical weld seams of automated fusion arc-welded steel tubes for the detection of imperfections.

It can also be applicable to the testing of circular hollow sections.

NOTE As an alternative, see ISO 10893-7 for digital radiographic testing.
