Animal feeding stuffs: Methods of sampling and analysis - Determination of the radionuclides lodine-131, Caesium-134 and Caesium-137 in feed

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN 17462:2021 sisaldab Euroopa standardi EN 17462:2021 ingliskeelset teksti.

This Estonian standard EVS-EN 17462:2021 consists of the English text of the European standard EN 17462:2021.

Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.

This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation and Accreditation.

Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 14.04.2021.

Date of Availability of the European standard is 14.04.2021.

Standard on kättesaadav Eesti Standardimis- ja Akrediteerimiskeskusest.

The standard is available from the Estonian Centre for Standardisation and Accreditation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile <u>standardiosakond@evs.ee</u>.

EUROPEAN STANDARD NORME EUROPÉENNE

EUROPÄISCHE NORM

EN 17462

April 2021

ICS 65.120

English Version

Animal feeding stuffs: Methods of sampling and analysis - Determination of the radionuclides Iodine-131, Caesium-134 and Caesium-137 in feed

Aliments des animaux : Méthodes d'échantillonnage et d'analyse - Détermination des radionucléides iode 131, césium 134 et césium 137 dans les matières premières et aliments composés pour animaux Futtermittel: Probenahme- und
Untersuchungsverfahren - Bestimmung der
Radionuklide Jod-131, Cäsium-134 und Cäsium-137 in
Futtermittel

This European Standard was approved by CEN on 22 February 2021.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 17462:2021) has been prepared by Technical Committee CEN/TC 327 "Animal feeding stuffs - Methods of sampling and analysis", the secretariat of which is held by NEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2021, and conflicting national standards shall be withdrawn at the latest by October 2021.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a standardization request given to CEN by the European Commission and the European Free Trade Association.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, arg, pvakia, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

This document describes a method for ¹³¹I, ¹³⁴Cs and ¹³⁷Cs massic activity determination (Bq/kg) in animal feeding stuffs. It was initiated by Directorate General for Health and Food Safety (DG SANTE) of the European Commission following the accident in the Fukushima Daiichi nuclear power plant in March 2011. The event highlighted the need for standardized measurements of the three most common radioactive contaminants following such type of nuclear accident.

The most commonly used method for identification and quantification of these radionuclides in animal feeding stuffs samples is high-resolution gamma-ray spectrometry. As this is a secondary measurement cy calit.
s describe. method based on analysis of photopeaks of the emitted gamma rays, care should be taken to use appropriate energy and efficiency calibrations for the detector and test portion used. This method of massic activity determination is described in the present document.

1 Scope

This document describes a method for determination of the massic activity (Bq/kg) of 131 I, 134 Cs and 137 Cs in animal feeding stuffs in monitoring laboratories.

General guidance on the preparation of feed samples and the measurement of the three radionuclides ¹³¹I, ¹³⁴Cs and ¹³⁷Cs by high resolution gamma-ray spectrometry is provided. The current document aims to be complementary to existing standards. More information on sample preparation, moisture content determination and gamma-ray spectrometry can be found in specific standards referred to in this document. For example, generic advice on the equipment selection, detectors and quality assurance for gamma-ray spectrometry can be found in ISO 20042 [4].

The method was fully statistically tested and evaluated in a collaborative trial comprising five animal feeding stuff samples for the radionuclides ¹³¹I, ¹³⁴Cs and ¹³⁷Cs. Details on the successfully tested working range for each of the examined radionuclides are described in Annex C.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the cited edition applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN ISO 662, Animal and vegetable fats and oils — Determination of moisture and volatile matter content (ISO 662)

EN ISO 665, Oilseeds — Determination of moisture and volatile matter content (ISO 665)

EN ISO 712, Cereals and cereal products — Determination of moisture content — Reference method (ISO 712)

EN ISO 6497, *Animal feeding stuffs* — *Sampling (ISO 6497)*

EN ISO 6540, Maize — Determination of moisture content (on milled grains and on whole grains) (ISO 6540)

EN ISO 11929-1:2019, Determination of the characteristic limits (decision threshold, detection limit and limits of the coverage interval) for measurements of ionizing radiation — Fundamentals and application — Part 1: Elementary applications (ISO 11929-1)

ISO 771, Oilseed residues - Determination of moisture and volatile matter content

ISO 6496, Animal feeding stuffs — Determination of moisture and other volatile matter content

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN ISO 6497 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:
