About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC online collection - oc.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC online collection - oc.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD.....	6
1 Scope.....	8
2 Normative references	8
3 Terms and definitions	8
4 List of measurements	12
4.1 Dimensions and mass	12
4.2 Cooking zones and cooking areas.....	12
4.3 Cleaning	12
5 General conditions for the measurements.....	12
5.1 Test room	12
5.2 Electricity supply	12
5.3 Instrumentation and measurements	13
5.4 Positioning the appliance	14
5.5 Initial conditions.....	14
5.6 Cookware	14
5.6.1 Standardized cookware	14
5.6.2 Alternative cookware	19
6 Dimensions and mass.....	20
6.1 Overall dimensions	20
6.2 Mass of the appliance	22
6.3 Cooking zones and cooking areas.....	22
6.3.1 Number of cooking zones per hob.....	22
6.3.2 Dimensions of cooking zones	22
6.3.3 Dimensions of cooking areas	23
6.4 Level of solid hotplates	23
6.5 Distance between cooking zones	24
7 Energy consumption and heating up time	24
7.1 General.....	24
7.2 Purpose	24
7.3 Determine a cookware set to assess a hob with cooking zones.....	24
7.4 Positioning the cookware on a cooking zone	25
7.5 Procedure for measuring the energy consumption of a cooking process.....	26
7.5.1 Preparation.....	26
7.5.2 Preliminary measurements	26
7.5.3 Measuring the energy consumption	28
7.5.4 Evaluation and calculation	29
7.6 Procedure for measuring the heating up time	30
8 Ability to control the temperature of a load.....	31
8.1 Lower control position.....	31
8.1.1 Purpose	31
8.1.2 Cookware, positioning and ingredients.....	31
8.1.3 Procedure.....	31
8.1.4 Assessment.....	32
8.2 Temperature overshoot of hotplates.....	32
8.2.1 Purpose	32

8.2.2	Ingredients and cookware	32
8.2.3	Procedure	32
8.2.4	Assessment	33
9	Heat distribution and heat supply	33
9.1	Measuring the heat distribution	33
9.1.1	Test purpose	33
9.1.2	Discs	33
9.1.3	Pre-test for determining the setting	34
9.1.4	Preparation of the disc for the main test	35
9.1.5	Main test	36
9.1.6	Assessment	36
9.2	Measuring the Continuous frying	40
9.2.1	Purpose	40
9.2.2	Specification of the frying pan	40
9.2.3	Recipe for pancakes	40
9.2.4	Procedure	40
9.2.5	Assessment	40
9.2.1	Purpose	42
9.2.2	Specification of the frying pan	42
9.2.3	Recipe and amounts	43
9.2.4	Pre-test	44
9.2.5	Main test	44
9.2.6	Assessment	45
10	Heat performance of cooking zones	46
10.1	Purpose	46
10.2	Procedure	47
11	Smallest detected diameter for induction cooking zones	48
11.1	Purpose	48
11.2	Procedure	48
12	Power measurement of low power modes	49
13	Spillage capacity of hobs	50
Annex A (normative) Further requirements for measuring the energy consumption and heating up time for cooking areas		51
A.1	General	51
A.2	Hob with cooking area	51
A.2.1	General	51
A.2.2	Cooking area without limitative marking	51
A.2.3	Hob with cooking area with limitative marking	52
A.2.4	Hob with cooking zones and cooking areas	53
A.3	Positioning on a cooking area	53
A.3.1	General	53
A.3.2	Positioning on a cooking area without limitative markings	53
A.3.3	Positioning on a cooking area with limitative markings	54
Annex B (informative) Aids for measuring the energy consumption according to Clause 7		58
B.1	Fixing the temperature measurement instrument to the lid – Example	58
B.2	Marking the lowest possible simmering power setting	58
Annex C (informative) Examples how to select and position the cookware for measurements according to Clause 7 and Annex A		60

C.1	Example 1 – Cooking zones.....	60
C.2	Example 2 – cooking zones combined with cooking area with limitative markings.....	61
C.3	Example 3 – cooking area with limitative markings > 3 controls with the area of control in front.....	64
C.4	Example 4 – cooking area with limitative markings > 3 controls with the area of control at the side	67
Annex D	(normative) Shade chart	70
Annex E	(informative) Data and calculation sheet: energy consumption of a cooking process (see Clause 7 and Annex A)	72
Annex F	(informative) Addresses of suppliers	73
F.1	General.....	73
F.2	Disc material (C45) for measuring the smallest detected diameter	73
F.3	Stainless steel for bottom material of the standardized cookware.....	73
F.4	Cookware for measuring the energy consumption and heating up time.....	73
F.5	Disc for measuring the heat distribution	73
F.6	Lamp for digital measurement systems	73
F.7	Digital measurement system	74
F.8	Testcharts for checking the resolution of the imaging system	74
Annex G	(informative) Example for assessing the lower control position	75
G.1	General.....	75
G.2	Criteria.....	75
Annex H	(informative) Pre-test for determining the simmering setting regarding the measurement of energy consumption.....	76
H.1	Purpose	76
H.2	Procedure to determine an adequate simmering setting	76
Bibliography		78
Figure 1	– Standardized cookware	19
Figure 2	– Dimensions of appliances.....	21

INTERNATIONAL ELECTROTECHNICAL COMMISSION

HOUSEHOLD ELECTRIC COOKING APPLIANCES –

Part 2: Hobs – Methods for measuring performance

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC 60350-2 edition 2.1 contains the second edition (2017-08) [documents 59K/293/FDIS and 59K/294/RVD] and its amendment 1 (2021-05) [documents 59K/329/FDIS and 59K/332/RVD].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

International Standard IEC 60350-2 has been prepared by subcommittee 59K: Performance of household and similar electrical cooking appliances, of IEC technical committee TC 59: Performance of household and similar electrical appliances.

This second edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) terms and definitions revised and new definitions added (see 3);
- b) following the new market trend, requirements related to so-called flexible and free induction zones – in this document named as **cooking areas** – are added;
- c) specification for standardized and alternative cookware is introduced (see 5.6);
- d) measurement procedure reflecting a household-like cooking process for measuring the energy consumption is introduced (see Clause 7 and Annex A);
- e) revision of measurement procedure for determining the accuracy of control (see Clause 8);
- f) new reproducible measurement procedure for assessing the heat distribution (see Clause 9);
- g) additional requirements (according to IEC 62301:2011) on how to measure low-power modes.

In this document, terms in bold characters are defined in Clause 3.

This standard contains attached files in the form of a spreadsheet. These files are intended to be used as a complement and do not form an integral part of the standard.

The French version of this standard has not been voted upon.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60350 series, published under the general title *Household electric cooking appliances*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

HOUSEHOLD ELECTRIC COOKING APPLIANCES –

Part 2: Hobs – Methods for measuring performance

1 Scope

This part of IEC 60350 defines methods for measuring the performance of electric **hobs** for household use.

Appliances covered by this document can be built-in or designed to be placed on a work surface. The **hob** can also be a part of a cooking range.

~~This document does not apply to portable appliances for cooking, grilling and similar functions (see IEC 61817).~~

This document defines the main performance characteristics of **hobs** which are of interest to the user and specifies methods for measuring these characteristics.

This document does not specify a classification or ranking for performance.

NOTE 1 Some of the tests which are specified in this document are not considered to be reproducible since the results can vary between laboratories. They are therefore intended for comparative testing purposes only.

NOTE 2 This document does not deal with safety requirements (IEC 60335-2-6 and IEC 60335-2-9).

NOTE 3 This document is also applicable for portable appliances with similar functionality that were previously covered by the withdrawn IEC 61817.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 62301:2011, *Household electrical appliances – Measurement of standby power*

IEC 60364-5-54, *Low-voltage electrical installations – Part 5-54: Selection and erection of electrical equipment – Earthing arrangements and protective conductors*

ISO 80000-1:2009, *Quantities and units – Part 1: General*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>
