About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC online collection - oc.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC online collection - oc.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Également appelé Vocabulaire Electrotechnique International (IEV) en ligne.

HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

Part 1: Common specifications for alternating current switchgear and controlgear

INTERPRETATION SHEET 1

This interpretation sheet has been prepared by IEC technical committee 17: High-voltage switchgear and controlgear.

The text of this interpretation sheet is based on the following documents:

DISH	Report on voting
17/1090/DISH	17/1095/RVDISH

Full information on the voting for the approval of this interpretation sheet can be found in the report on voting indicated in the above table.

Interpretation of 4.2.2 of IEC 62271-1:2017 regarding the altitude correction factor

Subclause 4.2.2 of IEC 62271-1:2017 contains two references for calculation of the required insulation withstand level at altitudes higher than 1 000 m, IEC 60071-2:1996 and IEC TR 62271-306. The two references are in conflict, as the altitude correction factor according to IEC 60071-2:1996 starts at sea level and that of IEC TR 62271-306 starts at an altitude of 1 000 m. This results in different altitude correction factors.

As already stated in 5.3 of IEC 62271-1:2017, the rated insulation levels refer to normal service conditions. Altitudes up to 1 000 m above sea level are covered and need no altitude correction.

For altitudes higher than 1 000 m the equation provided in 4.5.1.1 b) of IEC TR 62271-306:2012 and in H.3.4 of IEC 60071-2:2018 shall be used, i.e.

$$k_{\text{alt}} = e^{\frac{m(H-1000)}{8150}}$$

where

k_{alt} is the altitude correction factor;
 H is the altitude in m above sea level;
 m is an exponent.

Conservative values for the exponent m are provided in Table 4 of IEC TR 62271-306:2012. For further details about the exponent m , see H.4 of IEC 60071-2:2018.

CONTENTS

FOREWORD.....	8
INTRODUCTION.....	11
1 Scope.....	12
2 Normative references.....	12
3 Terms and definitions	14
3.1 General terms and definitions	15
3.2 Assemblies of switchgear and controlgear	18
3.3 Parts of assemblies.....	18
3.4 Switching devices	18
3.5 Parts of switchgear and controlgear.....	18
3.6 Operational characteristics of switchgear and controlgear	22
3.6.5 Terms and definitions relative to pressure (or density)	23
3.6.6 Terms and definitions relating to gas and vacuum tightness	23
3.6.7 Terms and definitions relating to liquid tightness	25
3.7 Characteristic quantities	25
3.8 Index of definitions	26
4 Normal and special service conditions.....	28
4.1 Normal service conditions	28
4.1.1 General	28
4.1.2 Indoor switchgear and controlgear.....	28
4.1.3 Outdoor switchgear and controlgear	29
4.2 Special service conditions	29
4.2.1 General	29
4.2.2 Altitude	29
4.2.3 Exposure to pollution	30
4.2.4 Temperature and humidity.....	30
4.2.5 Exposure to abnormal vibrations, shock or tilting.....	30
4.2.6 Wind speed.....	31
4.2.7 Other parameters	31
5 Ratings.....	31
5.1 General.....	31
5.2 Rated voltage (U_f).....	31
5.2.1 General	31
5.2.2 Range I for rated voltages of 245 kV and below	31
5.2.3 Range II for rated voltages above 245 kV	32
5.3 Rated insulation level (U_d , U_p , U_s)	32
5.4 Rated frequency (f_r)	36
5.5 Rated continuous current (I_f).....	36
5.6 Rated short-time withstand current (I_k)	36
5.7 Rated peak withstand current (I_p).....	37
5.8 Rated duration of short-circuit (t_k)	37
5.9 Rated supply voltage of auxiliary and control circuits (U_a).....	37
5.9.1 General	37
5.9.2 Rated supply voltage (U_a)	37
5.10 Rated supply frequency of auxiliary and control circuits.....	38
5.11 Rated pressure of compressed gas supply for controlled pressure systems	38

6	Design and construction	39
6.1	Requirements for liquids in switchgear and controlgear	39
6.2	Requirements for gases in switchgear and controlgear	39
6.3	Earthing of switchgear and controlgear	39
6.4	Auxiliary and control equipment and circuits	39
6.4.1	General	39
6.4.2	Protection against electric shock	40
6.4.3	Components installed in enclosures	41
6.5	Dependent power operation	44
6.6	Stored energy operation	44
6.6.1	General	44
6.6.2	Energy storage in gas receivers or hydraulic accumulators	44
6.6.3	Energy storage in springs (or weights)	44
6.6.4	Manual charging	44
6.6.5	Motor charging	45
6.6.6	Energy storage in capacitors	45
6.7	Independent unlatched operation (independent manual or power operation)	45
6.8	Manually operated actuators	45
6.9	Operation of releases	46
6.9.1	General	46
6.9.2	Shunt closing release	46
6.9.3	Shunt opening release	46
6.9.4	Capacitor operation of shunt releases	46
6.9.5	Under-voltage release	46
6.10	Pressure/level indication	46
6.10.1	Gas pressure	46
6.10.2	Liquid level	47
6.11	Nameplates	47
6.11.1	General	47
6.11.2	Application	47
6.12	Locking devices	48
6.13	Position indication	49
6.14	Degrees of protection provided by enclosures	49
6.14.1	General	49
6.14.2	Protection of persons against access to hazardous parts and protection of the equipment against ingress of solid foreign objects (IP coding)	49
6.14.3	Protection against ingress of water (IP coding)	49
6.14.4	Protection against mechanical impact under normal service conditions (IK coding)	49
6.15	Creepage distances for outdoor insulators	49
6.16	Gas and vacuum tightness	50
6.16.1	General	50
6.16.2	Controlled pressure systems for gas	50
6.16.3	Closed pressure systems for gas	50
6.16.4	Sealed pressure systems	50
6.17	Tightness for liquid systems	51
6.17.1	General	51
6.17.2	Leakage rates	51
6.18	Fire hazard (flammability)	51

6.19	Electromagnetic compatibility (EMC).....	51
6.20	X-ray emission	51
6.21	Corrosion.....	51
6.22	Filling levels for insulation, switching and/or operation	52
7	Type tests	52
7.1	General.....	52
7.1.1	Basics	52
7.1.2	Information for identification of test objects	52
7.1.3	Information to be included in type-test reports	52
7.2	Dielectric tests	53
7.2.1	General	53
7.2.2	Ambient air conditions during tests	53
7.2.3	Wet test procedure.....	54
7.2.4	Arrangement of the equipment	54
7.2.5	Criteria to pass the test	54
7.2.6	Application of the test voltage and test conditions	55
7.2.7	Tests of switchgear and controlgear of $U_r \leq 245$ kV	59
7.2.8	Tests of switchgear and controlgear of $U_r > 245$ kV	59
7.2.9	Artificial pollution tests for outdoor insulators.....	60
7.2.10	Partial discharge tests.....	60
7.2.11	Dielectric tests on auxiliary and control circuits.....	60
7.2.12	Voltage test as condition check	60
7.3	Radio interference voltage (RIV) test.....	61
7.4	Resistance measurement	61
7.4.1	Measurement of the resistance of auxiliary contacts class 1 and class 2	61
7.4.2	Measurement of the resistance of auxiliary contacts class 3.....	61
7.4.3	Electrical continuity of earthed metallic parts test.....	61
7.4.4	Resistance measurement of contacts and connections in the main circuit as a condition check	61
7.5	Continuous current tests.....	62
7.5.1	Condition of the test object.....	62
7.5.2	Arrangement of the equipment	62
7.5.3	Test current and duration	63
7.5.4	Temperature measurement during test	64
7.5.5	Resistance of the main circuit.....	65
7.5.6	Criteria to pass test.....	65
7.6	Short-time withstand current and peak withstand current tests	69
7.6.1	General	69
7.6.2	Arrangement of the equipment and of the test circuit.....	69
7.6.3	Test current and duration	70
7.6.4	Conditions of the test object after test.....	71
7.7	Verification of the protection	71
7.7.1	Verification of the IP coding.....	71
7.7.2	Verification of the IK coding.....	71
7.8	Tightness tests.....	72
7.8.1	General	72
7.8.2	Controlled pressure systems for gas	73
7.8.3	Closed pressure systems for gas	73
7.8.4	Sealed pressure systems	74

INTERNATIONAL ELECTROTECHNICAL COMMISSION

HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –**Part 1: Common specifications for alternating current switchgear and controlgear****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC 62271-1 edition 2.1 contains the second edition (2017-07) [documents 17/1033/FDIS and 17/1037/RVD], its interpretation sheet 1 (2021-05) and its amendment 1 (2021-10) [documents 17/1106/FDIS and 17/1112/RVD].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

International Standard IEC 62271-1 has been prepared by technical committee 17: High-voltage switchgear and controlgear.

This second edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

New numbering in accordance with ISO/IEC directives, Part 2 (2016) and IEEE Std. C37.100.1.

4.1.2 a) The normal service condition for indoor switchgear is limited to one range of 40 °C to –5 °C.

4.1.3 a) The normal service condition for outdoor switchgear is limited to one range of 40 °C to –25 °C.

4.2.2: The specifications from IEC 60071-2:1996 are adopted for altitude correction factors above 1 000 m.

5.2.2: Range I, the rated voltage of 40,5 kV is added Series I Table 1; Table 2 and Table 4 are updated on recommendation of the US National Committee.

6.8: New subclause added for manual operated actuators consistent with “Man Machine Interface” recommendations of IEC 60447 [1] 1.

7.2.6.1: Insert the wording regarding preliminary impulses across open vacuum interrupters according to the result of IEC 17/1026/RQ.

7.3: Changed the requirement for radio interference voltage to a rated voltage level of 245 kV and above, instead of 123 kV and above. This change is based on reported positive test and service experience of utility representatives in the maintenance team of this standard.

7.5.6, Table 14:

- a) Introduced the distinction of parts in “OG” (oxidizing gas) or in “NOG” (not oxidizing gas) replacing the former “air” and “SF₆”;
- b) Increased the allowable temperature rise for some parts in groups 1 and 2 of Table 14 according to IEC TR 60943 [2];
- c) Expanded the definition of allowable temperature rise for categories of accessible surfaces with reference to IEC Guide 117 [3]. See also point 15 in 7.5.6.2.

7.5.6.2: Point 5 is modified to clarify the introduction of “OG” and “NOG” gas.

7.10: Some tests were removed because the relevant test standards of IEC 60068 series were modified or withdrawn.

7.11.3: The acceptance criteria for X-radiation testing are modified to recognize higher rated vacuum interrupters.

Former informative Annex H: Corrosion is deleted, the content is part of IEC TR 62271-306 [4].

New Annex J (informative): Added informative guidelines for the extension of validity of type tests

New Annex K (informative): Added informative guidelines about exposure to pollution

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

1 Numbers in square brackets refer to the Bibliography.

The reader's attention is drawn to the fact that Annex I lists all of the "in-some-country" clauses on differing practices of a less permanent nature relating to the subject of this standard.

The list of all parts of the IEC 62271 series under the general title, *High-voltage switchgear and controlgear*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under [webstore.iec.ch](#) in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

In the preparation of this FDIS draft for the general revision of IEC 62271-1:2007 and IEC 62271-1:2007/AMD1:2011, the maintenance team was motivated by the following principles:

- Application of horizontal standards – such application is mandatory for product standards, (reference IEC Guide 108 [5]). A typical example is the application of IEC 60071 (all parts) dealing with insulation coordination.
- Application of the "principle of verifiability" – as defined in the Directives, Part 2, 5.5 (2016) "...Only those requirements which can be verified shall be included.".
- Organizing information in the proper clause, e.g. terms and definitions in Clause 3, rated values in Clause 5. For example, the values of rated continuous current are specified in Clause 5 but the conditions of test and acceptance criteria (e.g. temperature rise limits) are moved to Clause 7.
- Normal service conditions in Clause 4 are unambiguous statements of conditions under which the switchgear and controlgear is expected to operate. For example: "Solar radiation does not exceed a level of 1 000 W/m²" rather than "Solar radiation up to a level of 1 000 W/m² should be considered".
- Ratings in Clause 5 have been limited to reflect the common specifications of the switchgear and controlgear that are specified by the user and are necessary for operation on the user's network. See the last paragraph of 5.1 for addition clarification.
- Statements or informative NOTES that reflect design guides (not requirements) or application (not standard requirements) are either removed or moved to Clause 9.

For example, the following former NOTE contains both a design guide and an application issue, neither of which belongs to normal service conditions:

"Under certain levels of solar radiation, appropriate measures, for example roofing, forced ventilation, test simulating solar gain, etc., may be necessary, or derating may be used, in order not to exceed the specified temperature rises and pressure rise limits".

- Specifications for design and construction in Clause 6 have been limited to requirements that can be verified by test or inspection.
- References to tests and procedures that relate to transportation, installation, commissioning and maintenance have been moved to Clause 11.
- Improve wording to minimize the possibility of miss-interpretation or conflicting interpretations of the specifications, methods or criteria.
- Elimination of hanging paragraphs and actual or potential circular references. Reference to ISO/IEC Directives, Part 2, 22.3.3 (2016).

As a result of the application of these principles or objectives, the FDIS draft includes more revisions that might otherwise be expected.

HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –**Part 1: Common specifications for alternating current switchgear and controlgear****1 Scope**

This part of IEC 62271 applies to AC switchgear and controlgear designed for indoor and/or outdoor installation and for operation at service frequencies up to and including 60 Hz and having rated voltages above 1 000 V.

This document applies to all high-voltage switchgear and controlgear except as otherwise specified in the relevant IEC standards for the particular type of switchgear and controlgear.

NOTE For the use of this document, high-voltage is defined as the rated voltage above 1 000 V. However, the term medium voltage is commonly used for distribution systems with voltages above 1 kV and generally applied up to and including 52 kV.
