

INFORMATSIOON JA DOKUMENTATSIOON
Raamatukogudevahelised laenutustoimingud

Information and documentation
Interlibrary loan transactions
(ISO 18626:2021, identical)

EESTI STANDARDI EESSÕNA**NATIONAL FOREWORD**

See Eesti standard EVS-ISO 18626:2022 sisaldab rahvusvahelise standardi ISO 18626:2021 „Information and documentation. Interlibrary loan transactions“ identset ingliskeelset teksti.	This Estonian Standard EVS-ISO 18626:2022 consists of the identical English text of the International Standard ISO 18626:2021 „Information and documentation. Interlibrary loan transactions“.
Ettepaneku rahvusvahelise standardi ümbertrüki meetodil ülevõtuks on esitanud EVS/TK 22, standardi avaldamist on korraldanud Eesti Standardimis- ja Akrediteerimiskeskus.	Proposal to adopt the International Standard by reprint method has been presented by EVS/TK 22, the Estonian Standard has been published by the Estonian Centre for Standardisation and Accreditation.
Standard EVS-ISO 18626:2022 on jõustunud sellekohase teate avaldamisega EVS Teatajas.	Standard EVS-ISO 18626:2022 has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation and Accreditation.
Standard on kättesaadav Eesti Standardimis- ja Akrediteerimiskeskusest.	This standard is available from the Estonian Centre for Standardisation and Accreditation.

Käsitlusala

See dokument määrab raamatukogudevahelise või raamatukogude ja muude asutuste vahelise laenutustoimingute korra, ühtlustamaks teavikute tellimusi ja järgnevat teabevahetust.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 46, *Information and documentation*, Subcommittee SC 4, *Technical interoperability*.

This third edition cancels and replaces the second edition (ISO 18626:2017), which has been technically revised.

The main changes compared to the previous edition are as follows.

- Several elements have been added to handle identified use cases. As part of this, SentVia has been renamed DeliveryMethod, this element is now used in both the Request and Supplying Agency Messages. This is the only elimination of an element and has been done after consultation with implementers.
- Annex B has been rewritten to clarify the use of open codes.
- Annex D has been changed from including several use cases to one sample use case and a has been linked to additional use cases at the website (see Annex A).
- Annex F has been added with guidelines about the use of profiles with ISO 18626.
- Annex G has been added with guidelines about consortia.
- Annex H has been added with guidelines about handling negotiations using “retry” when the supplier cannot fulfil the first request.
- A RetryInfo section to Supplying Agency Message has been added.

- ServiceInfo/PreferredFormat has been renamed to ServiceInfo/ItemFormat and renamed DeliveryInfo/DeliveredFormat to DeliveryInfo/ItemFormat so that we only need one Open Code list for Formats.
- PhysicalAddress/Region has been changed from StandardCodes to free-text field to bring the PhysicalAddress structure in line with the PhysicalAddress structure used in NCIP (to simplify implementation).
- For requests, the element PreferredEdition has been added. For the purposes of this document, the element AnyEdition has been retained to ensure backward compatibility.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document is intended to succeed the old ISO interlibrary lending protocol (consisting of ISO 10160, ISO 10161-1 and ISO 10161-2). Unlike its predecessors, this document is well suited to the modern, web-based technological environment, which is based on XML and web services. Another important difference between the two standards is that while ISO 10160 is based on an outdated 1980s model of ILL transactions, its successor relies on and supports a modern, much simpler interlibrary loan (ILL) procedure.

This document specifies three simple messages: a Request, a Supplying Library Message and a Requesting Library Message. Implementer experiences gathered from the previous edition of this ILL protocol indicates that it is easier to implement than ISO 10160 and that the functionality provided meets the requirements of libraries' current ILL practices.

This document is the first part of a more general strategic initiative to standardize resource sharing in ISO/TC46/SC4. As part of this intention, the committee has aligned element names, transport and XML schema with similar functions in ANSI/NISO Z39.83^[7].

In the next version of this document, AnyEdition will be deprecated in favour of PreferredEdition. It is recommended to upgrade from AnyEdition to PreferredEdition without unnecessary delay.

For additional information about implementation of this document, see Annex A.

Information and documentation — Interlibrary loan transactions

1 Scope

This document specifies the transactions between libraries or libraries and other agencies to handle requests for library items and the following exchange of messages.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
