# TECHNICAL SPECIFICATION SPÉCIFICATION TECHNIQUE

TECHNISCHE SPEZIFIKATION

**CEN/TS 17791** 

April 2022

ICS 65.080

#### **English Version**

# Inorganic fertilizers - Determination of chelating and complexing agents

Engrais inorganiques - Détermination des agents chélatants et complexants

Anorganische Düngemittel - Bestimmung von Chelatund Komplexbildnern

This Technical Specification (CEN/TS) was approved by CEN on 13 March 2022 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

# European foreword

This document (CEN/TS 17791:2022) has been prepared by Technical Committee CEN/TC 260 "Fertilizers and liming materials" the secretariat of which is held by DIN.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a Standardization Request given to CEN by the European Commission and the European Free Trade Association.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to announce this Technical Specification: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North She was a second of the second Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

### Introduction

Regulation (EU) 2019/1009 [1] lays down the rules on the making available on the market of EU fertilizing products and the specific safety and quality requirements for the defined product function categories (PFCs).

Inorganic fertilizers have been classified into PFC 1(C), which has been divided into two groups PFC 1(C) [I) [inorganic macronutrients fertilizers] and PFC 1(C)(II) [inorganic micronutrient fertilizers].

Micronutrients are considered to be, in plant nutrition, a number of elements known to be needed in small amounts for proper plant growth and development. The most common are Iron (Fe), Manganese (Mn), Molybdenum (Mo), Copper (Cu), Zinc (Zn) and Boron (B).

If an inorganic micronutrient fertilizer contains a substance, or one of the substances in the mixture, which is intended to enhance the long term availability to plants of micronutrients in the EU fertilizing product, that substance is either a chelating agent or a complexing agent.

The specific safety and quality requirements in relation to the determination of chelating and complexing agents in inorganic micronutrient fertilizers (PFC 1(C)(II)) are defined in this document as well as the normative references of the test methods to be used in order to measure the compliance with the related requirement in the Regulation (EU) 2019/1009 [1].

## 1 Scope

This document specifies references to the methods for the determination of specific micronutrients, chelating and complexing agents. The document specifies references to the methods and requirements for inorganic micronutrient fertilizers in accordance with PFC 1 (C) (II) as specified in the Regulation (EU) 2019/1009 [1].

Inorganic micronutrient materials for this purpose are micronutrient salts or oxide and hydroxides, or micronutrient chelates or complexes and mixtures of them, in powder or granular form, aqueous or suspension preparation.

#### 2 Normative references

### 4 Sampling and sample preparation

#### 4.1 Sampling

Samples taken for quality control purposes shall be representative, as described in EN 1482-1:2007.

#### 4.2 Sample preparation

Sample preparation for quality control purposes shall be in accordance with EN 1482-2:2007.

#### 5 Requirements

#### 5.1 General

The requirements for the determination of chelating and complexing agents in inorganic fertilizers according to PFC 1(C)(II) and CMC 1 (component material category 1) of Regulation (EU) 2019/1009 [1] shall be evaluated by using the analytical methods referred to in 5.2 to 5.5 (see Table 1).

#### 5.2 Determination of the fraction of chelated micronutrients

#### 5.2.1 General

Relevant analytical methods for the determination of the fraction of chelated micronutrients in inorganic fertilizers are specified in 5.2.2 and 5.2.3.

# $5.2.2\,$ Determination of the fraction of chelated iron in inorganic micronutrient fertilizers containing UVCB iron chelates

The determination of the fraction of the chelated iron in UVCB (unknown or variable composition, complex reaction products and biological materials) iron chelates shall be determined according to CEN/TS 17786-1:2022.

For compound inorganic fertilizers, CEN/TS 17764:2022 shall be used.
