About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD	13
INTRODUCTION	15
1 Scope	16
2 Normative references	16
3 Terms, definitions and abbreviated terms	17
3.1 Terms and definitions	17
3.2 Abbreviated terms	21
4 General description of SECOM	21
4.1 General	21
4.2 Information service interface	22
4.3 Information security	23
4.3.1 Measures	23
4.3.2 SECOM PKI	23
4.3.3 Communication channel security	24
4.3.4 Data protection	24
4.3.5 Certificate revocation status	26
4.4 Service discoverability	26
4.5 Structure of this document	27
5 SECOM information service interface	27
5.1 General	27
5.2 How to read descriptions of service interface definition	28
5.3 Service technology and service transportation protocol	29
5.4 Service interface versioning	30
5.5 Pagination	30
5.6 Common information objects and data types	30
5.6.1 General	30
5.6.2 Basic data types	31
5.6.3 SECOM_ExchangeMetadataObject	31
5.6.4 Transfer of public key	32
5.6.5 PaginationObject	34
5.6.6 ContainerTypeEnum	35
5.6.7 SECOM_DataProductType	35
5.6.8 SECOM_ResponseCodeEnum	36
5.6.9 AckRequest Enum	36
5.6.10 Common HTTP response codes	37
5.6.11 Well-known text – WKT	37
5.6.12 Universally Unique Identifier – UUID	38
5.6.13 UN/LOCODE	39
5.7 Service interface definitions	39
5.7.1 General	39
5.7.2 Service interface – Upload	40
5.7.3 Service interface – Upload Link	46
5.7.4 Service interface – Acknowledgement	51
5.7.5 Service interface – Get	55
5.7.6 Service interface – Get Summary	60
5.7.7 Service interface – Get By Link	64

5.7.8	Service interface – Access.....	66
5.7.9	Service interface – Access Notification	69
5.7.10	Service interface – Subscription	71
5.7.11	Service interface – Remove Subscription.....	76
5.7.12	Service interface – Subscription Notification	79
5.7.13	Service interface – Capability	81
5.7.14	Service interface – Ping.....	84
5.7.15	Service interface – EncryptionKey	86
5.7.16	Service interface – PublicKey	92
6	SECOM communication channel security.....	96
6.1	General.....	96
6.2	Secure transfer	96
6.2.1	Secure communication channel	96
6.2.2	Authentication procedure	97
7	SECOM data protection.....	97
7.1	General.....	97
7.2	Data compression and packaging	98
7.3	Data authentication and signing	98
7.3.1	General	98
7.3.2	Data formats and standards for digital signatures, keys and certificates	98
7.3.3	Creation of digital signature	99
7.3.4	Creation of envelope signature	100
7.3.5	Verification of digital signature	101
7.3.6	Verification of envelope signature.....	102
7.3.7	Example of commands for data authentication	102
7.4	Data encryption.....	103
7.4.1	General	103
7.4.2	Encryption algorithm	103
7.5	Creation and transfer of encryption key.....	103
7.5.1	General	103
7.5.2	SECOM encryption key management.....	104
7.5.3	Generate encryption key.....	105
7.5.4	Sign the protected encryption key	105
7.5.5	Transfer of the encryption key	105
7.5.6	Example	106
8	SECOM PKI.....	106
8.1	General.....	106
8.2	Scheme	107
8.2.1	General	107
8.2.2	Scheme administrator	107
8.2.3	Data servers	107
8.2.4	Data clients	107
8.2.5	Procedure.....	108
8.3	Generation of public and private key	108
8.4	Certificate signing request	109
8.5	Certificate revocation	109
8.5.1	General	109
8.5.2	CRL – Certificate revocation list.....	109
8.5.3	OCSP – Online certificate status protocol	109

8.6	SECOM PKI service interface	110
8.6.1	General	110
8.6.2	Service interface – CSR	110
8.6.3	Service interface – GetPublicKey.....	113
8.6.4	Service interface – CRL.....	115
8.6.5	Service interface – OCSP	116
8.6.6	Service interface – Revoke	119
9	SECOM service discovery service interface	121
9.1	General.....	121
9.2	Service interface – Search service	121
9.2.1	Specification.....	121
9.2.2	Data exchange model	122
9.2.3	REST design	124
10	SECOM error cases	125
10.1	Error cases	125
10.2	General.....	126
10.3	Message integrity.....	126
10.4	Data integrity	126
10.5	Transport confidentiality.....	126
10.6	Data protection	127
10.7	Service identity	127
10.8	Client identity	127
10.9	Client authorization	128
10.10	Bandwidth optimization	128
10.11	Large message transfer	128
10.12	Closed loop communication	129
10.13	Service discoverability	130
10.14	Information push	130
10.15	Information pull	130
10.16	Subscribe to data	131
10.17	Service information	131
10.18	Service condition	131
11	Test methods and expected results	132
11.1	General.....	132
11.2	Communication channel security test	132
11.3	Data protection test.....	133
11.3.1	Data Compression and packaging.....	133
11.3.2	Data authentication and signature	133
11.3.3	Encryption	133
11.3.4	Digital signature test.....	133
11.4	SECOM ship/shore test.....	133
11.4.1	General	133
11.4.2	Prerequisites SECOM ship/shore EUT	136
11.4.3	Upload data	136
11.4.4	Download data.....	137
11.5	SECOM Information Service test.....	139
11.5.1	General	139
11.5.2	Prerequisites SECOM information service EUT	140
11.5.3	Access.....	140

11.5.4	Access notification.....	141
11.5.5	Acknowledgement.....	141
11.5.6	Capability	142
11.5.7	EncryptionKey	143
11.5.8	EncryptionKey Notification	143
11.5.9	Get	144
11.5.10	Get By Link.....	145
11.5.11	Get Summary	146
11.5.12	Get Public Key.....	147
11.5.13	Upload Public Key	147
11.5.14	Ping	148
11.5.15	Subscription	148
11.5.16	Subscription Notification	149
11.5.17	Remove Subscription.....	149
11.5.18	Upload.....	150
11.5.19	Upload Link	151
11.6	SECOM PKI Service test.....	152
11.6.1	Prerequisites PKI EUT.....	152
11.6.2	CRL	153
11.6.3	OCSP	153
11.6.4	Revoke	154
11.6.5	CSR	154
11.6.6	GetPublicKey.....	154
11.7	SECOM Service Discovery test	155
11.7.1	General	155
11.7.2	Prerequisites Service Discovery EUT.....	155
11.7.3	Search service – By geometry	155
11.7.4	Search service – Without specified search criteria	156
Annex A (normative)	REST service interface definitions	157
A.1	Purpose	157
A.2	SECOM information service REST interface definition	157
A.3	SECOM PKI service REST interface definition	157
A.4	SECOM discovery service REST interface definition	157
Annex B (informative)	Operational use cases and profiles	158
B.1	Purpose	158
B.2	Use cases and service interface profiles	158
B.2.1	UC-1 Ship shares route plan with service providing enhanced monitoring	158
B.2.2	UC-2 Pilot routes	159
B.2.3	UC-3 Route optimization.....	160
B.2.4	UC-4 Enhanced monitoring service requests route plan from/for ship for monitoring	161
B.2.5	UC-5 Discover service instance to consume	162
B.2.6	UC-6 Chart (ENC) updates	163
B.2.7	UC-7 navigational warning service	164
B.2.8	UC-8 Updates for detailed bathymetry and tidal and water level forecasts	166
Annex C (informative)	Message exchange patterns.....	167
C.1	Purpose	167

C.2	Message exchange pattern	167
C.2.1	Generic message exchange patterns	167
C.2.2	Alternative and error sequences	170
Annex D (informative)	Guidance on implementation	171
D.1	Purpose	171
D.2	On ship	172
D.3	On shore	173
D.4	Service composition	174
D.5	Private side security	175
D.6	SECOM PKI	176
D.6.1	General	176
D.6.2	Structure and Functionality	176
D.6.3	Identity management	177
D.6.4	Public Key Infrastructure	180
D.6.5	Authentication and authorization for web services	185
D.6.6	Profile "Basic Requirements"	186
D.7	SECOM service discovery	186
D.7.1	Example 1: geometry combined with serviceType search	186
D.7.2	Example 2: Search with AND/OR condition	188
Annex E (informative)	Use of white list	190
E.1	Purpose	190
E.2	Authorization to access data	190
E.3	Access control list	191
E.4	Authorization based on predefined rules or list	191
E.5	Manually updated list	192
E.6	Rule based handling on request to information (rule based authorization)	192
E.7	Rule based request for information	192
E.8	Procedure when receiving "Not authorized"	192
Annex F (informative)	Test and simulators	193
F.1	Purpose	193
F.2	Manual testing	193
F.3	Ship and shore equipment	193
F.4	SECOM information service equipment	194
F.5	SECOM PKI equipment	194
F.6	SECOM Service Discovery equipment	195

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MARITIME NAVIGATION AND RADIOTRANSFER EQUIPMENT AND SYSTEMS – DATA INTERFACES –

Part 2: Secure communication between ship and shore (SECOM)

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63173-2 has been prepared by IEC technical committee 80: Maritime navigation and radiotransfer equipment and systems. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
80/1030/FDIS	80/1039/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/standardsdev/publications.

A list of all parts in the IEC 63173 series, published under the general *Maritime navigation and radiocommunication equipment and systems – Data interfaces*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

E-navigation has been defined as the means of providing electronic information in a harmonized way, and maritime services have been specified by the International Maritime Organization (IMO). The maritime services are operational services for actors both ashore and onboard. To make the maritime services interoperable between different actors and systems from different manufacturers standards, specifications and guidelines in several layers are required, for example technical services and data/product formats. Technical services comprises a set of technical solutions and communications means to provide a maritime service. IMO's e-navigation strategy implementation plan (SIP) requires that all maritime services are IHO S-100 conformant as a baseline. Further, IEC is expected to implement the details as outlined in the SIP.

Secure communication between ship and shore (SECOM) provides standards for secure data exchange with technical services. Further, it contains a technical service interface design that is in accordance with the service guidelines and templates defined by IALA and partly included in IHO S-100.

SECOM specifies service interfaces (APIs) for data exchange, data protection measures to enable secure communication and interfaces for service discoverability. SECOM is applicable for IHO S-100 based products but also other data (payload) formats are supported, i.e. SECOM is generally independent of which data type is exchanged.

The standardisation of a common service interface for data exchange will enable wider technical interoperability where the same service interface can be used for exchanging information regardless of its operational use.

Accordingly, the purpose of SECOM is to:

- facilitate standardized information exchange of, for example, IHO S-100 based products part of maritime services such as route plans, nautical chart updates and navigational warnings;
- facilitate interoperability between maritime IT systems;
- reduce the need to support many different (proprietary) service designs;
- utilize the benefits of service oriented architecture in maritime communication, for example to enable ship systems to interact with port systems on the first call to a specific port.

MARITIME NAVIGATION AND RADIOTRANSFER EQUIPMENT AND SYSTEMS – DATA INTERFACES –

Part 2: Secure communication between ship and shore (SECOM)

1 Scope

The scope of SECOM includes interfaces (APIs) for data exchange (information services), information security measures to enable secure communication and interfaces for service discoverability. SECOM provides technical interoperability, where the same service interface is used for exchanging the information regardless of its operational use, up to the level of exchanging information securely online. Although designed for IHO S-100 based products, SECOM is technically payload agnostic and applicable also for other types of data.

Communication between SECOM information services for data exchange relies on IP based web services. The "last mile" links between a SECOM information service and the end-user application is not defined in this document, thus the communication technology between the vendor API and a ship/shore system can be non-IP based as well as IP based. The informative Annex D describes one such implementation of this. This allows different solutions between the service and shore/ship's system/applications.

SECOM does not define physical layer or link layer for transport of data between SECOM information services, but requires that the transport supports IP communication. SECOM is applicable for both public (governmental) and private (business) services. SECOM is applicable for ship-shore and shore-ship communication, and can be used for ship-ship communication.

3 Terms, definitions and abbreviated terms

For the purposes of this document the following terms, definitions and abbreviated terms apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1 Terms and definitions

3.1.1

access control

access authorization and access restriction

Note 1 to entry: Access control refers to all the steps that are taken to selectively authorize and restrict entry, contact, or use of assets. Access authorizations and restrictions are often established in accordance with business and security requirements.

[SOURCE: ISO/IEC 27000:2018, 3.1, modified – The definition has been rephrased, and a note to entry added.]

3.1.2

actor

role played by a user or any other system that interacts with the subject

[SOURCE: Unified Modeling Language:2017, 18.2.1.1]

3.1.3

authentication

process to confirm that a claimed characteristic of an entity is actually correct

Note 1 to entry: To authenticate is to verify that a characteristic or attribute that appears to be true is in fact true.

[SOURCE: ISO/IEC 27000:2018, 3.5, modified – The definition has been reformulated, and the note to entry added.]

3.1.4

authentication data

information used to verify the claimed identity of an entity, such as an individual, defined role, corporation or institution

[SOURCE: ISO 21188:2018, 3.4]

3.1.5

authorization

granting of rights, which includes the granting of access based on access rights

[SOURCE: ISO 7498-2:1989, 3.3.10]
