Facility management - Development of a facility
management policy (ISO 41018:2022)

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN ISO 41018:2022 sisaldab Euroopa standardi EN ISO 41018:2022 ingliskeelset teksti.	This Estonian standard EVS-EN ISO 41018:2022 consists of the English text of the European standard EN ISO 41018:2022.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation and Accreditation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 03.08.2022.	Date of Availability of the European standard is 03.08.2022.
Standard on kättesaadav Eesti Standardimis-ja Akrediteerimiskeskusest.	The standard is available from the Estonian Centre for Standardisation and Accreditation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

English Version

Facility management - Development of a facility
management policy (ISO 41018:2022)

Facility management - Élaboration d'une politique de
facility management (ISO 41018:2022)

Facility Management - Entwicklung einer Facility-
Management-Politik (ISO 41018:2022)

This European Standard was approved by CEN on 15 July 2022.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

This document (EN ISO 41018:2022) has been prepared by Technical Committee ISO/TC 267 "Facility management" in collaboration with Technical Committee CEN/TC 348 "Facility Management" the secretariat of which is held by SN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2023, and conflicting national standards shall be withdrawn at the latest by February 2023.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national standards body/national committee. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Endorsement notice

The text of ISO 41018:2022 has been approved by CEN as EN ISO 41018:2022 without any modification.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 267, *Facility management*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 348, *Facility Management*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

0.1 General

Facility management (FM) integrates multiple disciplines in order to have an influence on the efficiency and productivity of economies of organizations, societies and communities, as well as the manner in which individuals interact with the built environment. FM affects the safety, well-being and quality of life of much of the world's societies and population through the services it manages and delivers (see ISO 41001).

This document makes reference to the demand organization and to the organization responsible for FM and facility services. A distinction is necessary because of the variable nature in which FM is organized and where facility services are delivered through personnel within the demand organization, through external service providers or a combination of the two.

The guidance in this document applies principally to the FM organization. In situations where there is presently no formal FM organization, a person (or body) should be appointed to take an active role in developing the FM policy. Unless otherwise stated in this document, "organization" refers to the FM organization.

ISO 41001 makes reference to an FM policy in the context of an FM system.

The benefits of developing an FM policy include:

- a framework for setting FM objectives;
- support for the management of risk;
- a commitment to the continual improvement of the FM system;
- leadership and commitment by top management or an agent of the demand organization to the operation of the FM system;
- reduced likelihood of a disconnect between the FM strategy and operational FM requirements;
- improved efficiency in the provision of FM in general and in the delivery of facility services in particular;
- a commitment to the protection of people, property and the environment;
- strengthening of related policies of the demand organization.

In a hierarchy of decision-making and actions, the FM policy is positioned between the FM strategy and operational plans. The FM policy is derived from the FM system, which is all-encompassing in its scope although not in terms of detailed requirements or recommendations.

This document is intended to complement the current provision of guidance on FM policy in the context of the FM system (see ISO 41001). The aim is to promote awareness, competence development and expertise by providing advice on those decisions that affect the management of the facility and the delivery of facility services.

Specifically, this document is applicable to any organization that wishes to:

- utilize a methodology for developing an FM policy;
- assure itself of the alignment of the FM policy with the FM strategy (see ISO 41014);
- provide a framework for setting FM objectives and operational FM requirements.

This document provides guidance for internal or external audit programmes. Users of this document can compare practices for developing an FM policy with an internationally recognized benchmark, providing sound principles for the effective management of those practices.

0.2 Process approach

This document provides a common basis for understanding the factors that the organization should consider when developing an FM policy. It promotes a methodology to assist the organization in determining the most appropriate approach to, and arrangements for, the development of an FM policy as a basis for the implementation of operational FM requirements to support the demand organization's core business, primarily its business activities.

This document emphasizes the decisions, activities, information, data and interested parties that have to be coordinated into a manageable process for the development of an FM policy and the stages within it, including:

- defining the FM policy framework (see [Clause 4](#));
- compiling the FM policy (see [Clause 5](#));
- implementing the FM policy (see [Clause 6](#));
- review and revision of the FM policy (see [Clause 7](#)).

The methodology is intended to be scalable, meaning that this document's provisions are applicable to any organization to a greater or lesser extent. As such, the organization can determine which of the provisions apply fully or partially to the development of the FM policy.

Facility management — Development of a facility management policy

1 Scope

This document gives guidance on the development of a facility management (FM) policy when the organization:

- a) intends to establish a framework for setting FM objectives and the effective management of risk;
- b) intends to achieve alignment between the FM strategy and operational FM requirements;
- c) wants to improve the usefulness and benefits provided by the FM system;
- d) aims to meet the needs of interested parties and applicable FM requirements consistently;
- e) aims to be sustainable.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 41011, *Facility management — Vocabulary*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 41011 and the following apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

3.1

acceptance criteria

evidence required for considering that requirements have been fulfilled

[SOURCE: ISO 22263:2008, 2.1]

3.2

after-action review

structured review or debriefing process for analysing an event, capturing lessons learned and identifying opportunities for improvement

3.3

facility management policy

FM policy

course or principle of action adopted or proposed that is intended to achieve defined outcomes

Note 1 to entry: Example principles include net zero carbon operations, workplace well-being, zero incidents and minimal whole-life cost.
