EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN IEC 55015:2019+A11:2020 sisaldab Euroopa standardi EN IEC 55015:2019 ja selle muudatuse A11:2020 ingliskeelset teksti.	This Estonian standard EVS-EN IEC 55015:2019+A11:2020 consists of the English text of the European standard EN IEC 55015:2019 and its amendment A11:2020.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas. Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 30.08.2019, muudatus A11 06.03.2020.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation and Accreditation. Date of Availability of the European standard is 30.08.2019, for A11 06.03.2020.
Muudatusega A11 lisatud või muudetud teksti algus ja lõpp on tekstis tähistatud sümbolitega A11 A11 . Standard on kättesaadav Eesti Standardimis- ja Akrediteerimiskeskusest.	The start and finish of text introduced or altered by amendment A11 is indicated in the text by tags A11 A11 . The standard is available from the Estonian Centre for Standardisation and Accreditation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

EUROPEAN STANDARD

EN IEC 55015 + A11

NORME EUROPÉENNE

EUROPÄISCHE NORM

August 2019, March 2020

ICS 33.100.10

Supersedes EN 55015:2013 and all of its amendments
and corrigenda (if any)

English Version

**Limits and methods of measurement of radio disturbance
characteristics of electrical lighting and similar equipment
(CISPR 15:2018)**

Limites et méthodes de mesure des perturbations
radioélectriques produites par les appareils électriques
d'éclairage et les appareils analogues
(CISPR 15:2018)

Grenzwerte und Messverfahren für Funkstörungen von
elektrischen Beleuchtungseinrichtungen und ähnlichen
Elektrogeräten
(CISPR 15:2018)

This European Standard was approved by CENELEC on 2018-06-19. Amendment A11 was approved by CENELEC on 2019-11-27. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard and its amendment the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard and its Amendment A11 exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

The text of document CIS/F/733/FDIS, future edition 9 of CISPR 15, prepared by CISPR SC F "Interference relating to household appliances tools, lighting equipment and similar apparatus" of CISPR "International special committee on radio interference" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 55015:2019.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2020-02-29
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2022-08-30

This document supersedes EN 55015:2013 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CENELEC by the European Commission and the European Free Trade Association.

Endorsement notice

The text of the International Standard CISPR 15:2018 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

CISPR/TR 16-4-3:2004	NOTE	Harmonized as EN 55016-4-3 (not modified) ¹
IEC 60155:1993	NOTE	Harmonized as EN 60155:1995 (not modified)
IEC 60155:1993/A1:1995	NOTE	Harmonized as EN 60155:1995/A1:1995 (not modified)
IEC 60155:1993/A2:2006	NOTE	Harmonized as EN 60155:1995/A2:2007 (not modified)
IEC 61000-6-3:2006	NOTE	Harmonized as EN 61000-6-3:2007 (not modified)
IEC 61000-6-3:2006/A1:2010	NOTE	Harmonized as EN 61000-6-3:2007/A1:2011 (not modified)
IEC 61347-1:2015	NOTE	Harmonized as EN 61347-1:2015 (not modified)
IEC 62776:2014	NOTE	Harmonized as EN 62776:2015 (not modified)

¹ To be published. Stage at the time of publication: prEN 55016-4-3:2018.

A11 Amendment A11 European foreword

This document (EN IEC 55015:2019/A11:2020) has been prepared by CLC/TC 210 "Electromagnetic Compatibility (EMC)".

The following dates are fixed:

- latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2020-11-27
- latest date by which the national standards conflicting with this document have to be withdrawn (dow) 2022-11-27

This document amends EN IEC 55015:2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CENELEC by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For the relationship with EU Directive(s) see informative Annex ZZ, which is an integral part of this document. **A11**

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 21 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 21 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

FOREWORD	7
1 Scope	9
2 Normative references	10
3 Terms, definitions and abbreviated terms	11
3.1 General.....	11
3.2 General terms and definitions	11
3.3 Terms and definitions related to equipment.....	12
3.4 Terms and definitions related to interfaces and ports	16
3.5 Abbreviated terms.....	18
4 Limits	20
4.1 General.....	20
4.2 Frequency ranges	20
4.3 Limits and methods for the assessment of wired network ports	21
4.3.1 Electric power supply interface	21
4.3.2 Wired network interfaces other than power supply	21
4.4 Limits and methods for the assessment of local wired ports	22
4.5 Limits and methods for the assessment of the enclosure port	23
4.5.1 General	23
4.5.2 Frequency range 9 kHz to 30 MHz	23
4.5.3 Frequency range 30 MHz to 1 GHz	24
5 Application of the limits.....	25
5.1 General.....	25
5.2 Identification of the interfaces subject to test	25
5.3 Application of limits to the interfaces	26
5.3.1 General	26
5.3.2 Conducted disturbance requirements for the wired network port	26
5.3.3 Conducted disturbance requirements for local wired ports	26
5.3.4 Radiated disturbance requirements for the enclosure port	27
5.3.5 Multiple interfaces of the same type.....	27
5.3.6 Interfaces that can be categorised as multiple types of ports	27
6 Product specific limit application requirements.....	28
6.1 General.....	28
6.2 Passive EUT	28
6.3 Rope lights	28
6.3.1 General	28
6.3.2 Requirements for rope lights.....	28
6.4 Modules.....	29
6.4.1 General	29
6.4.2 Modules having multiple applications	29
6.4.3 Internal modules	29
6.4.4 External modules	30
6.4.5 Single capped self-ballasted lamps.....	30
6.4.6 Double-capped self-ballasted lamps, double-capped lamp adapters, double-capped semi-luminaires and double-capped retrofit lamps used in fluorescent lamp luminaires	30
6.4.7 ELV lamps	30

6.4.8	Single-capped semi-luminaires	30
6.4.9	Independent igniters	31
6.4.10	Replaceable starters for fluorescent lamps	31
7	Operating and test conditions of the EUT	31
7.1	General.....	31
7.2	Switching	31
7.3	Supply voltage and frequency	31
7.4	Rated lamp load and light regulation	32
7.5	Operating modes	32
7.6	Ambient conditions.....	32
7.7	Lamps.....	32
7.7.1	Type of lamps used in lighting equipment	32
7.7.2	Ageing times.....	32
7.8	Stabilization times.....	32
7.9	Operation and loading of wired interfaces	33
7.9.1	General	33
7.9.2	Interface intended for a continuous signal or data transmission	33
7.9.3	Interface not intended for a continuous signal or data transmission	33
7.9.4	Load	33
8	Methods of measurement of conducted disturbances	33
8.1	General.....	33
8.2	Measurement instrumentation and methods	33
8.3	Electrical power supply interface disturbance measurement.....	34
8.4	Disturbance measurement of wired network interfaces other than power supply.....	34
8.5	Local wired port disturbance measurement	35
8.5.1	Electrical power supply of ELV lamps	35
8.5.2	Other than electrical power supply of ELV lamps	35
9	Methods of measurement of radiated disturbances	35
9.1	General.....	35
9.2	Intentional wireless transmitters.....	36
9.3	Measurement instrumentation and methods	36
9.3.1	General	36
9.3.2	LLAS radiated disturbance measurement 9 kHz to 30 MHz	36
9.3.3	Loop antenna radiated disturbance measurement 9 kHz to 30 MHz	37
9.3.4	Radiated disturbance measurement 30 MHz to 1 GHz	37
10	Compliance with this document	38
11	Measurement uncertainty	38
12	Test report.....	38
Annex A (normative) Product specific application notes referring to particular measurement set-ups or operating conditions		43
A.1	Single-capped self-ballasted lamps	43
A.1.1	Arrangement for conducted disturbance measurements	43
A.1.2	Arrangement for radiated disturbance measurements	43
A.2	Semi-luminaires	43
A.3	Rope lights	43
A.3.1	Preparation of the EUT	43
A.3.2	Arrangement for conducted disturbance measurements	44

A.3.3	Arrangement for radiated disturbance measurements	44
A.4	Double-capped lamp adapters, double-capped self-ballasted lamps, double-capped semi-luminaires and double-capped retrofit lamps used in fluorescent lamp luminaires	44
A.4.1	For application in linear luminaires with electromagnetic controlgear	44
A.4.2	For application in linear luminaires with electronic controlgear	44
A.4.3	For application in other than linear luminaires	44
A.4.4	Measurement methods	44
A.5	ELV lamps	45
A.5.1	Conducted disturbance test	45
A.5.2	Radiated disturbance tests	45
A.6	Independent igniters	45
Annex B (normative)	Test arrangements for conducted disturbance measurements	52
B.1	General.....	52
B.2	Arrangement of cables connected to interfaces of wired network ports	52
B.2.1	Arrangements of electric power supply cables	52
B.2.2	Arrangement of other than electric power supply cables	52
B.3	Arrangement of cables connected to interfaces of local wired ports	53
B.3.1	General	53
B.3.2	Cables of local-wired ports indirectly connected to a network	53
B.3.3	Cables of local-wired ports other than the type mentioned in B.3.2	53
B.3.4	Power-supply cables of an ELV lamp	54
B.3.5	Arrangement of measurement probes	54
B.4	Loading and termination of cables.....	54
B.5	Luminaires	54
B.6	Modules	55
Annex C (normative)	Test arrangements for radiated disturbance measurements	59
C.1	General.....	59
C.2	Arrangements of electric power supply cables.....	59
C.3	Arrangement of cables other than electric power supply cables.....	59
C.4	Arrangements of EUT, auxiliary equipment and associated equipment.....	59
C.4.1	General	59
C.4.2	EUT arrangements for table-top, wall-mounted or ceiling-mounted applications	59
C.4.3	EUT arrangements for floor-standing and pole-mounted applications.....	59
C.5	Loading and termination of cables.....	59
Annex D (informative)	Examples of application of limits and test methods.....	63
D.1	General.....	63
D.2	Case 1: Power controlgear with remote battery connection	63
D.2.1	EUT description	63
D.2.2	Interfaces, ports and limits.....	63
D.3	Case 2: Universal presence and light detector	64
D.3.1	EUT description	64
D.3.2	Interfaces, ports and limits.....	64
D.4	Case 3: Driver with three load interfaces	66
D.4.1	EUT description	66
D.4.2	Interfaces, ports and limits.....	66
D.5	Case 4: Ethernet powered OLED	68
D.5.1	EUT description	68

D.5.2	Interfaces, ports and limits.....	68
D.6	Case 5: Stand-alone occupancy-daylight sensor	68
D.6.1	EUT description	68
D.6.2	Interfaces, ports and limits.....	69
Annex E (informative)	Statistical considerations in the determination of EMC compliance of mass-produced products	70
E.1	General.....	70
E.2	Test method based on a general margin to the limit	70
E.3	Test method based on the non-central t-distribution	71
E.3.1	Practical implementation by using frequency sub-ranges	71
E.3.2	Frequency sub-ranges	72
E.3.3	Data distortion occurring at a sub-range boundary	73
E.4	Test method based on the binomial distribution.....	73
E.5	Application of larger sample size.....	74
Annex ZA (normative)	Normative references to international publications with their corresponding European publications	75
Annex ZZ (informative)	Relationship between this European standard and the essential requirements of Directive 2014/30/EU [2014 OJ L96] aimed to be covered ^{A11}	77

INTERNATIONAL ELECTROTECHNICAL COMMISSION

INTERNATIONAL SPECIAL COMMITTEE ON RADIO INTERFERENCE

LIMITS AND METHODS OF MEASUREMENT OF RADIO DISTURBANCE CHARACTERISTICS OF ELECTRICAL LIGHTING AND SIMILAR EQUIPMENT

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard CISPR 15 has been prepared by subcommittee CIS/F: Interference relating to household appliances tools, lighting equipment and similar apparatus, of IEC technical committee CISPR: International special committee on radio interference.

This ninth edition cancels and replaces the eighth edition published in 2013 and its Amendment 1:2015. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) full editorial revision and restructuring;
- b) the restriction to mains and battery operation is deleted in the scope;
- c) radiated disturbance limits in the frequency range 300 MHz to 1 GHz have been introduced;
- d) the load terminals limits and the CDNE (alternative to radiated emissions) limits have changed;

- e) deletion of the insertion-loss requirements and the associated Annex A;
- f) introduction of three basic ports: wired network ports, local wired ports and the enclosure port;
- g) introduction of a more technology-independent approach;
- h) replacement of Annex B (CDNE) by appropriate references to CISPR 16-series of standards;
- i) modified requirements for the metal holes of the conical housing;
- j) new conducted disturbance measurement method for GU10 self-ballasted lamp;
- k) addition of current probe measurement method and limits for various types of ports (in addition to voltage limits and measurement methods);
- l) introduction of the term 'module' (instead of independent auxiliary) and requirements for measurement of modules using a host (reference) system;
- m) modified specifications for stabilization times of EUTs;
- n) for large EUT (> 1,6 m), addition of the magnetic field measurement method using a 60 cm loop antenna at 3 m distance (method from CISPR 14-1) as an alternative to the 3 m and 4 m LAS.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
CIS/F/733/FDIS	CIS/F/736/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

LIMITS AND METHODS OF MEASUREMENT OF RADIO DISTURBANCE CHARACTERISTICS OF ELECTRICAL LIGHTING AND SIMILAR EQUIPMENT

1 Scope

This document applies to the emission (radiated and conducted) of radiofrequency disturbances from:

- lighting equipment (3.3.16);
- the lighting part of multi-function equipment where this lighting part is a primary function;

NOTE 1 Examples are lighting equipment with visible-light communication, entertainment lighting.

- UV and IR radiation equipment for residential and non-industrial applications;
- advertising signs;

NOTE 2 Examples are neon tube advertising signs.

- decorative lighting;
- emergency signs.

Excluded from the scope of this document are:

- components or modules intended to be built into lighting equipment and which are not user-replaceable;

NOTE 3 See CISPR 30 (all parts) for built-in controlgear.

- lighting equipment operating in the ISM frequency bands (as defined in Resolution 63 (1979) of the ITU Radio Regulation);
- lighting equipment for aircraft and airfield facilities (runways, service facilities, platforms);
- video signs;
- installations;
- equipment for which the electromagnetic compatibility requirements in the radio-frequency range are explicitly formulated in other CISPR standards, even if they incorporate a built-in lighting function.

NOTE 4 Examples of exclusions are:

- equipment with built-in lighting devices for display back lighting, scale illumination and signaling;
- SSL-displays;
- range hoods, refrigerators, freezers;
- photocopiers, projectors;
- lighting equipment for road vehicles (in scope of CISPR 12).

The frequency range covered is 9 kHz to 400 GHz. No measurements need to be performed at frequencies where no limits are specified in this document.

Multi-function equipment which is subjected simultaneously to different clauses of this document and/or other standards need to meet the provisions of each clause/standard with the relevant functions in operation.

For equipment outside the scope of this document and which includes lighting as a secondary function, there is no need to separately assess the lighting function against this document, provided that the lighting function was operative during the assessment in accordance with the applicable standard.

NOTE 5 Examples of equipment with a secondary lighting function can be range hoods, fans, refrigerators, freezers, ovens and TV with ambient lighting.

The radiated emission requirements in this document are not intended to be applicable to the intentional transmissions from a radio transmitter as defined by the ITU, nor to any spurious emissions related to these intentional transmissions.

Within the remainder of this document, wherever the term "lighting equipment" or "EUT" is used, it is meant to be the electrical lighting and similar equipment falling in the scope of this document as specified in this clause.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Terms, definitions and abbreviated terms

3.1 General

For the purposes of this document, the terms and definitions given in IEC 60050-161, IEC 62504, IEC 60050-845 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.2 General terms and definitions

3.2.1

base of the luminaire

mounting surface of the luminaire in normal use, usually the side opposite of the optical window

3.2.2

clock frequency

fundamental frequency of any signal used in the EUT excluding those generated inside an integrated circuit (IC) and which are solely used inside the same IC without being accessible outside that IC, and excluding those used exclusively for radio transmission or radio receiving functions

² This edition was replaced by ISO/IEC 17025:2017 but the listed edition applies.
