### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

FOREWORD .....	4
INTRODUCTION .....	6
1 Scope .....	7
2 Normative references .....	7
3 Terms and definitions .....	7
4 Assessment of access level .....	12
4.1 General .....	12
4.2 Determination of access level and the use of Condition 2 .....	13
4.3 Access level 1 and 1M .....	14
4.4 Access level 2 and 2M .....	15
4.5 Access level 3R .....	16
4.6 Access level 3B .....	16
4.7 Access level 4 .....	16
4.8 Time base .....	17
5 Classification and evaluation of access level .....	17
5.1 General .....	17
5.2 Impact of using automatic power reduction features .....	18
5.3 Automatic power reduction mechanisms (APR) .....	18
5.3.1 General .....	18
5.3.2 APR performance requirements .....	18
5.4 Installation protection systems (IPS) .....	19
6 Access level and classification requirements by location type .....	19
6.1 General .....	19
6.2 Requirements for unrestricted locations .....	22
6.2.1 General .....	22
6.2.2 Use of access level 1M and access level 2M FSOCS equipment in unrestricted locations .....	24
6.2.3 Use of access level 3R FSOCS equipment in unrestricted locations .....	26
6.2.4 General .....	26
6.2.5 Use of access level 3R FSOCS equipment in restricted locations .....	27
6.3 Requirements for controlled locations .....	28
6.3.1 General .....	28
6.3.2 Use of access level 3B and access level 4 FSOCS equipment in controlled locations .....	29
6.4 Requirements for inaccessible space .....	29
6.5 Specular reflections .....	29
7 Organizational requirements .....	30
7.1 Requirements for manufacturers of ready-to-use FSOCS transmitter or turn key systems .....	30
7.1.1 General .....	30
7.1.2 Additional manufacturer's requirements .....	31
7.2 Installation and service organization requirements .....	32
7.3 Operating organization requirements .....	33
8 Marking .....	33
8.1 General .....	33
8.2 Marking of aperture for transmitter .....	35
8.3 Durability – Indelibility requirements for safety markings .....	35

8.4 Warning for invisible radiation .....	35
Annex A (informative) Rationale.....	36
Annex B (informative) Clarification of the meaning of "access level" .....	37
B.1 General.....	37
B.2 Class .....	37
B.3 Access level.....	37
Annex C (informative) Examples of applications and calculations.....	38
C.1 Symbols used in the example of this annex.....	38
C.2 Examples of NHZ and ENHZ .....	38
C.2.1 General .....	38
C.2.2 Example – Collimated beam access level 1M FSOCS .....	38
C.2.3 Example – Diverging beam access level 1M FSOCS.....	39
C.2.4 Example – Access level 3B FSOCS product .....	39
C.3 Viewing a specular (mirror-like) reflection .....	40
C.4 Example of divergent, diffuse IR transmitter.....	41
C.5 FSOCS link between two restricted locations .....	42
C.6 Unmanned (uncrewed) Aerial (aircraft) system (UAS) .....	45
Annex D (informative) Methods of hazard/safety analysis .....	48
Annex E (informative) Guidance for installing, servicing and operating organizations.....	49
E.1 Working practices for FSOCSs .....	49
E.1.1 General .....	49
E.1.2 General working practices .....	49
E.1.3 Additional working practices for Class/access level 1M, 2M, 3R, 3B and 4 systems .....	50
E.2 Education and training .....	50
Bibliography.....	51
Figure 1 – Commercial structures .....	20
Figure 2 – Residential areas .....	21
Figure 3 – Examples of external location types .....	23
Figure 4 – Access level 1M or 2M transmitter near edge of unrestricted rooftop .....	25
Figure 5 – Access level 1M transmitter in unrestricted location .....	25
Figure 6 – Access level 3R transmitter in restricted location .....	28
Figure C.1 – Link between two widely separated locations .....	42
Figure C.2 – Unmanned (uncrewed) Aerial (aircraft) System with FSOCS .....	45
Figure C.3 – Grounded FSOCS installed to the ground .....	46
Figure C.4 – Grounded FSOCS installed to the controlled location.....	46
Table 1 – Measurement aperture diameters and distances for the default (simplified) evaluation .....	14
Table 2 – Restrictions for the use of FSOCS based on access levels.....	22
Table 3 – Requirements for warning signs .....	32
Table 4 – Marking requirements.....	34
Table C.1 – Symbols used in the example of Annex C .....	38
Table C.2 – Allowed access levels and installation requirements .....	47

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**SAFETY OF LASER PRODUCTS –****Part 12: Safety of free space optical communication systems  
used for transmission of information****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60825-12 has been prepared by IEC technical committee 76: Optical radiation safety and laser equipment. It is an International Standard.

This third edition cancels and replaces the second edition published in 2019. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition.

- a) Where relevant and appropriate, references to IEC 60825-1 have been changed to a specific dated reference i.e. IEC 60825-1:2014.
- b) Condition 2 has been changed from 7 mm aperture stop and 70 mm distance as follows,
  - For wavelengths less than 1 400 nm, 3,5 mm aperture stop and 35 mm distance,
  - For wavelengths equal to or greater than 1 400 nm, 3,5 mm aperture stop and 14 mm distance.

- c) For wavelengths between 1 200 nm and 1 400 nm, an additional limitation is required equal to the equivalent radiant power of the skin MPE. C<sub>7</sub> has therefore been revised in accordance with IEC 60825-1:2014, but with this additional limitation related to the skin MPE; see 4.2.
- d) Additional detail added regarding time base, see 4.8.
- e) Additional clarification added to Clause 8 regarding the content and formatting of labels.
- f) Annex A has been added, providing a rationale for the differences in approach between this document and IEC 60825-1:2014.
- g) Annex B has been added, providing clarification of the meaning of the term "access level".
- h) Worked examples have been added for a variety of scenarios; see Clauses C.2 to C.5.
- i) Clause C.6 has been added on UAS, unmanned aerial systems.

The text of this International Standard is based on the following documents:

Draft	Report on voting
76/717/FDIS	76/722/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/standardsdev/publications](http://www.iec.ch/standardsdev/publications).

The list of all parts of the IEC 60825 series, published under the title *Safety of laser products*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

The objective of this document is to:

- protect people from hazardous optical radiation emitted by FSOCSSs;
- provide safety requirements and guidance for the design, manufacture and use of laser products or laser systems, which emit laser radiation for the purpose of free space optical data transmission;
- provide guidance for installation, operation, maintenance and service to assure the safe deployment and use of such laser systems.

This document only addresses the open beam portion of the laser product or laser system.

This document places the responsibility for certain product safety requirements, as well as requirements for providing appropriate information on how to use these systems safely, on the manufacturer of the system or the transmitters. It places the responsibility for the safe deployment and use of these systems on the installer or the operating organization. It places the responsibility for adherence to safety instructions during installation and service operations on the installation and service organizations as appropriate, and during operation and maintenance functions on the operating organization. It is recognized that the user of this document may fall into one or more of the categories of manufacturer, installer, service organization and/or operating organization as mentioned above.

Annex A gives a more detailed rationale for this document, and some examples are given in Annex C.

## SAFETY OF LASER PRODUCTS –

### **Part 12: Safety of free space optical communication systems used for transmission of information**

#### **1 Scope**

This part of IEC 60825 is applicable to products that emit laser radiation for the purpose of free space optical data transmission.

This document does not apply to laser products designed for the purposes of transmitting optical power for applications such as material processing or medical treatment. This document also does not apply to the use of laser products in explosive atmospheres (see IEC 60079-0). Light-emitting diodes employed by free space optical communication systems, used for the purpose of free space optical data transmission, do not fall into the scope of this document.

**NOTE** If the laser product incorporates an optical fibre that extends from the confinements by a system or enclosed space, the requirements in IEC 60825-2 apply.

#### **2 Normative references**

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60825-1:2014, *Safety of laser products – Part 1: Equipment classification and requirements*

IEC 60825-2, *Safety of laser products – Part 2: Safety of optical fibre communication systems (OFCSSs)*

#### **3 Terms and definitions**

For the purposes of this document, the terms and definitions given in IEC 60825-1:2014 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

##### **3.1**

##### **access level**

potential hazard at any accessible position as a result of the optical emissions from a free space optical communication system (FSOCS) installation

Note 1 to entry: The access level is based on the level of laser radiation which could become accessible in reasonably foreseeable circumstances, e.g. walking into an open beam path. It is closely related to the laser classification procedure in IEC 60825-1. The meaning of access level is clarified in Annex B.

Note 2 to entry: Practically speaking, it takes two or more seconds to fully align an optical aid with a beam (which might occur in an unrestricted location), and this delay is incorporated into the method for determining access level.
