About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Liens utiles:

Recherche de publications CEI - www.iec.ch/searchpub

La recherche avancée vous permet de trouver des publications CEI en utilisant différents critères (numéro de référence, texte, comité d'études,...).

Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Just Published CEI - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications de la CEI. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électriques et électroniques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (VEI) en ligne.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

CONTENTS

FOREWORD	5
INTRODUCTION	7
1 Scope	8
2 Normative references	10
3 Terms and definitions	10
4 General conditions	13
5 Power supply	13
5.1 Alternating current (a.c.) power supply voltages and frequencies	13
5.2 Direct current (d.c.) power supply voltages	13
5.3 Power supply feed for microphones	14
6 Interconnections	14
6.1 Connections	14
6.1.1 General	14
6.1.2 Characteristics of cables	14
6.2 Connectors	15
7 Marking and symbols for marking	16
7.1 Marking	16
7.2 Symbols for marking	16
8 Electrical recommended values	16
8.1 General purpose output/input	16
8.2 General purpose audio output/input	16
8.2.1 Audio-only interfaces for consumer equipment	16
8.2.2 Interfaces for professional equipment and consumer equipment where audio and video signals are present on the same connector or cable	18
8.3 General purpose video input/output	19
9 Interoperability of microphones and amplifiers	19
9.1 Microphones (excluding piezoelectric types)	19
9.2 Power supply feed for electret microphones fed over a signal conductor ("plug-in power")	20
9.3 Power supply feed for electret microphones fed by a separate conductor ("soundcard power" or "PC power")	21
9.4 Phantom supply system	21
9.4.1 General	21
9.4.2 Supply voltage polarity	22
9.4.3 Circuit diagram	22
9.4.4 Value of the supply voltage	22
9.4.5 Supply current	22
9.4.6 Marking	22
9.5 A-B supply system	23
9.5.1 General	23
9.5.2 Output impedance of the microphone	23
9.5.3 Circuit diagram	23
9.5.4 Connection of the power supply to earth	23
9.5.5 Marking	23
9.6 Polarity of the audio frequency voltage	23

10	Interoperability of record-playing units (pick-ups) and amplifiers	26
11	Interoperability of loudspeakers and amplifiers	26
11.1	Single unit loudspeakers	26
11.2	Loudspeaker systems	26
11.2.1	Loudspeakers with built-in amplifier	26
11.2.2	Impedance-defined loudspeaker systems	27
11.2.3	Constant voltage loudspeaker systems	27
11.3	Voltage (or power) interoperability of amplifiers and loudspeakers	27
11.3.1	Overview	27
11.3.2	Interoperability requirements	28
11.4	Polarity of the sound pressure	28
12	Interoperability of headphones and amplifiers	28
12.1	General	28
12.2	Interoperability of headphones with stationary amplifiers	28
12.3	Interoperability of portable audio headphones/earphones and portable audio equipment	29
12.3.1	General	29
12.3.2	Portable audio headphones/earphones	29
12.3.3	Portable audio equipment	29
12.3.4	Recommended values and input/output values for portable audio headphones/earphones and portable audio equipment	29
13	Interoperability of amplifiers with other amplifiers	30
13.1	Pre-amplifiers and power amplifiers for general purpose and sound reinforcement	30
13.2	Broadcast and similar line amplifiers	31
Annex A (informative)	Pairing and screening of conductors	32
Annex B (informative)	Phantom power variants for specialized applications	33

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MULTIMEDIA SYSTEMS –
GUIDE TO THE RECOMMENDED CHARACTERISTICS
OF ANALOGUE INTERFACES TO ACHIEVE INTEROPERABILITY**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61938 has been prepared by IEC technical committee 100: Audio, video and multimedia systems and equipment.

This second edition cancels and replaces the first edition published in 1996 and constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- the main title was changed to: Multimedia systems – Guide to the recommended characteristics of analogue interfaces to achieve interoperability;
- the scope was adapted to the title;
- a new introduction has been added. The necessity of the above revisions is mentioned in this introduction;
- the values in each table were chosen with respect to the state of the art and representative of best practice in industry;

- plug-in power systems and soundcard power systems are added;
- a new subclause 12.3 has been created: Interoperability of portable audio headphones / earphones and portable audio equipment;
- a new Annex A describing pairing and screening of conductors is added;
- a new Annex B describing phantom power variants for specialized applications is also added.

The text of this standard is based on the following documents:

FDIS	Report on voting
100/2130/FDIS	100/2155/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

The first edition of IEC 61938 was derived from IEC 60268-15, IEC 60574-4 and IEC 60933-1 and also from related proposals which had been submitted up until the date of this revision. IEC 60268-15 was the first standard to address 'interoperability' – the ability of equipment from different manufacturers to be assembled into a system with full compatibility at every 'interface'. However, the purpose, terminology and implications of IEC 61938 are now widely misunderstood because the words 'matching' and 'preferred' used in IEC 61938, are frequently misinterpreted, resulting in IEC 61938 being regarded as a performance standard, which was never its intention. The aim of this revision is to make the intention of this standard easily comprehensible by using widely used terminology in the title and text of the standard.

The features of the revision are the following.

- a) Unification and arrangement of existing related standards, including effective proposals which have been submitted.
- b) The concept of "general purpose input/output".

NOTE The standard numbers mentioned above correspond to the revised numbers, if applicable.

**MULTIMEDIA SYSTEMS –
GUIDE TO THE RECOMMENDED CHARACTERISTICS
OF ANALOGUE INTERFACES TO ACHIEVE INTEROPERABILITY**

1 Scope

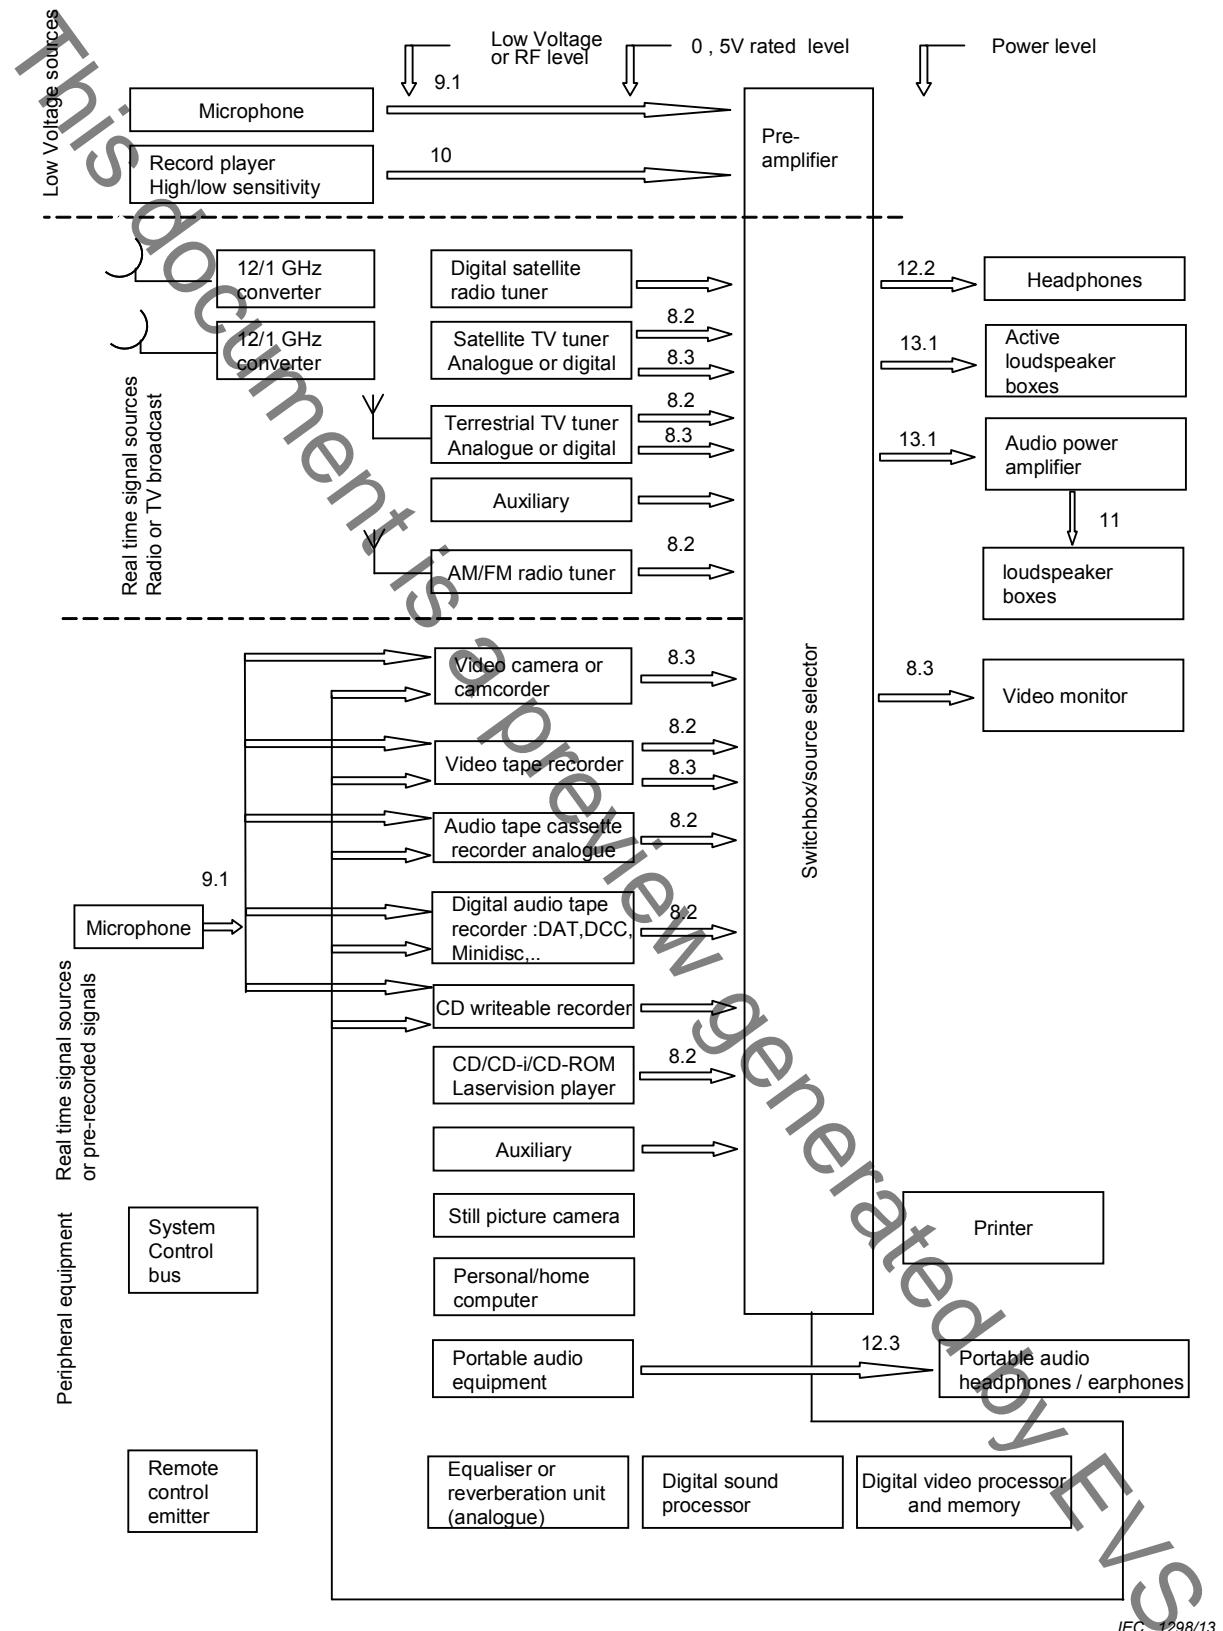

This International Standard gives guidance on current practice for the characteristics of multimedia analogue interfaces to achieve interoperability between equipment from different manufacturers. It is not a performance standard.

Recommendations for interfaces for equipment used in vehicles, and for analogue video interfaces for broadcast and similar equipment, are not given.

Refer to IEC 60958 for the interconnection of digital signals.

Figure 1 shows in a diagram the possible interfaces of the audio and video sources and destinations.

This document is a preview generated by EVS

NOTE The numbers indicated above the arrows refer to the appropriate clause or subclauses of this standard.

Figure 1 – Audio and video sources and destinations

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60038:2009, *IEC standard voltages*

IEC 60094-2:1994, *Magnetic tape recording and reproducing systems – Part 2: Calibration tapes*

IEC 60107-6:1989, *Recommended methods of measurement on receivers for television broadcast transmissions – Part 6: Measurements under conditions different from broadcast signal standards*

IEC 60130-9:2011, *Connectors for frequencies below 3 MHz – Part 9: Circular connectors for radio and associated sound equipment*

IEC 60268-1:1985, *Sound system equipment – Part 1: General*
Amendment 1:1988
Amendment 2:1988

IEC 60268-3:2000, *Sound system equipment – Part 3: Amplifiers*

IEC 60268-5:2003, *Sound system equipment – Part 5: Loudspeakers*
Amendment 1:2007

IEC 60268-7:2010, *Sound system equipment – Part 7: Headphones and earphones*

IEC 60268-11:1987, *Sound system equipment – Part 11: Application of connectors for the interconnection of sound system components*
Amendment 1:1989
Amendment 2:1991

IEC 60268-12:1987, *Sound system equipment – Part 12: Application of connectors for broadcast and similar use*
Amendment 1:1991
Amendment 2:1994

IEC 60603-11:1992, *Connectors for frequencies below 3 MHz for use with printed boards – Part 11: Detail specification for concentric connectors (dimensions for free connectors and fixed connectors)*

IEC 60958 (all parts), *Digital audio interface*

ITU-R BT.1700:2005, *Characteristics of composite video signals for conventional analogue television systems*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.
