## About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

## About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

### Useful links:

IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [csc@iec.ch](mailto:csc@iec.ch).

## A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

## A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

### Liens utiles:

Recherche de publications CEI - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

La recherche avancée vous permet de trouver des publications CEI en utilisant différents critères (numéro de référence, texte, comité d'études,...).

Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Just Published CEI - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications de la CEI. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne au monde de termes électriques et électroniques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (VEI) en ligne.

Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [csc@iec.ch](mailto:csc@iec.ch).

## CONTENTS

FOREWORD .....	5
1 Scope .....	7
2 Normative references .....	7
3 Terms and definitions .....	7
4 Abbreviated terms .....	7
5 Logical node classes .....	8
5.1 Logical node groups .....	8
5.2 Interpretation of logical node tables .....	9
5.3 Summary of logical nodes to be used in hydropower plants .....	11
5.3.1 General .....	11
5.3.2 Group A – Automatic functions .....	11
5.3.3 Group F – Functional blocks .....	11
5.3.4 Group H – Hydropower specific logical nodes .....	11
5.3.5 Group I – Interface and archiving .....	12
5.3.6 Group K – Mechanical and non-electrical primary equipment .....	13
5.3.7 Group P – Protection functions .....	13
5.3.8 Group R – Protection related functions .....	13
5.3.9 Group S – Supervision and monitoring .....	13
5.3.10 Group X – Switchgear .....	13
5.4 Automatic control logical nodes LN group A .....	13
5.4.1 Modelling remarks .....	13
5.4.2 LN: Control mode selection Name: ACTM .....	14
5.4.3 LN: Joint control Name: AJCL .....	14
5.4.4 LN: PSS 4B filter function Name: APSF .....	14
5.4.5 LN: PSS control, common information Name: APSS .....	16
5.4.6 LN: PSS 2A/B filter function Name: APST .....	17
5.5 Functional logical nodes LN Group F .....	17
5.5.1 Modelling remarks .....	17
5.5.2 LN: Functional heartbeat Name: FHBT .....	18
5.5.3 LN: Scheduler Name: FSCH .....	18
5.5.4 LN: Functional priority status Name: FXPS .....	18
5.6 Hydropower specific logical nodes LN group H .....	19
5.6.1 Modelling remarks .....	19
5.6.2 LN: Turbine – generator shaft bearing Name: HBRG .....	19
5.6.3 LN: Combinator Name: HCOM .....	20
5.6.4 LN: Hydropower dam Name: HDAM .....	20
5.6.5 LN: Deflector control Name: HDFL .....	20
5.6.6 LN: Dam leakage supervision Name: HDLS .....	21
5.6.7 LN: Electrical brake Name: HEBR .....	21
5.6.8 LN: Governor control mode Name: HGOV .....	21
5.6.9 LN: Gate position indicator Name: HGPI .....	22
5.6.10 LN: Dam gate Name: HGTE .....	22
5.6.11 LN: Intake gate Name: HITG .....	23
5.6.12 LN: Joint control Name: HJCL .....	23
5.6.13 LN: Leakage supervision Name: HLKG .....	24
5.6.14 LN: Water level indicator Name: HLVL .....	24

5.6.15 LN: Mechanical brake Name: HMBR .....	25
5.6.16 LN: Needle control Name: HNDL .....	25
5.6.17 LN: Water net head data Name: HNHD .....	26
5.6.18 LN: Dam over-topping protection Name: HOTP .....	26
5.6.19 LN: Hydropower / water reservoir Name: HRES .....	27
5.6.20 LN: Hydropower unit sequencer Name: HSEQ .....	27
5.6.21 LN: Speed monitoring Name: HSPD .....	27
5.6.22 LN: Surge shaft Name: HSST .....	28
5.6.23 LN: Guide vanes (wicket gate) Name: HTGV .....	29
5.6.24 LN: Runner blades Name: HTRB .....	29
5.6.25 LN: Trash rack Name: HTRK .....	30
5.6.26 LN: Turbine Name: HTUR .....	30
5.6.27 LN: Hydropower unit Name: HUNT .....	31
5.6.28 LN: Valve (butterfly valve, ball valve) Name: HVLV .....	32
5.6.29 LN: Water control Name: HWCL .....	33
5.7 Logical nodes for interface and archiving LN group I .....	34
5.7.1 Modelling remarks .....	34
5.7.2 LN: Fire detection and alarm Name: IFIR .....	34
5.7.3 LN: Hand interface Name: IHND .....	34
5.8 Logical nodes for mechanical and non-electric primary equipment LN group K .....	35
5.8.1 Modelling remarks .....	35
5.8.2 LN: Heater, cubicle heater Name: KHTR .....	35
5.9 Logical nodes for protection functions LN group P .....	35
5.9.1 Modelling remarks .....	35
5.9.2 LN: Rotor protection Name: PRTR .....	35
5.10 Logical nodes for protection related functions LN group R .....	36
5.10.1 Modelling remarks .....	36
5.10.2 LN: Field breaker configuration Name: RFBC .....	36
5.11 Logical nodes for supervision and monitoring LN group S .....	36
5.11.1 Modelling remarks .....	36
5.11.2 LN: Supervision of media flow Name: SFLW .....	36
5.11.3 LN: Supervision of media level Name: SLVL .....	37
5.11.4 LN: Supervision of the position of a device Name: SPOS .....	38
5.11.5 LN: Supervision media pressure Name: SPRS .....	39
5.12 Logical nodes for switchgear LN group X .....	41
5.12.1 Modelling remarks .....	41
5.12.2 LN: Switching control for field flashing Name: XFFL .....	41
6 Data name semantics .....	41
7 Common data classes .....	54
7.1 General .....	54
7.2 Maintenance and operational tag (TAG) .....	54
7.3 Operational restriction (RST) .....	55
8 Data attribute semantics .....	55
Bibliography .....	59
Table 1 – Abbreviated terms .....	8
Table 2 – List of logical node groups .....	9

Table 3 – Interpretation of logical node tables.....	10
Table 4 – Logical nodes for automatic functions.....	11
Table 5 – Logical nodes representing functional blocks.....	11
Table 6 – Hydropower specific logical nodes.....	11
Table 7 – Logical nodes for interface and archiving .....	12
Table 8 – Logical nodes for mechanical and non-electric primary equipment.....	13
Table 9 – Logical nodes for protections.....	13
Table 10 – Logical nodes for protection related functions.....	13
Table 11 – Logical nodes for supervision and monitoring .....	13

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**COMMUNICATION NETWORKS AND SYSTEMS  
FOR POWER UTILITY AUTOMATION –****Part 7-410: Basic communication structure –  
Hydroelectric power plants –  
Communication for monitoring and control****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61850-7-410 has been prepared by technical committee 57: Power systems management and associated information exchange.

This second edition cancels and replaces the first edition published in 2007, and constitutes a technical revision. This edition includes the following significant technical changes with respect to the previous edition:

- a) The logical nodes in IEC 61850-7-410:2007 that were not specific to hydropower plants have been transferred to IEC 61850-7-4:2010 and have been removed from this edition of IEC 61850-7-410.
- b) The definitions of logical nodes in this edition of IEC 61850-7-410 have been updated using the format introduced in IEC 61850-7-4:2010.
- c) Most of the modelling examples and background information that was included in IEC 61850-7-410:2007 has been transferred to IEC/TR 61850-7-510.

- d) However, this edition of IEC 61850-7-410 includes additional general-purpose logical nodes that were not included in IEC 61850-7-4:2010, but are required in order to represent the complete control and monitoring system of a hydropower plant.

The text of this standard is based on the following documents:

FDIS	Report on voting
57/1274/FDIS	57/1289/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 61850 series, published under the general title *Communication networks and systems for power utility automation* can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## COMMUNICATION NETWORKS AND SYSTEMS FOR POWER UTILITY AUTOMATION –

### Part 7-410: Basic communication structure – Hydroelectric power plants – Communication for monitoring and control

#### **1 Scope**

This part of IEC 61850 specifies the additional common data classes, logical nodes and data objects required for the use of IEC 61850 in a hydropower plant.

#### **2 Normative references**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC/TS 61850-2, *Communication networks and systems in substations – Part 2: Glossary*

IEC 61850-7-1, *Communication networks and systems for power utility automation – Part 7-1: Basic communication structure – Principles and models*

IEC 61850-7-2:2010, *Communication networks and systems for power utility automation – Part 7-2: Basic information and communication structure – Abstract communication service interface (ACSI)*

IEC 61850-7-3:2010, *Communication networks and systems for power utility automation – Part 7-3: Basic communication structure for substations and feeder equipment – Common data classes*

IEC 61850-7-4:2010, *Communication networks and systems for power utility automation – Part 7-4: Basic communication structure – Compatible logical node classes and data object classes*

#### **3 Terms and definitions**

For the purpose of this document, the terms and definitions given in IEC 61850-2 apply.

#### **4 Abbreviated terms**

The terms listed in Table 1 are used to build concatenated Data Object Names in this document. IEC 61850-7-410 inherits all the abbreviated terms described in Clause 4 of IEC 61850-7-4:2010.

NOTE Data Object Names in the logical nodes representing PSS filter functions follow names in IEEE 421.5 as closely as possible. These names are not included in Table 1.
