
Granulated cork — Sampling

Granulés crus de liège — Échantillonnage

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 2067 was prepared by Technical Committee ISO/TC 87, *Cork*.

This third edition cancels and replaces the second edition (ISO 2067:1988), which has been technically revised.

Granulated cork — Sampling

1 Scope

This International Standard specifies a method for the sampling of granulated cork.

As the characteristics of granulated cork have to be checked before any pressing is undertaken, this International Standard applies solely to loose granulated cork prior to any pressing, despatch from the silos, or packing in sacks.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent edition of the standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 633:1986, *Cork — Vocabulary*.

ISO 3534-1:1993, *Statistics — Vocabulary and symbols — Part 1: Probability and general statistical terms*.

ISO 3951:1989, *Sampling procedures and charts for inspection by variables for percent nonconforming*.

3 Definitions

For the purposes of this International Standard, the definitions given in ISO 3534-1 and ISO 3951 (for terms related to sampling) and those given in ISO 633 apply.

4 Apparatus

4.1 **Sample containers**, with closures.

5 Procedure

5.1 General

Evaluate the total initial mass of the lot to be sampled.
