Adhesives - Sampling

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 1066:2000 sisaldab Euroopa standardi EN 1066:1997 ingliskeelset teksti.

Standard on kinnitatud Eesti Standardikeskuse 11.01.2000 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.

Standard on kättesaadav Eesti standardiorganisatsioonist.

This Estonian standard EVS-EN 1066:2000 consists of the English text of the European standard EN 1066:1997.

This standard is ratified with the order of Estonian Centre for Standardisation dated 11.01.2000 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.

The standard is available from Estonian standardisation organisation.

Adhesives - Sampling

Adhésifs - Echantillonnage

Klebstoffe - Probenahme

This European Standard was approved by CEN on 1997-07-05. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat: rue de Stassart, 36 B-1050 Brussels

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 193 "Adhesives", the secretariat of which is held by AENOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 1998, and conflicting national standards shall be withdrawn at the latest by February 1998.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

Correct sampling is a skilled operation and the various procedures should be carried out with great care by samplers having the required knowledge and experience. The general instructions in this European Standard are intended to supplement this knowledge and experience and are applicable to most situations; however, some products require special sampling precautions not specified in this European Standard and therefore special vigilance is needed on the part of samplers to take note of unusual characteristics exhibited by the products. It is also essential that samplers observe special precautions in accordance with manufacturers' instructions and safety regulations.

This document is a preview generated by EVS

1 Scope

This European Standard specifies methods for sampling adhesives and related products, in order to obtain uniform samples of convenient size which are adequately representative of the product being sampled. The sample or samples so obtained are suitable for examination and preparation prior to testing.

This method applies to products which can need addition and mixing of catalysts or hardeners prior to their application, by sampling each component separately. It does not include methods of sampling from a stream of adhesive (in this case the samples can be prepared in accordance with ISO 8213).

NOTE: This method does not apply to animal glues.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

prEN 923	Adhesives - Terms and definitions
EN 1067	Adhesives - Examination and preparation of samples for testing
ISO 842	Raw materials for paints and varnishes - Sampling
ISO 8213	Chemical products for industrial use - Sampling techniques - Solid chemical products in the form of particles varying from powders to coarse lumps

3 Definitions

In addition to the definitions in prEN 923 and for the purposes of this European Standard, the following definitions apply:

3.1 batch: A quantity of a particular adhesive (or component of an adhesive system) manufactured in a single location at a defined limited time and under conditions which are presumed to be uniform.

3.2 delivery: A quantity consisting of one or more batches or parts of batches of a particular adhesive delivered at one time and covered by a delivery note or shipping document.

3.3 sample: Any quantity of adhesive taken from and representative of a batch or delivery and intended to provide information necessary for assessing the characteristics of that material.

3.4 gross sample: A sample as collected from a batch or delivery.

NOTE: A reduced sample can be obtained by applying some method of reduction of the quantity of the gross sample without change of composition or physical state.
