## EESTI STANDARDI EESSÖNA

## NATIONAL FOREWORD

See Eesti standard EVS-EN 61784-5-8:2014 sisaldb Euroopa standardi EN 61784-5-8:2013 inglisekeelset teksti.	This Estonian standard EVS-EN 61784-5-8:2014 consists of the English text of the European standard EN 61784-5-8:2013.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 13.12.2013.	Date of Availability of the European standard is . 13.12.2013.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile [standardiosakond@evs.ee](mailto:standardiosakond@evs.ee).

Teil 5-8: Feldbusinstallation -  
Installationsprofile für die  
Kommunikationsprofilfamilie 8  
(IEC 61784-5-8:2013)

This European Standard was approved by CENELEC on 2013-10-22. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Foreword

The text of document 65C/738/FDIS, future edition 1 of IEC 61784-5-8, prepared by SC 65C "Industrial networks" of IEC/TC 65 "Industrial-process measurement, control and automation" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 61784-5-8:2013.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2014-07-22
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2016-10-22

This standard is to be used in conjunction with EN 61918:2013.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

## Endorsement notice

The text of the International Standard IEC 61784-5-8:2013 was approved by CENELEC as a European Standard without any modification.

**Annex ZA**  
(normative)

**Normative references to international publications  
with their corresponding European publications**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE When an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

***Annex ZA of EN 61918:2013 applies, except as follows:***

<u>Publication</u>	<u>Year</u>	<u>Title</u>	<u>EN/HD</u>	<u>Year</u>
--------------------	-------------	--------------	--------------	-------------

***Addition to Annex ZA of EN 61918:2013:***

IEC 61918	2013	Industrial communication networks - Installation of communication networks in industrial premises	EN 61918	2013

## CONTENTS

FOREWORD .....	12
INTRODUCTION .....	14
1 Scope .....	15
2 Normative references .....	15
3 Terms, definitions and abbreviated terms .....	15
4 CPF 8: Overview of installation profiles .....	15
5 Installation profile conventions .....	16
6 Conformance to installation profiles .....	16
Annex A (normative) CP 8/1 and CP 8/2 (CC-Link/V1 and CC-Link/V2) specific installation profile .....	18
A.1 Installation profile scope .....	18
A.2 Normative references .....	18
A.3 Installation profile terms, definitions, and abbreviated terms .....	18
A.3.1 Terms and definitions .....	18
A.3.2 Abbreviated terms .....	18
A.3.3 Conventions for installation profiles .....	18
A.4 Installation planning .....	18
A.4.1 General .....	18
A.4.1.1 Objective .....	18
A.4.1.2 Cabling in industrial premises .....	18
A.4.1.3 The planning process .....	18
A.4.1.4 Specific requirements for CPs .....	18
A.4.1.5 Specific requirements for generic cabling in accordance with ISO/IEC 24702 .....	19
A.4.2 Planning requirements .....	19
A.4.2.1 Safety .....	19
A.4.2.2 Security .....	19
A.4.2.3 Environmental considerations and EMC .....	19
A.4.2.4 Specific requirements for generic cabling in accordance with ISO/IEC 24702 .....	19
A.4.3 Network capabilities .....	19
A.4.3.1 Network topology .....	19
A.4.3.2 Network characteristics .....	20
A.4.4 Selection and use of cabling components .....	21
A.4.4.1 Cable selection .....	21
A.4.4.2 Connecting hardware selection .....	23
A.4.4.3 Connections within a channel/permanent link .....	24
A.4.4.4 Terminators .....	24
A.4.4.5 Device location and connection .....	24
A.4.4.6 Coding and labelling .....	25
A.4.4.7 Earthing and bonding of equipment and devices and shielded cabling .....	25
A.4.4.8 Storage and transportation of cables .....	26
A.4.4.9 Routing of cables .....	26
A.4.4.10 Separation of circuit .....	26
A.4.4.11 Mechanical protection of cabling components .....	26

A.4.4.12 Installation in special areas .....	26
A.4.5 Cabling planning documentation .....	26
A.4.6 Verification of cabling planning specification .....	26
A.5 Installation implementation .....	26
A.5.1 General requirements .....	26
A.5.1.1 Common description .....	26
A.5.1.2 Installation of CPs .....	26
A.5.1.3 Installation of generic cabling in industrial premises .....	26
A.5.2 Cable installation .....	26
A.5.2.1 General requirements for all cabling types .....	26
A.5.2.2 Installation and routing .....	27
A.5.2.3 Specific requirements for CPs .....	27
A.5.2.4 Specific requirements for wireless installation .....	27
A.5.2.5 Specific requirements for generic cabling in accordance with ISO/IEC 24702 .....	27
A.5.3 Connector installation .....	27
A.5.3.1 Common description .....	27
A.5.3.2 Shielded connectors .....	28
A.5.3.3 Unshielded connectors .....	28
A.5.3.4 Specific requirements for CPs .....	28
A.5.3.5 Specific requirements for generic cabling in accordance with ISO/IEC 24702 .....	28
A.5.4 Terminator installation .....	28
A.5.4.1 Common description .....	28
A.5.4.2 Specific requirements for CPs .....	28
A.5.5 Device installation .....	28
A.5.6 Coding and labelling .....	28
A.5.6.1 Common description .....	28
A.5.6.2 Specific requirements for CPs .....	28
A.5.7 Earthing and bonding of equipment and devices and shield cabling .....	28
A.5.7.1 Common description .....	28
A.5.7.2 Bonding and earthing of enclosures and pathways .....	28
A.5.7.3 Earthing methods .....	28
A.5.7.4 Shield termination methods .....	29
A.5.7.5 Specific requirements for CPs .....	29
A.5.7.6 Specific requirements for generic cabling in accordance with ISO/IEC 24702 .....	29
A.5.8 As-implemented cabling documentation .....	29
A.6 Installation verification and installation acceptance test .....	29
A.6.1 General .....	29
A.6.2 Installation verification .....	29
A.6.2.1 General .....	29
A.6.2.2 Verification according to cabling planning documentation .....	29
A.6.2.3 Verification of earthing and bonding .....	29
A.6.2.4 Verification of shield earthing .....	29
A.6.2.5 Verification of cabling system .....	29
A.6.2.6 Cable selection verification .....	29
A.6.2.7 Connector verification .....	30
A.6.2.8 Connection verification .....	30

A.6.2.9	Terminators verification .....	30
A.6.2.10	Coding and labelling verification .....	30
A.6.2.11	Verification report .....	30
A.6.3	Installation acceptance test .....	30
A.6.3.1	General .....	30
A.6.3.2	Acceptance test of Ethernet-based cabling .....	30
A.6.3.3	Acceptance test of non-Ethernet-based cabling .....	30

## INTRODUCTION

This International Standard is one of a series produced to facilitate the use of communication networks in industrial control systems.

IEC 61918:2013 provides the common requirements for the installation of communication networks in industrial control systems. This installation profile standard provides the installation profiles of the communication profiles (CP) of a specific communication profile family (CPF) by stating which requirements of IEC 61918:2013 fully apply and, where necessary, by supplementing, modifying, or replacing the other requirements (see Figure 1).

For general background on fieldbuses, their profiles, and relationship between the installation profiles specified in this standard, see IEC 61158-1.

Each CP installation profile is specified in a separate annex of this standard. Each annex is structured exactly as the reference standard IEC 61918:2013 for the benefit of the persons representing the roles in the fieldbus installation process as defined in IEC 61918:2013 (planner, installer, verification personnel, validation personnel, maintenance personnel, administration personnel). By reading the installation profile in conjunction with IEC 61918:2013, these persons immediately know which requirements are common for the installation of all CPs and which are modified or replaced. The conventions used to draft this standard are defined in Clause 5.

The provision of the installation profiles in one standard for each CPF (for example IEC 61784-5-8 for CPF 8), allows readers to work with standards of a convenient size.
