Võtmesõnad:

ICS 91.100.15

**English version**

**Natural stone products – Slabs for floors and stairs  
Requirements**

Produits en pierre naturelle – Dalles  
de revêtement de sols et d'escaliers –  
Exigences

Natursteinprodukte – Bodenplatten  
und Stufenbeläge – Anforderungen

This European Standard was approved by CEN on 2004-07-09.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland, and the United Kingdom.

| Foreword.....                                                                                                                         | 3    |
| 1 Scope .....                                                                                                                         | 4    |
| 2 Normative references .....                                                                                                          | 4    |
| 3 Terms and definitions .....                                                                                                         | 5    |
| 4 Requirements .....                                                                                                                  | 6    |
| 4.1 Requirements for geometric characteristics .....                                                                                  | 6    |
| 4.1.1 General.....                                                                                                                    | 6    |
| 4.1.2 Requirements for thickness .....                                                                                                | 6    |
| 4.1.3 Requirements for flatness .....                                                                                                 | 7    |
| 4.1.4 Requirements for length and width .....                                                                                         | 7    |
| 4.1.5 Requirements for angles and special shapes .....                                                                                | 7    |
| 4.1.6 Commercial sizes of slabs for floors and stairs .....                                                                           | 8    |
| 4.1.7 Requirements for surface finish.....                                                                                            | 8    |
| 4.2 Requirements of natural stone for floors and stairs.....                                                                          | 9    |
| 4.2.1 General.....                                                                                                                    | 9    |
| 4.2.2 Denomination .....                                                                                                              | 9    |
| 4.2.3 Visual appearance .....                                                                                                         | 9    |
| 4.2.4 Flexural strength.....                                                                                                          | 11   |
| 4.2.5 Bond strength adhesion .....                                                                                                    | 11   |
| 4.2.6 Water absorption at atmospheric pressure .....                                                                                  | 12   |
| 4.2.7 Reaction to fire.....                                                                                                           | 12   |
| 4.2.8 Water absorption by capillarity .....                                                                                           | 12   |
| 4.2.9 Apparent density and open porosity .....                                                                                        | 12   |
| 4.2.10 Frost resistance .....                                                                                                         | 12   |
| 4.2.11 Thermal shock resistance.....                                                                                                  | 13   |
| 4.2.12 Water vapour permeability.....                                                                                                 | 13   |
| 4.2.13 Abrasion resistance .....                                                                                                      | 13   |
| 4.2.14 Slip resistance .....                                                                                                          | 13   |
| 4.2.15 Tactility .....                                                                                                                | 13   |
| 5 Marking and packaging.....                                                                                                          | 14   |
| 6 Evaluation of conformity.....                                                                                                       | 14   |
| 6.1 General rules .....                                                                                                               | 14   |
| 6.2 Initial type testing .....                                                                                                        | 14   |
| 6.3 Factory production control.....                                                                                                   | 15   |
| Annex A (normative) Sampling.....                                                                                                     | 17   |
| A.1 General.....                                                                                                                      | 17   |
| A.2 Principles of sampling .....                                                                                                      | 17   |
| A.3 Taking bulk samples .....                                                                                                         | 17   |
| A.4 Preparing a sampling plan.....                                                                                                    | 17   |
| A.5 Sampling apparatus .....                                                                                                          | 18   |
| A.6 Sampling methods.....                                                                                                             | 18   |
| A.6.1 General.....                                                                                                                    | 18   |
| A.6.2 Sampling from quarries .....                                                                                                    | 18   |
| A.6.3 Sampling from plants .....                                                                                                      | 19   |
| A.6.4 Sampling from buildings.....                                                                                                    | 19   |
| A.7 Marking, packaging and dispatch of the samples.....                                                                               | 19   |
| A.8 Sampling report .....                                                                                                             | 19   |
| Annex ZA (informative) Clauses of this European Standard addressing the provisions of the EU<br>Construction Products Directive ..... | 21   |
| ZA.1 Scope and relevant characteristics .....                                                                                         | 21   |
| ZA.2 Procedures for the attestation of conformity .....                                                                               | 24   |
| ZA.3 CE marking and labelling.....                                                                                                    | 25   |

## Foreword

This document (EN 12058:2004) has been prepared by Technical Committee CEN/TC 246 "Natural stones", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2005, and conflicting national standards shall be withdrawn at the latest by July 2006.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

This document is one of a series of standards for specifications of natural stone products which includes the following:

EN 1467, *Natural stone - Rough blocks - Requirements*

EN 1468, *Natural stone - Rough slabs - Requirements*

prEN 1469, *Natural stone products – Slabs for cladding - Requirements*

EN 12057, *Natural stone products - Modular tiles - Requirements.*

EN 12058, *Natural stone products - Slabs for floors and stairs - Requirements.*

prEN 12059, *Natural stone products - Dimensional stone work - Requirements.*

Other standards on natural stone are produced by:

CEN/TC 178 Paving units and kerbs

EN 1341, *Slabs of natural stone for external paving - Requirements and test methods.*

EN 1342, *Setts of natural stone for external paving - Requirements and test methods.*

EN 1343, *Kerbs of natural stone for external paving - Requirements and test methods.*

CEN/TC 128 Roof covering products for discontinuous laying and products for wall cladding

EN 12326-2, *Slate and stone products for discontinuous roofing and cladding - Part 2: Methods of test.*

EN 12326-1, *Slate and stone products for discontinuous roofing and cladding - Part 1: Product specification.*

CEN/TC 125 Masonry

EN 771-6, *Specification for masonry units - Part 6: Natural stone masonry units.*

Other standards are relevant to aggregates for concrete, roads, railways and armourstone (under study within CEN/TC 154).

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## 1 Scope

This document specifies requirements for flat natural stone slabs fabricated for use as floor and stair coverings. It does not cover mineral aggregates and artificial agglomerated stone material and does not cover installation.

## 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 1925, *Natural stone test methods - Determination of water absorption coefficient by capillarity.*

EN 1936, *Natural stone test methods - Determination of real density and apparent density and of total and open porosity.*

EN 12371, *Natural stone test methods - Determination of frost resistance.*

EN 12372, *Natural stone test methods - Determination of flexural strength under concentrated load.*

EN 12407, *Natural stone test methods - Petrographic examination.*

EN 12440, *Natural stone - Denomination criteria.*

EN 12524, *Building materials and products - Hygrothermal properties - Tabulated design values.*

EN 12670:2001, *Natural stone - Terminology.*

EN 13161, *Natural stone test methods - Determination of flexural strength under constant moment.*

EN 13373, *Natural stone test methods - Determination of geometric characteristics on units.*

EN 13501-1, *Fire classification of construction products and building elements - Part 1: Classification using test data from reaction to fire tests.*

EN 13755, *Natural stone test methods - Determination of water absorption at atmospheric pressure.*

EN 14157, *Natural stone test methods - Determination of the abrasion resistance.*

EN 14066, *Natural stone test methods - Determination of resistance to ageing by thermal shock.*

EN 14231, *Natural stone test methods - Determination of the slip resistance by means of the pendulum tester.*

EN ISO 12572, *Hygrothermal performance of building materials and products - Determination of water vapour transmission properties (ISO 12572:2001).*

NOTE Besides the documents for test methods mentioned in this Clause, there exist further documents which can be used for scientific examinations, but which are not relevant for the application in practice according to this document.
