EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN ISO 3727-1:2002 sisaldab Euroopa standardi EN ISO 3727-1:2001 ingliskeelset teksti.

Standard on kinnitatud Eesti Standardikeskuse 16.05.2002 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.

Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kättesaadavaks tegemise kuupäev on 15.12.2001.

Standard on kättesaadav Eesti standardiorganisatsioonist.

This Estonian standard EVS-EN ISO 3727-1:2002 consists of the English text of the European standard EN ISO 3727-1:2001.

This standard is ratified with the order of Estonian Centre for Standardisation dated 16.05.2002 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.

Date of Availability of the European standard text 15.12.2001.

The standard is available from Estonian standardisation organisation.

English version

Butter - Determination of moisture, non-fat solids and fat contents - Part 1: Determination of moisture content (Reference method) (ISO 3727-1:2001)

Beurre - Détermination des teneurs en eau, en matière sèche non grasse et en matière grasse - Partie 1: Détermination de la teneur en eau (Méthode de référence) (ISO 3727-1:2001)

Butter - Bestimmung des Wassergehaltes, der fettfreien Trockenmasse und des Fettgehaltes - Teil 1: Bestimmung des Wassergehaltes (Referenzverfahren) (ISO 3727-1:2001)

This European Standard was approved by CEN on 15 December 2001.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

COMITÉ EUROPÉEN DE NORMALISATION
EUROPÄISCHES KOMITEE FÜR NORMUNG

Management Centre: rue de Stassart, 36 B-1050 Brussels

CORRECTED 2002-02-06

Foreword

This document (ISO 3727-1:2001) has been prepared by Technical Committee ISO/TC 34 "Agricultural food products" in collaboration with Technical Committee CEN/TC 302 "Milk and milk products - Methods of sampling and analysis", the secretariat of which is held by NEN.

This document supersedes EN ISO 3727:1995.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2002, and conflicting national standards shall be withdrawn at the latest by June 2002.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of the International Standard ISO 3727-1:2001 has been approved by CEN as a European Standard without any modifications.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 3727 | IDF 80 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 3727-1 | IDF 80-1 was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 5, *Milk and milk products*, and the International Dairy Federation (IDF), in collaboration with AOAC International. It is being published jointly by ISO and IDF and separately by AOAC International.

This first edition of ISO 3727-1 | IDF 80-1, together with ISO 3727-2 | IDF 80-2 and ISO 3727-3 | IDF 80-3, cancels and replaces ISO 3727:1977, which has been technically revised.

ISO 3727 | IDF 80 consists of the following parts, under the general title *Butter — Determination of moisture, non-fat solids and fat contents*:

- *Part 1: Determination of moisture content (Reference method)*
- *Part 2: Determination of non-fat solids content (Reference method)*
- *Part 3: Calculation of fat content*

Annex A of this part of ISO 3727 | IDF 80 is for information only.

Foreword

IDF (the International Dairy Federation) is a worldwide federation of the dairy sector with a National Committee in every member country. Every National Committee has the right to be represented on the IDF Standing Committees carrying out the technical work. IDF collaborates with ISO and AOAC International in the development of standard methods of analysis and sampling for milk and milk products.

Draft International Standards adopted by the Action Teams and Standing Committees are circulated to the National Committees for voting. Publication as an International Standard requires approval by at least 50 % of National Committees casting a vote.

International Standard ISO 3727-1 | IDF 80-1 was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 5, *Milk and milk products*, and the International Dairy Federation (IDF), in collaboration with AOAC International. It is being published jointly by ISO and IDF and separately by AOAC International.

All work was carried out by the Joint ISO/IDF/AOAC Action Team, *Water*, of the Standing Committee on *Main components of milk*, under the aegis of its project leader, Mr G. J. Beutick (NL).

This first edition of ISO 3727-1 | IDF 80-1, together with ISO 3727-2 | IDF 80-2 and ISO 3727-3 | IDF 80-3, cancels and replaces IDF 80:1977, which has been technically revised.

ISO 3727 | IDF 80 consists of the following parts, under the general title *Butter — Determination of moisture, non-fat solids and fat contents*:

- *Part 1: Determination of moisture content (Reference method)*
- *Part 2: Determination of non-fat solids content (Reference method)*
- *Part 3: Calculation of fat content*

Annex A of this part of ISO 3727 | IDF 80 is for information only.

Butter — Determination of moisture, non-fat solids and fat contents —

Part 1: Determination of moisture content (Reference method)

1 Scope

This part of ISO 3727 | IDF 80 specifies the reference method for the determination of the moisture content of butter.

2 Term and definition

For the purposes of this part of ISO 3727 | IDF 80, the following term and definition applies.

2.1

moisture content

mass fraction of substances determined by the procedure specified in this part of ISO 3727 | IDF 80

NOTE The moisture content is expressed as a percentage by mass.

3 Principle

A known mass of butter is dried in the presence of pumice stone at $102\text{ }^{\circ}\text{C} \pm 2\text{ }^{\circ}\text{C}$. The remaining dry mass is weighed to determine the loss in mass.

4 Apparatus

Usual laboratory equipment and, in particular, the following.

- 4.1 Analytical balance**, capable of weighing to the nearest 1 mg, with a readability of 0,1 mg.
- 4.2 Drying oven**, ventilated, thermostatically controlled, capable of maintaining a temperature of $102\text{ }^{\circ}\text{C} \pm 2\text{ }^{\circ}\text{C}$ throughout the entire working space.
- 4.3 Desiccator**, containing a suitable drying agent, for example freshly dried silica gel with hygrometric indicator.
- 4.4 Dishes**, made of glazed porcelain, or metal resistant to corrosion under the conditions of the test, with height between 20 mm and 40 mm, and diameter between 50 mm and 70 mm.
- 4.5 Pumice stone**, granular, with diameter between 0,8 mm and 8 mm.
