Descriptors: Building, drawings, designation systems.

English version

Construction drawings – Designation systems

Part 1: Buildings and parts of buildings
(ISO 4157-1 : 1998)

Dessins de bâtiment – Systèmes de
désignation – Partie 1: Bâtiments et
parties de bâtiments
(ISO 4157-1 : 1998)

Zeichnungen für das Bauwesen –
Bezeichnungssysteme – Teil 1:
Gebäude und Gebäudeteile
(ISO 4157-1 : 1998)

This European Standard was approved by CEN on 1998-11-21.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Foreword

International Standard

ISO 4157-1 : 1998 Construction drawings – Designation systems – Part 1: Buildings and parts of buildings, which was prepared by ISO/TC 10 'Technical drawings, product definition and related documentation' of the International Organization for Standardization, has been adopted by Technical Committee CEN/CS, the Secretariat of which is held by SIS, as a European Standard.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, and conflicting national standards withdrawn, by June 1999 at the latest.

In accordance with the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard:

Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Endorsement notice

The text of the International Standard ISO 4157-1 : 1998 was approved by CEN as a European Standard without any modification.

1 Scope

This part of ISO 4157 specifies requirements for designation systems and a designation code for buildings, including spaces, building elements and components.

2 Normative references

The following standards contain provisions, which through reference in this text, constitute provisions of this part of ISO 4157. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this part of ISO 4157 are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 4157-2:1998, *Construction drawings — Designation systems — Part 2: Room names and numbers*.

ISO 4157-3:1998, *Construction drawings — Designation systems — Part 3: Room identifiers*.

3 Definitions

For the purposes of this part of ISO 4157, the following definitions apply.

3.1 room

area or volume, space or void bounded actually or theoretically, even though it is not traditionally thought of as a room

EXAMPLES

- Balcony in a movie theatre
- Staircase (considered to be a separate room in each floor)
- Auditorium with folding doors
- Partly covered terrace
- Atrium (even without a roof)
- Ventilation shafts (considered to be a separate room on each floor)
- Elevator shafts (considered to be a separate room on each floor)
- Void in ceiling

NOTE A room in the numbering context may or may not be completely enclosed by walls, ceiling, and floor. However, for a room to be allocated a room number, it should have some of these physical limitations.
