## EESTI STANDARDI EESSÕNA

## NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN ISO 4157-2:2001 sisaldab Euroopa standardi EN ISO 4157-2:1998 ingliskeelset teksti.

Käesolev dokument on jõustatud 18.06.2001 ja selle kohta on avaldatud teade Eesti standardiorganisatsiooni ametlikus väljaandes.

Standard on kättesaadav Eesti standardiorganisatsioonist.

This Estonian standard EVS-EN ISO 4157-2:2001 consists of the English text of the European standard EN ISO 4157-2:1998.

This document is endorsed on 18.06.2001 with the notification being published in the official publication of the Estonian national standardisation organisation.

The standard is available from Estonian standardisation organisation.

### Käsitlusala:

This part of ISO 4157 specifies requirements for designation systems for rooms, areas, spaces, and voids in building by room names and numbers.

### Scope:

This part of ISO 4157 specifies requirements for designation systems for rooms, areas, spaces, and voids in building by room names and numbers.

This European Standard was approved by CEN on 1998-11-21.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

## Foreword

International Standard

ISO 4157-2 : 1998 Construction drawings – Designation systems – Part 2: Room names and numbers, which was prepared by ISO/TC 10 'Technical drawings, product definition and related documentation' of the International Organization for Standardization, has been adopted by Technical Committee CEN/CS, the Secretariat of which is held by SIS, as a European Standard.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, and conflicting national standards withdrawn, by June 1999 at the latest.

In accordance with the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard:

Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

## Endorsement notice

The text of the International Standard ISO 4157-2 : 1998 was approved by CEN as a European Standard without any modification.

## 1 Scope

This part of ISO 4157 specifies requirements for designation systems for rooms, areas, spaces, and voids in buildings by room names and numbers. It is intended for identification of rooms in the daily use of the buildings.

For identification of rooms in a project throughout its life-cycle, i.e. conception, programming, planning, erection, maintenance, remodelling and demolition phases, see ISO 4157-3.

## 2 Normative reference

The following standard contains provisions, which through reference in this text, constitute provisions of this part of ISO 4157. At the time of publication, the edition indicated was valid. All standards are subject to revision, and parties to agreements based on this part of ISO 4157 are encouraged to investigate the possibility of applying the most recent edition of the standard indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 4157-1:1998, *Construction drawings — Designation systems — Part 1: Buildings and parts of buildings*.

## 3 Definitions

For the purposes of this part of ISO 4157, the definitions given in ISO 4157-1 apply.

## 4 Room number principle

### 4.1 Logical order

Room numbers shall be assigned to all rooms on each floor in a logical order, preferably consecutive, starting with number n01 (where n indicates floor number) within the limits of all the parts of the building. Such limits need not be physical walls, so that outdoor or covered areas which are appropriate to include in the numbering system may be assigned room numbers, e.g. an enclosed garden, a pool area, a carport, a covered loggia and in-between spaces.

### 4.2 Separate buildings

If several buildings are included in one building project, room numbers shall be allocated independently to each building in accordance with 4.1. Separate buildings may be adjacent to each other, and may be interconnected by doors or openings.
