Conteneurs à roulettes – Partie 1: Terminologie  
Rollbehälter – Teil 1: Terminologie

This European Standard was approved by CEN on 1999-05-20.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

## FOREWORD

This European Standard has been prepared by Technical Committee CEN/TC 261 "Packaging", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2000, and conflicting national standards shall be withdrawn at the latest by January 2000.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

This standard is part of a series of standards for roll containers, no existing document is being replaced, other parts will be entitled as follows:

prEN 12674-2: Part 2: Roll containers - General design & safety principles

prEN 12674-3: Part 3: Roll containers - Test methods

prEN 12674-4: Part 4: Roll containers - Performance requirements

## INTRODUCTION

Roll containers are equipment intended for moving goods which comprise apparatus fitted with fixed and/or swivel castors. The superstructure comprises two or more frames which provide retention for items requiring transportation and/or distribution.

Roll containers can be supplied in a variety of materials and, for the purpose of this terminology document, in four main styles. The Nesting style is further sub-divided into five derived forms and the Demountable style is sub-divided into 2 derived forms. The four main styles are arranged relative to each other in Figure 1.

Note: The figures in prEN 12674-1 show typical examples and designs are not restricted to those shown.

## 1 SCOPE

This European Standard specifies terminology used in the field of roll containers. It also includes terminology for related equipment such as dollies.

The Standard defines the main styles of roll container and various special forms of roll container derived from the main styles.

## 2 NORMATIVE REFERENCES

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

prEN 12674-2: Part 2: Roll containers - General design & safety principles

prEN 12674-3: Part 3: Roll containers - Test methods

prEN 12674-4: Part 4: Roll containers - Performance requirements
