English version

Structural adhesives – Storage

Determination of words and phrases relating to the product life of structural adhesives and related materials

Adhésifs structuraux – Stockage –
Définition des termes et expressions
relatifs à la durée de vie des adhésifs
structuraux et matériaux connexes

Strukturklebstoffe – Lagerung –
Bestimmung von Begriffen zur Zeit-
spanne der Verarbeitbarkeit von
Strukturklebstoffen und verwandten
Materialien

This European Standard was approved by CEN on 2001-05-10.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Annex A (normative) Storage of structural adhesives: product life when stored under stated conditions	7

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 193 "Adhesives", the secretariat of which is held by AENOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2001, and conflicting national standards shall be withdrawn at the latest by December 2001.

Annex A is normative.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

1 Scope

This European Standard specifies definitions and requirements applicable to structural adhesives whose storage life is limited by possible change of properties.

NOTE Structural adhesives and their related materials are herein referred to as "adhesives".

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

EN 923 Adhesives — Terms and definitions

3 Terms and definitions

For the purposes of this European Standard, the terms and definitions in accordance with EN 923 and the following apply :

NOTE All the following definitions of words and phrases relating to the storage of adhesives are illustrated in annex A (normative).

3.1

(adhesive) manufacturer

person or firm that converts raw materials into adhesives

NOTE The manufacturing process almost always involves mixing and often requires some form of chemical reaction

3.2

(adhesive) supplier

person or firm that sends adhesives by an appropriate mean of transport, to either a purchaser or an user

NOTE A supplier can be :

- a) the actual manufacturer ;
- b) a specific section of the manufacturer's organisation ;
- c) a subsidiary ;
- d) an appointed distributor or agent.

3.3

purchaser

person or firm that buys the adhesive

NOTE The purchaser is normally, though not necessarily, the user

3.4

adhesive having a limited storage life

adhesive whose characteristics and bond properties, in particular before and during use, depend on the time spent in storage under specified conditions
