English version

Ventilation for buildings - Symbols, terminology and graphical symbols

Ventilation des bâtiments - Symboles, terminologie et symboles graphiques

Lüftung von Gebäuden - Symbole, Terminologie und graphische Symbole

This European Standard was approved by CEN on 12 December 2002.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 12792:2003) has been prepared by Technical Committee CEN/TC 156 "Ventilation for Buildings", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2004, and conflicting national standards shall be withdrawn at the latest by February 2004.

This document supersedes CR 12792:1997.

Annex A is informative.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

One of the goals of TC156 is to realize European Standards that use the same symbols and terminology. For this purpose WG1 of TC156 had the task to provide a standard for symbols and terminology to be used by all other working groups of TC156. This standard for symbols and terminology was generated by the different working groups themselves, and WG1 was responsible for the co-ordination between the working groups and standardization of the symbols and terminology within TC156, which then became compulsory for other WG's to use in their standards. The symbols and terminology in this English standard are numbered and it is intended that these numbers correspond to the German and French translation of the standard, so that the different definitions for the same symbol or term can be checked in English, French and German.

1 Scope

This European Standard comprises the symbols and terminology included in the European standards covering 'Ventilation for buildings' produced by CEN/ TC156.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references the subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

EN 779 *Particulate air filters for general ventilation - Determination of the filtration performance.*

EN ISO 5135 *Acoustics – Determination of sound power levels of noise from air terminal devices, high/low velocity/pressure assemblies, dampers and valves by measurement in a reverberation room (ISO 5135:1984).*

ISO 5801 *Industrial fans – Performance testing using standardized airways.*

ISO 13349 *Industrial fans – Vocabulary and definitions of categories.*
