Plywood - Specifications

## EESTI STANDARDI EESSÕNA

### NATIONAL FOREWORD

See Eesti standard EVS-EN 636:2012+A1:2015 sisaldab Euroopa standardi EN 636:2012+A1:2015 ingliskeelset teksti.	This Estonian standard EVS-EN 636:2012+A1:2015 consists of the English text of the European standard EN 636:2012+A1:2015.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 18.03.2015.	Date of Availability of the European standard is 18.03.2015.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile <u>standardiosakond@evs.ee</u>.

# Plywood - Specifications

Contreplaqué - Exigences

Sperrholz - Anforderungen

This European Standard was approved by CEN on 11 August 2012 and includes Amendment 1 approved by CEN on 27 December 2014.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

### **Foreword**

This document (EN 636:2012+A1:2015) has been prepared by Technical Committee CEN/TC 112 "Wood-based panels", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by September 2015, and conflicting national standards shall be withdrawn at the latest by September 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document includes Amendment 1, approved by CEN on 2014-12-27.

The start and finish of text introduced or altered by amendment is indicated in the text by tags [A].

This document supersedes A1 EN 636:2012 A1.

### A) Deleted text (A)

According to the CEN/CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, e<sub>h</sub> Jurg, J, Turke<sub>s</sub> Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

### 1 Scope

This European Standard specifies the requirements for plywood, as defined in EN 313-2, for both general purpose use (non-structural application) and structural application in dry, humid or exterior conditions. It also gives a classification system based on the bending properties.

NOTE 1 This European Standard is referenced in EN 13986 for construction applications.

This standard can be appropriately applied for all plywood, including overlaid and coated plywood, but it does not cover materials or processes used for overlaying or coating. Neither does it cover any materials or processes applied in relation to enhancement of biological durability.

NOTE 2 For additional guidance on biological durability and the potential need for preservative treatment, according to application and serviceability, reference can be made to CEN/TS 1099.

The values listed under Clause 4 relate only to product properties; they are not 'characteristic values' and are not to be used in design calculations.

NOTE 3 Characteristic values (i.e. for use in design calculation according to EN 1995–1–1) are given either in EN 12369–2 which is based on the classification system given in this standard or by the manufacturer based on testing according to EN 789, EN 1058 and ENV 1156.

Additional information on supplementary properties for certain applications is also given. [A]

#### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 310, Wood-based panels - Determination of modulus of elasticity in bending and of bending strength

EN 314-1, Plywood - Bonding quality - Part 1: Test methods

EN 314-2, Plywood - Bonding quality - Part 2: Requirements

EN 315, Plywood - Tolerances for dimensions

EN 318, Wood based panels - Determination of dimensional changes associated with changes in relative humidity

EN 322, Wood-based panels - Determination of moisture content

EN 323, Wood-based panels - Determination of density

EN 324-1, Wood-based panels - Determination of dimensions of boards - Part 1: Determination of thickness, width and length

EN 324-2, Wood-based panels - Determination of dimensions of boards - Part 2: Determination of squareness and edge straightness

EN 326-1, Wood-based panels - Sampling, cutting and inspection - Part 1: Sampling and cutting of test pieces and expression of test results

EN 326-2, Wood-based panels - Sampling, cutting and inspection - Part 2: Initial type testing and factory production control

EN 326-3, Wood-based panels - Sampling, cutting and inspection - Part 3: Inspection of an isolated lot of panels

EN 335-3:1995, Durability of wood and wood-based products — Definition of hazard classes of biological attack —Part 3: Application to wood-based panels

EN 594, Timber structures - Test methods - Racking strength and stiffness of timber frame wall panels

EN 596, Timber structures - Test methods - Soft body impact test of timber framed walls

EN 635-1, Plywood - Classification by surface appearance - Part 1: General

EN 635-2, Plywood - Classification by surface appearance - Part 2: Hardwood

EN 635-3, Plywood - Classification by surface appearance - Part 3: Softwood

CEN/TS 635-4, Plywood - Classification by surface appearance - Part 4: Parameters of ability for finishing, guideline

EN 635-5, Plywood - Classification by surface appearance - Part 5: Methods for measuring and expressing characteristics and defects

EN 717-1, Wood-based panels - Determination of formaldehyde release - Part 1: Formaldehyde emission by the chamber method

EN 717-2, Wood-based panels - Determination of formaldehyde release - Part 2: Formaldehyde release by the gas analysis method

EN 789, Timber structures - Test methods - Determination of mechanical properties of wood based panels

EN 1058, Wood-based panels - Determination of characteristic 5-percentile values and characteristic mean values

ENV 1156, Wood-based panels — Determination of duration load and creep factors

EN 1195, Timber structures - Test methods - Performance of structural floor decking

EN 12369-2, Wood-based panels - Characteristic values for structural design - Part 2: Plywood

EN 13446, Wood-based panels - Determination of withdrawal capacity of fasteners

EN 13810-1, Wood-based panels - Floating floors - Part 1: Performance specifications and requirements

CEN/TS 13810-2, Wood-based panels - Floating floors - Part 2: Test methods

EN 13986, Wood-based panels for use in construction - Characteristics, evaluation of conformity and marking

EN 14272, Plywood - Calculation method for some mechanical properties
