tionenanalyse; Wörterbuch – Teil 1:
Wertanalyse und Funktionenanalyse

This European Standard was approved by CEN on 1996-03-26.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 279 "Value management - Value analysis, functional analysis", the secretariat of which is held by AFNOR

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 1997, and conflicting national standards shall be withdrawn at the latest by March 1997.

The aim of this standard is to define the main terms of the "Value Management (VM) - Value Analysis (VA), Functional Analysis (FA)" field.

It integrates into the standardisation work in this field conducted successively through the prestandardisation work supported by the SPRINT programme of the European Commission (EC) and through the standardisation work of the CEN/TC 279.

As the standardisation work on "Value Management" is currently under way, it seemed too early to give in this standard a normative status for the definition of this concept.

Consequently, the definitions of the terms specifically related to "Value Management" will be the subject of a second part of this standard :

prEN 1325-2 Value Management - Value Analysis, Functional Analysis vocabulary -
Part 2 : Value Management (provisional title)

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

0 Introduction

A set of methods such as Value Management, Value Analysis, Functional Analysis are founded on the concept of value and on the functional based approach.

They are used on the general management level of companies and organisations, for the development of products and services, or to work out the optimized solution of many kinds of industrial and organisational problems.

Their concern for the end purposes, or functions, of the matter examined, their search for the optimization of these functions in relation to the means, resources or expenditures which are necessary for their attainment, are very important factors of the overall efficiency and competitiveness of companies and organisations.

These methods are largely used in the industrialized countries, they are gaining wider recognition the world over.

European standards are being developed to promote unified concepts and the highest level of expertise and efficacy in the European countries.

A common way of practice of these methods, a common understanding of the standards make it necessary to define and standardize in a vocabulary standard the precise meaning of the specialized terms which are used. If the standards on Value Management methods which are just now being developed require a correction or adaptation of terms and definitions then this will be taken into account by a revision of this standard.

1 Scope

This standard defines terms on Value Analysis (VA) and Functional Analysis (FA).

2 Normative reference

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.
