**EESTI STANDARDI EESSÕNA****NATIONAL FOREWORD**

See Eesti standard EVS-EN 62591:2016 sisaldab Euroopa standardi EN 62591:2016 ingliskeelset teksti.	This Estonian standard EVS-EN 62591:2016 consists of the English text of the European standard EN 62591:2016.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 16.09.2016.	Date of Availability of the European standard is 16.09.2016.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile [standardiosakond@evs.ee](mailto:standardiosakond@evs.ee).

EUROPEAN STANDARD  
NORME EUROPÉENNE  
EUROPÄISCHE NORM

EN 62591

September 2016

ICS 25.040.40; 35.100.05

Supersedes EN 62591:2010

English Version

Industrial communication networks - Wireless communication  
network and communication profiles - WirelessHART(tm)  
(IEC 62591:2016)

Réseaux de communication industriels - Réseau de  
communications sans fil et profils de communication -  
WirelessHART(tm)  
(IEC 62591:2016)

Industrielle Kommunikationsnetze - Drahtlose  
Kommunikationsnetze und Kommunikationsprofile -  
WirelessHART(tm)  
(IEC 62591:2016)

This European Standard was approved by CENELEC on 2016-05-04. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## European foreword

The text of document 65C/835/FDIS, future edition 2 of IEC 62591, prepared by SC 65C "Industrial networks" of IEC/TC 65 "Industrial process measurement, control and automation" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 62591:2016.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2017-03-16
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2019-09-16

This document supersedes EN 62591:2010.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

## Endorsement notice

The text of the International Standard IEC 62591:2016 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 61158-6-9:2014	NOTE	Harmonized as EN 61158-6-9:2014.
IEC 62657-2:2013	NOTE	Harmonized as EN 62657-2:2013.
IEC 62657-2:2013	NOTE	Harmonized as EN 62657-2:2013.

**Annex ZA**

(normative)

**Normative references to international publications  
with their corresponding European publications**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here:  
[www.cenelec.eu](http://www.cenelec.eu).

## CONTENTS

FOREWORD.....	24
INTRODUCTION.....	26
1    Scope.....	28
2    Normative references.....	28
3    Terms, definitions, symbols, abbreviations and conventions .....	29
3.1    Reference model terms and definitions .....	29
3.1.1    Terms and definitions from ISO/IEC 7498-1 terms and ISO/IEC 7498-3 terms .....	29
3.1.2    Terms and definitions from ISO/IEC 9545 .....	30
3.1.3    Terms and definitions from ISO/IEC 8824 .....	30
3.1.4    Terms and definitions from ISO/IEC 8825-1 .....	31
3.2    Specific terms and definitions .....	31
3.3    Abbreviations .....	40
3.4    Conventions .....	42
3.4.1    Conventions used for DL-services .....	42
3.4.2    Conventions used for DL-protocol (state machine) .....	43
3.4.3    Conventions for Application Layer service .....	44
3.4.4    Conventions for the AL-protocol .....	47
4    Physical layer specification and service definition.....	51
4.1    General.....	51
4.2    Physical layer service definition.....	51
4.2.1    General overview .....	51
4.2.2    Physical layer services .....	52
4.3    Physical layer protocol specification .....	56
5    Data-link layer service definition – Type 20 elements.....	56
5.1    General.....	56
5.2    Data-link layer services .....	56
5.2.1    Facilities of the data-link layer services .....	56
5.2.2    QoS for message service .....	57
5.2.3    Sequence of primitives .....	58
5.2.4    DL-TRANSMIT service .....	60
5.2.5    DL-RECEIVE service .....	62
5.2.6    DL-DISCONNECT service .....	63
5.2.7    DL-PATH-FAILURE service .....	63
5.2.8    DL-ADVERTISE service .....	63
5.2.9    DL-NEIGHBOR service .....	64
5.2.10    DLM-SET.....	64
5.2.11    DLM-GET .....	65
5.2.12    DLM-ACTION.....	66
5.2.13    DLM-EVENT .....	67
5.3    Network layer services .....	67
5.3.1    Facilities of the network layer services.....	67
5.3.2    QoS for message service .....	67
5.3.3    Sequence of primitives .....	68
5.3.4    NL-TRANSMIT Service .....	68
5.3.5    NLM-SET.....	70

5.3.6	NLM-GET .....	71
5.3.7	NLM-ACTION.....	71
5.4	Transport layer services .....	72
5.4.1	Facilities of the transport layer services .....	72
5.4.2	QoS for message service .....	73
5.4.3	Sequence of primitives .....	73
5.4.4	TL-DATA-TRANSFER Service.....	74
5.4.5	TL-DATA-EXCHANGE Service .....	76
5.4.6	TLM-SET .....	78
5.4.7	TLM-GET.....	78
6	Data-link layer protocol specification – Type 20 elements .....	79
6.1	General.....	79
6.2	Overview.....	79
6.2.1	Data-link layer operation .....	79
6.2.2	Network layer operation .....	82
6.2.3	Device procedures .....	84
6.3	Logical link control .....	84
6.3.1	General DLPDU structure.....	84
6.3.2	DLPDU-specific structure, encoding and elements of procedure .....	88
6.3.3	DLPDU Priority and Flow Control.....	92
6.3.4	Error detection and security.....	93
6.4	Medium Access Control.....	95
6.4.1	Function .....	95
6.4.2	Slot timing .....	95
6.4.3	Communication tables and buffers.....	98
6.4.4	Link scheduling .....	104
6.4.5	MAC operation .....	108
6.5	DL-management-information .....	118
6.5.1	General .....	118
6.5.2	DL attributes .....	118
6.5.3	DLM actions.....	119
6.6	Network layer.....	119
6.6.1	Two level model of NL.....	119
6.6.2	NPDU structure.....	122
6.6.3	Security function .....	125
6.6.4	Network layer tables .....	130
6.6.5	NLE machine .....	132
6.6.6	NLE elements of procedure .....	135
6.6.7	NL-management information .....	138
6.7	Transport layer.....	139
6.7.1	General .....	139
6.7.2	TPDU structure .....	139
6.7.3	Transport pipe table .....	140
6.7.4	TLE elements of procedure .....	141
6.7.5	TLE state machines .....	144
6.7.6	TL-management information .....	147
7	Application layer service definition – Type 20 elements .....	148
7.1	Common concepts.....	148
7.2	General.....	148

7.3	Data type ASE .....	148
7.3.1	Overview .....	148
7.3.2	Formal definition of data type objects .....	150
7.3.3	FAL defined data types .....	152
7.3.4	Data type ASE service specification .....	155
7.3.5	Summary of data types.....	155
7.4	Communication model specification .....	156
7.4.1	Common parameters .....	156
7.4.2	ASEs .....	157
7.4.3	ARs .....	230
7.4.4	Summary of classes .....	233
7.4.5	Permitted services by AREP role .....	233
8	Application layer protocol specification – Type 20 elements .....	234
8.1	General.....	234
8.2	Abstract syntax .....	234
8.3	Transfer syntax .....	234
8.3.1	Common APDU fields.....	234
8.3.2	Common APDU structure .....	235
8.3.3	Device application service-specific APDU structures .....	238
8.3.4	Layer management service specific APDU structures.....	263
8.3.5	Gateway and network manager specific APDU structures.....	306
8.3.6	Network management configuration specific APDU structures .....	328
8.3.7	Data coding rules .....	346
8.4	Common procedures .....	350
8.4.1	Delayed response .....	350
8.4.2	Response time.....	354
8.5	FAL service protocol machine (FSPM) .....	355
8.5.1	General .....	355
8.5.2	FSPM state tables.....	355
8.5.3	Functions used by FSPM.....	357
8.5.4	Parameters of FSPM/ARPM primitives.....	358
8.6	Application relationship protocol machines (ARPMs) .....	359
8.6.1	AREP mapping to transport layer.....	359
8.6.2	Application relationship protocol machines (ARPMs)	360
8.6.3	AREP state machine primitive definitions.....	362
8.6.4	AREP state machine functions.....	363
8.7	TL mapping protocol machine (TMPM).....	363
8.7.1	TMPM states.....	363
8.7.2	TMPM state machines.....	363
8.7.3	Primitives exchanged between transport layer and TMPM .....	364
8.7.4	Functions used by TMPM .....	365
9	Communication Profile Family 9 (HART™) .....	365
9.1	General Overview .....	365
9.2	Profile 9/1 .....	366
9.3	Profile 9/2 .....	366
9.3.1	Conformance statement .....	366
9.3.2	Device types .....	367
9.3.3	Device worldwide applicability .....	369
9.3.4	Physical layer .....	370

9.3.5	Data-link layer .....	373
9.3.6	Application layer .....	374
Annex A (normative) Security .....	385	
A.1	General.....	385
A.2	Joining.....	386
A.2.1	The join sequence.....	386
A.2.2	The network layer join process .....	392
A.2.3	The data-link layer join process .....	393
A.3	Network key change operation.....	396
A.4	Security management.....	397
A.5	Maintenance Port .....	397
Annex B (normative) Wireless procedures .....	399	
B.1	Initializing a wireless network .....	399
B.2	Neighbor Discovery .....	399
B.3	Path failure .....	400
B.4	Device leaving the network.....	401
Annex C (normative) Network management .....	403	
C.1	Overview.....	403
C.2	Network manager functions .....	404
Annex D (normative) Gateway .....	406	
D.1	Overview.....	406
D.2	Access point .....	406
D.3	Functions.....	408
D.3.1	General requirements.....	408
D.3.2	Adding new network devices .....	409
D.3.3	Device configuration change status notifications .....	409
D.3.4	Gateway change notification function.....	409
D.3.5	Cached response messages.....	409
D.3.6	Service access point .....	410
D.3.7	Communication between gateway and network manager.....	410
Annex E (normative) Command response codes .....	411	
E.1	Overview.....	411
E.1.1	General .....	411
E.1.2	Response code classifications.....	411
E.1.3	Reserved values .....	411
E.1.4	Unimplemented command .....	412
E.1.5	Busy .....	412
E.2	Response code definitions.....	412
E.2.1	General .....	412
E.2.2	Value ‘0’ .....	412
E.2.3	Value ‘1’ – single-definition error .....	412
E.2.4	Value ‘2’ – single-definition error .....	412
E.2.5	Value ‘3’ – single-definition error .....	412
E.2.6	Value ‘4’ – single-definition error .....	412
E.2.7	Value ‘5’ – single-definition error .....	412
E.2.8	Value ‘6’ – single-definition error .....	413
E.2.9	Value ‘7’ – single-definition error .....	413
E.2.10	Value ‘8’ – multi-definition warning .....	413

E.2.11	Value ‘9’ – multi-definition error .....	413
E.2.12	Value ‘10’ – multi-definition error .....	414
E.2.13	Value ‘11’ – multi-definition error .....	414
E.2.14	Value ‘12’ – multi-definition error .....	414
E.2.15	Value ‘13’ – multi-definition error .....	414
E.2.16	Value ‘14’ – multi-definition warning .....	415
E.2.17	Value ‘15’ – multi-definition error .....	415
E.2.18	Value ‘16’ – single-definition error .....	415
E.2.19	Value ‘17’ – single-definition error .....	415
E.2.20	Value ‘18’ – single-definition error .....	415
E.2.21	Value ‘19’ – single-definition error .....	415
E.2.22	Value ‘20’ – single-definition error .....	415
E.2.23	Values ‘21’to ‘23’ – single-definition error .....	416
E.2.24	Values ‘24’to ‘27’ – single-definition warning .....	416
E.2.25	Value ‘28’ – multi-definition error .....	416
E.2.26	Value ‘29’ – multi-definition error .....	416
E.2.27	Value ‘30’ – multi-definition warning .....	416
E.2.28	Value ‘31’ – multi-definition warning .....	416
E.2.29	Value ‘32’ – single-definition error .....	416
E.2.30	Value ‘33’ – single-definition error .....	416
E.2.31	Value ‘34’ – single-definition error .....	416
E.2.32	Value ‘35’ – single-definition error .....	417
E.2.33	Value ‘36’ – single-definition error .....	417
E.2.34	Values ‘37’ to ‘59’ – single-definition error .....	417
E.2.35	Value ‘60’ – single-definition error .....	417
E.2.36	Value ‘61’ – single-definition error .....	417
E.2.37	Value ‘62’ – single-definition error .....	417
E.2.38	Value ‘63’ – single-definition error .....	417
E.2.39	Value ‘64’ – single-definition error .....	417
E.2.40	Value ‘65’ – multi-definition error .....	417
E.2.41	Value ‘66’ – multi-definition error .....	418
E.2.42	Value ‘67’ – multi-definition error .....	418
E.2.43	Value ‘68’ – multi-definition error .....	419
E.2.44	Value ‘69’ – multi-definition error .....	419
E.2.45	Value ‘70’ – multi-definition error .....	419
E.2.46	Value ‘71’ – multi-definition error .....	419
E.2.47	Values ‘72’ to ‘95’ – multi-definition error .....	419
E.2.48	Values ‘96’ to ‘111’ – single-definition warning .....	419
E.2.49	Values ‘112’ to ‘127’ – multi-definition warning .....	419
Annex F (normative) Common tables .....	420	
F.1 Overview .....	420	
F.1.1 General .....	420	
F.1.2 Enumeration .....	420	
F.1.3 Bit Field .....	420	
F.2 Table definitions .....	421	
F.2.1 Publish mode control codes .....	421	
F.2.2 Write device variable codes .....	421	
F.2.3 Device variable family codes .....	422	
F.2.4 Device variable classification codes .....	422	

F.2.5	Analog channel saturated codes .....	423
F.2.6	Analog channel fixed codes .....	424
F.2.7	Standardized status 0 codes .....	424
F.2.8	Standardized status 1 codes .....	424
F.2.9	Standardized status 2 codes .....	425
F.2.10	Standardized status 3 codes .....	425
F.2.11	Publish trigger mode codes .....	426
F.2.12	Event notification control codes .....	426
F.2.13	Event status codes .....	426
F.2.14	Timetable request codes .....	426
F.2.15	Timetable application domain codes .....	427
F.2.16	Synchronous action control codes .....	427
F.2.17	Real-time clock flags codes .....	427
F.2.18	Wireless timer codes .....	427
F.2.19	Device power source codes .....	428
F.2.20	Link_type codes .....	428
F.2.21	Link option flags codes .....	428
F.2.22	Superframe mode flags codes .....	429
F.2.23	Session_type codes .....	429
F.2.24	Timetable deletion reason codes .....	429
F.2.25	Disconnect cause codes .....	429
F.2.26	Wireless operation codes .....	430
F.2.27	Join process status codes .....	430
F.2.28	Security type codes .....	430
F.2.29	Device list codes .....	431
F.2.30	Network access mode codes .....	431
F.2.31	Device profile codes .....	432
F.2.32	Device power status codes .....	432
F.2.33	Neighbor flags codes .....	432
F.2.34	Notification mask codes .....	433
F.2.35	Join mode codes .....	433
F.2.36	Device scheduling flags codes .....	433
F.2.37	Network optimization flags codes .....	433
F.2.38	Wireless capabilities codes .....	434
F.2.39	CCA mode codes .....	434
F.2.40	Wireless device connection status .....	434
F.2.41	Wireless device health status .....	434
F.2.42	Change key flag codes .....	435
F.2.43	Join key mode code .....	435
	Annex G (informative) Application of publish data mode and event commands .....	436
G.1	Publish data mode operation .....	436
G.1.1	Overview .....	436
G.1.2	Configuring a device for publish data mode operation .....	436
G.1.3	Response for publish data mode operation .....	437
G.1.4	Publish data mode update periods .....	437
G.2	Event notification operation .....	438
G.2.1	Overview .....	438
G.2.2	Configuring a device event notification operation .....	438
G.2.3	Handling of Event Notification in a Device .....	438

Annex H (informative) Network redundancy .....	440
Annex I (informative) Network manager implementation.....	441
I.1    Overview.....	441
I.2    Network manager model.....	441
I.2.1    General .....	441
I.2.2    Initializing the network manager .....	443
I.2.3    Types of network devices .....	443
I.2.4    Network routing.....	444
I.2.5    Network schedule .....	445
I.2.6    Security manager.....	449
I.2.7    Detailed model of the network manager .....	449
I.3    Routing .....	451
I.3.1    General .....	451
I.3.2    Routing requirements .....	451
I.3.3    Routing strategy.....	451
I.4    Scheduling.....	452
I.4.1    General .....	452
I.4.2    Scheduling requirements .....	452
I.4.3    Scheduling strategy .....	453
I.4.4    Networking scheduling example .....	454
I.5    Network manager interface .....	459
I.5.1    General .....	459
I.5.2    Initializing a wireless network .....	460
I.5.3    Allocating communication resources .....	461
I.5.4    Adjusting network schedule .....	462
I.5.5    Health reports .....	463
Annex J (informative) Gateway implementation.....	464
J.1    Overview.....	464
J.2    Gateway model .....	464
J.2.1    General .....	464
J.2.2    Host interface .....	465
J.2.3    Logical network device .....	465
J.2.4    Physical network device .....	466
J.2.5    Communication interface.....	466
J.2.6    Cached response messages.....	467
J.3    Gateway management.....	468
J.3.1    Addressing.....	468
J.3.2    Retry mechanisms .....	468
J.3.3    Power-on-reset .....	468
J.3.4    Network access point reset .....	469
J.3.5    Gateway reset.....	469
J.3.6    Re-build publish data periodic data.....	469
J.3.7    Gateway self test .....	470
J.3.8    Adding new network device .....	470
J.3.9    Device configuration change status notifications .....	470
J.4    Gateway superframe .....	470
J.5    Gateway change notification services .....	470
J.6    HART™ commands interface .....	472
J.6.1    General .....	472

J.6.2	Host to gateway command request and response .....	472
J.6.3	Pass-through of HART™ command request and response .....	473
J.6.4	Caching publish data command response messages.....	473
J.6.5	Gateway status error flag bits .....	473
J.6.6	Gateway additional status flags .....	473
J.6.7	Gateway capacities .....	474
J.6.8	Gateway commands .....	474
Annex K (informative)	Handheld device .....	475
K.1	Overview.....	475
K.2	Maintenance port connection .....	475
K.3	Network device connection .....	475
K.3.1	General .....	475
K.3.2	Install session keys .....	476
K.3.3	View network diagnostics and health reports.....	476
K.4	Network connection as a maintenance device .....	476
Annex L (informative)	Application of WirelessHART Commands .....	477
L.1	Provisioning .....	477
L.1.1	General .....	477
L.1.2	Basic Provisioning.....	477
L.1.3	Joining.....	477
L.1.4	Enabling Faster Network Detection and Joining .....	478
L.1.5	Adjusting Transmit Power.....	478
L.2	Managing Superframes and Links.....	478
L.3	WirelessHART Handheld Support .....	479
L.4	Specifying and Managing Routes.....	480
L.5	Security .....	481
L.5.1	General .....	481
L.5.2	TDMA Data-Link Key Management .....	481
L.5.3	Session Key Management .....	481
L.5.4	Access Control.....	482
L.5.5	Simple Key Management.....	483
L.6	Device Lists .....	483
L.7	Network Management Commands.....	484
L.7.1	General .....	484
L.7.2	Bandwidth Management .....	484
L.7.3	Network Maintenance.....	485
L.7.4	Coexistence .....	486
L.7.5	Device Management.....	486
L.8	Network Health Reporting and Status .....	487
L.9	Gateway Commands .....	488
L.9.1	General .....	488
L.9.2	Device Identification.....	488
L.9.3	Network Information and Statistics.....	488
L.9.4	Network Management .....	489
L.9.5	Cache Management .....	489
Annex M (informative)	Regional modification for compliance with ETSI standards .....	491
M.1	General.....	491
M.2	Compliance with EN 300 440-2 .....	491
M.3	Compliance with EN 300 328 .....	491

M.3.1	General .....	491
M.3.2	Adaptive .....	492
M.3.3	Non-Adaptive .....	492

## INTRODUCTION

This International standard provides the specification, definitions, and profile for a Wireless communication network. It supplements IEC 61158-5-20, IEC 61158-6-20 where some services and commands are specified and it supplements IEC 61784-1 where a Communication Profile CP 9/1, universal command, is specified.

This document follows the structure and conventions of IEC 61158 series (for example separation of DL-service definitions and DL-protocol specification) and conventions of IEC 61784-1. IEC 61158 series specify different communication networks. These are structured in different Types. The Type 20 is assigned to technologies of Hart™<sup>1</sup> Communication Foundation (HCF). For other assignments of Type numbers see IEC 61158-1.

IEC 61784-1, and IEC 61784-2 provide Communication Profile Families (CPF), and, within a family, one to n Communication Profiles. The assigned CPF number for technologies of the HCF is CPF 9. For other assignments of CPF numbers see IEC 61158-1.

A new project number IEC 62591 was assigned to the Type 20 enhancements and the associated CP 9/2, so that this document contains the Type 20 specific equivalent to the IEC 61158 series and of CPF 9 specific profile using the same conventions as used in IEC 61784-1. The equivalent of 4 Type specific subparts and the profile are organized in this document in different clauses.

The Type 20 protocol supports two way digital communications for process measurement and control devices. Applications include remote process variable interrogation, cyclical access to process data, parameter setting and diagnostics. This document defines the specification that comprises the Type 20 field communications protocol for wireless devices. Specification of the Type 20 protocol is based largely on the OSI 7-layer Communication Model.

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this document may involve the use of patents concerning the claims of the patents listed below given in the normative clauses.

US 8676219 [HCF]	Combined Wired and Wireless Communications with Field Devices in a Process Control Environment
US 8798084 [HCF]	Increasing Reliability and Reducing Latency in a Wireless Network
US 8325627 [HCF]	Adaptive Scheduling in a Wireless Network
US 8660108 [HCF]	Synchronizing Timeslots in a Wireless Communication Protocol
US 8169974 [HCF]	Suspending Transmissions in a Wireless Communication Network
US 8670746 [HCF]	Enhancing Security in a Wireless Network
US 8670749 [HCF]	Enhancing Security in a Wireless Network
US 8451809 [HCF]	Wireless Gateway in a Process Control Environment Supporting a Wireless Communication Protocol
US 8570922 [HCF]	Efficient Addressing in Wireless HART Protocol
US 8942219 [HCF]	Support for Network Management and Device Communications in a Wireless Network

---

1 HART™ and WirelessHART™ are the trade names of FieldComm Group. The FieldComm Group is a non-profit trade organization to support the HART™ Communication. This information is given for the convenience of users of this International Standard and does not constitute an endorsement by IEC of the trade name holder or any of its products. Compliance to this document does not require use of the trade name. Use of the trade name HART™ and WirelessHART™ requires permission of the trade name holder, see <http://www.fieldcommgroup.org>.

US 8406248 [HCF]	Priority Based Scheduling and Routing in a Wireless Network
US 8892769 [HCF]	Routing Packets on a Network Using Directed Graphs
US 8230108 [HCF]	Routing Packets on a Network Using Directed Graphs
US 8356431 [HCF]	Scheduling Communication Frames in a Wireless Network

IEC takes no position concerning the evidence, validity and scope of these patent rights.

The holder of these patent rights has assured IEC that she/he is willing to negotiate licenses either free of charge or under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holder of these patent rights is registered with IEC. Information may be obtained from:

[HCF]      FieldComm Group  
                9430 Research Boulevard  
                Suite 1-120  
                Austin TX 78759, USA

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. IEC shall not be held responsible for identifying any or all such patent rights.

ISO ([www.iso.org/patents](http://www.iso.org/patents)) and IEC (<http://patents.iec.ch>) maintain on-line data bases of patents relevant to their standards. Users are encouraged to consult the data bases for the most up to date information concerning patents.
