Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 6347 was prepared by Technical Committee ISO/TC 219, *Floor coverings*.

This second edition cancels and replaces the first edition (ISO 6347:1989), which has been technically revised.

Textile floor coverings — Consumer information

1 Scope

This International Standard specifies the technical subjects that form the basis for the provision of information, at the point of sale, for the guidance of the consumer prior to and after the purchase of a textile floor covering. It is applicable to textile floor coverings of all types.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 1765, *Machine-made textile floor coverings — Determination of thickness*

ISO 1833, *Textiles — Binary fibre mixtures — Quantitative chemical analysis*

ISO 2076, *Textiles — Man-made fibres — Generic names*

ISO 3018, *Textile floor coverings — Rectangular textile floor coverings — Determination of dimensions*

ISO 5088, *Textiles — Ternary fibre mixtures — Quantitative analysis*

ISO 6938, *Textiles — Natural fibres — Generic names and definitions*

ISO 8543, *Textile floor coverings — Methods for determination of mass*

3 Information to be provided

3.1 Essential information

3.1.1 General

Essential information shall be provided, along with the textile floor covering, at all stages from manufacturer to consumer. The manufacturer or the responsible supplier shall provide the following minimum information to each consumer with each textile floor covering. The manufacturer's tolerances shall be included.

3.1.2 Means of identifying the responsible supplier

This information shall be the supplier's name, brand name and trade mark.

3.1.3 A commercial reference

Information which positively and uniquely identifies the individual textile floor covering within the supplier's range, i.e. style name and/or style number.
