English version

**Textiles - Solar UV protective properties - Part 2: Classification
and marking of apparel**

Textiles - Propriétés de protection contre le rayonnement
UV solaire - Partie 2: Classification et marquage de
l'habillement

Textilien - Schutzeigenschaften gegen ultraviolette
Sonnenstrahlung - Teil 2: Klassifizierung und
Kennzeichnung von Bekleidung

This European Standard was approved by CEN on 7 May 2003.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 13758-2:2003) has been prepared by Technical Committee CEN/TC 248 "Textiles and textile products", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2004, and conflicting national standards shall be withdrawn at the latest by January 2004.

It is part 2 of a series of two standards on UV protective properties of clothing.

Annex A is informative.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

Recent international research has shown that prolonged exposure of the skin to the sun can produce both short and long-term harmful effects. The major cause, ultraviolet radiation, can be significantly reduced by clothing. However, the level of protection offered by clothes varies considerably and is dependent on many factors. Most significant are the fabric properties and the design of the garments.

1 Scope

This European Standard specifies the requirements for marking of clothing which are designed to offer the wearer protection against solar ultraviolet radiation exposure.

2 Normative references

This European standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

EN 13758-1 Textiles – Solar UV protective properties – Part 1: Method of test for apparel fabrics

3 Terms and definitions

For the purposes of this European standard, the following terms and definitions apply:

3.1

solar ultraviolet radiation (UVR)

electromagnetic radiation with wavelength between 290 and 400 nm

3.2

solar UV-A

solar ultraviolet radiation with wavelength between 315 and 400 nm

3.3

solar UV-B

solar ultraviolet radiation with wavelength between 280 and 315 nm

3.4

ultraviolet protection factor (UPF)

ultraviolet protection factor (UPF) as determined by EN 13758-1

3.5

average UV-A transmission

average UV-A transmission as defined by EN 13758-1

3.6

upper body

the torso, from the base of the neck down to the hip, and cross the shoulders down to $\frac{3}{4}$ of the upper arm

3.7

lower body

part of the body from the waist down to below the patella
