.h cla Hose fittings with clamp units - Part 7: Cam locking couplings

#### **EESTI STANDARDI EESSÕNA**

#### **NATIONAL FOREWORD**

See Eesti standard EVS-EN 14420-7:2013 sisaldab	
Euroopa standardi EN 14420-7:2013 ingliskeelset	consists of the English text of the European standard
teksti.	EN 14420-7:2013.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
	Date of Availability of the European standard is 10.07.2013.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile <u>standardiosakond@evs.ee</u>.

## EUROPEAN STANDARD

#### EN 14420-7

# NORME EUROPÉENNE EUROPÄISCHE NORM

July 2013

ICS 23.040.70

Supersedes EN 14420-7:2004+A1:2007

#### **English Version**

## Hose fittings with clamp units - Part 7: Cam locking couplings

Raccords pour flexibles avec demi-coquille - Partie 7: Raccords à cames Schlaucharmaturen mit Klemmfassungen - Teil 7: Hebelarmkupplungen

This European Standard was approved by CEN on 15 May 2013.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

#### **Foreword**

This document (EN 14420-7:2013) has been prepared by Technical Committee CEN/TC 218 "Rubber and plastics hoses and hose assemblies", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2014, and conflicting national standards shall be withdrawn at the latest by January 2014.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 14420-7:2004+A1:2007.

In comparison to EN 14420-7:2004+A1:2007, the following changes have been made:

- In Clause 1, the maximum allowable working pressure when using aluminium-cast-materials has been limited to 10 bar.
- In Clause 1, the warning paragraph has been deleted.
- In Clause 2, the normative references have been updated.
- A new Clause 3 "Terms and definitions" has been added.
- The term "sealing ring" has been replaced by "gasket" (main gasket/thread gasket).
- In Table 3, the values for  $d_2$  and  $d_7$  have been corrected.
- In 8.3, requirements regarding the cam arm have been amended, e.g. the prevention against self-acting opening.
- In 9.2, the list of materials for coupler and adapter bodies has been revised.
- The requirements on main gasket materials in 9.6 and thread gasket materials in 9.7 have been revised.
- In Clause 10, the requirements for marking have been amended.
- The Bibliography has been reviewed.
- The standard has been revised editorially.

EN 14420, Hose fittings with clamp units consists of the following parts:

- Part 1: Requirements, types of fixing and connection, designation and testing
- Part 2: Hose side parts of hose tail
- Part 3: Clamp units, bolted or pinned
- Part 4: Flange connections

- Part 5: Threaded connections
- Part 6: TW tank truck couplings
- Part 7: Cam locking couplings
- Part 8: Symmetrical half coupling (Guillemin system)

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following Latvia, Li. Spain, Swede countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

### Introduction

ings a.
American.
vers, bolts, rii Cam locking couplings are manufactured worldwide according to the American "military specification" MIL-C-27487. This American standard fixes the coupling side in a limited way, but not the connection side. Other parts like levers, bolts, ring and gaskets are not standardized.

#### 1 Scope

This European Standard specifies the design, materials, dimensions and marking requirements for cam locking couplings that serve as the link between hoses and connections to transport liquids, solids and gases, except liquid gas and steam. The couplings are capable of operating the pressure range -0.8 bar<sup>1)</sup> to 16 bar working pressure (for aluminium-cast-materials -0.8 bar to 10 bar) in a working temperature range of -20 °C up to +65 °C.

#### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 755-2, Aluminium and aluminium alloys — Extruded rod/bar, tube and profiles — Part 2: Mechanical properties

EN 1706, Aluminium and aluminium alloys — Castings — Chemical composition and mechanical properties

EN 1982, Copper and copper alloys — Ingots and castings
