### Käsitlusala:

This Part 10 of the HD details the particular requirements for ethylene-propylene rubber insulated, and thermoplastic polyurethane sheathed cable for a maximum conductor temperature of 90 °C and lowest handling temperature of –40 °C. Each cable shall comply with the appropriate requirements given in Part 1 of this HD and the particular requirements of this Part.

### Scope:

This Part 10 of the HD details the particular requirements for ethylene-propylene rubber insulated, and thermoplastic polyurethane sheathed cable for a maximum conductor temperature of 90 °C and lowest handling temperature of –40 °C. Each cable shall comply with the appropriate requirements given in Part 1 of this HD and the particular requirements of this Part.

This Harmonization Document was approved by CENELEC on 2006-12-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for implementation of this Harmonization Document at national level.

Up-to-date lists and bibliographical references concerning such national implementations may be obtained on application to the Central Secretariat or to any CENELEC member.

This Harmonization Document exists in three official versions (English, French, German).

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## Foreword

This Harmonization Document was prepared by the Technical Committee CENELEC TC 20, Electric cables.

The text of the draft was submitted to the Unique Acceptance Procedure and was approved by CENELEC as HD 22.10 S2 on 2006-12-01.

This Harmonization Document supersedes HD 22.10 S1:1994 + A1:1999.

The following dates were fixed:

- |                                                                                                                                          |       |            |
|------------------------------------------------------------------------------------------------------------------------------------------|-------|------------|
| – latest date by which the existence of the HD has to be announced at national level                                                     | (doa) | 2007-06-01 |
| – latest date by which the HD has to be implemented at national level by publication of a harmonized national standard or by endorsement | (dop) | 2007-12-01 |
| – latest date by which the national standards conflicting with the HD have to be withdrawn                                               | (dow) | 2008-12-01 |

HD 22, *Cables of rated voltages up to and including 450/750 V and having cross-linked insulation*, now has the following parts:

|                          |                                                                                                 |

## 1 Scope

This Part 10 of the HD details the particular requirements for ethylene-propylene rubber insulated, and thermoplastic polyurethane sheathed cable for a maximum conductor temperature of 90 °C and lowest handling temperature of -40 °C.

Each cable shall comply with the appropriate requirements given in Part 1 of this HD and the particular requirements of this part.

NOTE The overall dimensions of the cables in this part of HD 22 have been calculated in accordance with EN 60719.

## 2 Normative references

## 3 EPR insulated and polyurethane sheathed flexible cable (300/500 V)

### 3.1 Code designation

H05BQ-F.

### 3.2 Rated voltage

300/500 V.

### 3.3 Construction

#### 3.3.1 Conductor

Number of conductors: 2, 3, 4 or 5.

The conductors shall be in accordance with the requirements given in EN 60228 for Class 5 conductors. The wires may be plain or tinned.

#### 3.3.2 Separator

A separator of suitable material may be applied around each conductor.

#### 3.3.3 Insulation

The insulation shall be rubber compound of type EI 6 to EN 50363-1 applied around each conductor.

The insulation shall be applied by extrusion.
