

Postal services - Quality of service - Measurement of the transit time of end-to-end services for single piece nonpriority and second class mail (KONSOLIDEERITUD TEKST)

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 14508:2006+A1:2010 sisaldab Euroopa standardi EN 14508:2003+A1:2007 ingliskeelset teksti.

Standard on kinnitatud Eesti Standardikeskuse 30.09.2010 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.

Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kättesaadavaks tegemise kuupäev on 28.03.2007.

Standard on kättesaadav Eesti standardiorganisatsioonist.

This Estonian standard EVS-EN 14508:2006+A1:2010 consists of the English text of the European standard EN 14508:2003+A1:2007.

This standard is ratified with the order of Estonian Centre for Standardisation dated 30.09.2010 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.

Date of Availability of the European standard text 28.03.2007.

The standard is available from Estonian standardisation organisation.

**Postal services - Quality of service - Measurement of the transit
time of end-to-end services for single piece non-priority mail and
second class mail**

Services postaux - Qualité de service - Mesure de la qualité
de service de bout en bout pour le courrier égrené non
prioritaire et de seconde classe

Postalische Dienstleistungen - Dienstqualität -
Laufzeitmessung end-to-end für Einzelsendungen ohne
Vorrang und Sendungen zweiter Klasse

This European Standard was approved by CEN on 3 March 2003 and includes Amendment 1 approved by CEN on 4 February 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 14508:2003+A1:2007) has been prepared by Technical Committee CEN/TC 331 "Postal services", the secretariat of which is held by NEN.

This document shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by September 2007 and conflicting national standards shall be withdrawn at the latest by September 2007.

This document includes Amendment 1, approved by CEN on 2007-02-04.

This document supersedes EN 14508:2003.

The start and finish of text introduced or altered by amendment is indicated in the text by tags **A1** and **A1**.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Introduction

In the Green paper on postal services in 1992 the European Commission emphasised the need to establish common rules for the development of community postal services and the improvement of quality of service. The Commission identified requirements for quality of service measurement that include:

- independent end-to-end measurement capabilities;
- a focus on cross-border delivery service performance;
- a single, uniform and reliable system for monitoring delivery service performance within the European Union.

The European Commission acknowledged that the different postal traditions and cultures in Europe would not allow for the establishment of one common unified European measurement system and that national systems should have sufficient degrees of freedom to reflect national needs and peculiarities. On the other hand, they should fulfil a defined set of minimum requirements to satisfy the information interests of the national regulatory authority, postal customers and postal operators themselves.

The objective of the measurement is to estimate the transit time quality of service given to the customer in each European country domestically and cross-border between the European countries.

This European Standard refers to a number of principles and minimum requirements to be applied for the measurement of the transit time of the national and cross-border mail.

This European Standard for single piece non-priority mail has been developed from EN 13850:2002 *Postal Services - Quality of Service - Measurement of the transit time of end-to-end services for single piece priority mail and first class mail*. Both standards consider methods using a representative end-to-end sample of addressed letter mail. The additional specifications in this European Standard are required to define the minimum confidence levels for the measurement of non-priority mail.

A1) When EN 14508 was developed it was decided to base it on existing measuring systems already in use among the European Union member states. Since the publication of EN 14508 in 2003 more countries have joined the European Union which have increased the number of cross-border mail flows significantly and therefore made it necessary to adapt the standard accordingly.

Amendment 1 to this European Standard has been developed to make it possible to economically measure a larger number of mail flows from a wider range of countries than the original versions of the standard was made for.

Amendment 1 to this European Standard gives information on how to categorize mail flows for measuring purposes and explain how required accuracy for small and medium sized mail flows can be obtained by measuring under a consecutive number of years. **A1)**

1 Scope

In addition to EN 13850:2002 *Postal Services - Quality of Service - Measurement of the transit time of end-to-end services for single piece priority mail and first class mail*, this European Standard specifies methods for measuring the end-to-end transit time of domestic and cross-border non-priority single piece mail, collected, processed and distributed by postal service operators. It considers methods using a representative end-to-end sample of all types of single piece addressed letter mail.

This European Standard has been developed from and is compatible with the requirements of EN 13850:2002. As such, surveys for both priority and non-priority single piece mail may be undertaken concurrently whilst reporting separate estimates of priority and non-priority transit times.

The overall transit time quality-of-service result is to be expressed as percentage of mail delivered within $J + n$ days end-to-end according to the EU "Postal directive"¹.

This European Standard relates to the measurement of so-called "normal" services given to private persons / households and businesses that post mail at street letter boxes, over the counter at post offices, have pick ups at their offices or give their mail directly at postal service operators' sorting centres.

For technical reasons this European Standard may not in all parts be suitable for the measuring of very small volumes of mail and for operators with limited coverage.

This European Standard is not applicable for measuring the end-to-end transit time distribution of large bulk mailers' services and hybrid mail, which require different measurement systems and methodologies.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text, and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

EN 13850:2002 *Postal Services - Quality of service - Measurement of the transit time of end-to-end services for single piece priority mail and first class mail*

EN ISO 19011 *Guidelines for quality and/or environmental management systems auditing*

NOTE: As the measurement method in this standard is based on the principles described in EN 13850:2002 it is necessary to follow in parallel the rules of that standard. For convenience, the references made in EN 13850:2002 are contained in the bibliography of this European Standard.

3 Terms and definitions

For the purposes of this European Standard the terms and definitions given in EN 13850:2002 will apply together with the following additional definition:

3.1

non-priority item

letter post item sent without priority, typically by surface, and receiving slower processing compared to items classified as priority

NOTE: Examples would be second class item, B class item.

4 Methodology

4.1 General

The system for measuring the distribution of the end-to-end transit time of non-priority single piece mail items shall be robust and shall give statistical measures at a defined level of accuracy.

The methodology shall comply with the requirements of EN 13850:2002. In particular the following requirements of EN 13850:2002 shall apply, but shall refer to non-priority instead of priority;

¹ Directive 97/67/EC of the European Parliament and of the Council of 15 December 1997 on common rules for the development of the internal market of Community postal services and the improvement of quality of service (OJ L 15, 21.1.98, p. 14).
