

**Otsetoimega gaasküttega B22D ja B23D tüüpi  
olmetrummelkuivatid, mille nimisoojuskoormus ei ületa  
6 kW. Osa 2: Energia ratsionaalne kasutamine**

**Domestic direct gas-fired tumble dryers of types B22D  
and B23D, of nominal heat input not exceeding 6 kW -  
Part 2: Rational use of energy**

## EESTI STANDARDI EESSÕNA

## NATIONAL FOREWORD

See Eesti standard EVS-EN 1458-2:2011 sisaldab Euroopa standardi EN 1458-2:2011 ingliskeelset teksti.	This Estonian standard EVS-EN 1458-2:2011 consists of the English text of the European standard EN 1458-2:2011.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 09.11.2011.	Date of Availability of the European standard is 09.11.2011.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile [standardiosakond@evs.ee](mailto:standardiosakond@evs.ee).

English Version

**Domestic direct gas-fired tumble dryers of types B22D and  
B23D, of nominal heat input not exceeding 6 kW - Part 2:  
Rational use of energy**

Sèche-linge domestiques à tambour rotatif à chauffage  
direct utilisant les combustibles gazeux, de type B22D et  
B23D, de débit calorifique nominal ne dépassant pas 6 kW  
- Partie 2: Utilisation rationnelle de l'énergie

Direkt gasbeheizte Haushalts-Trommeltrockner der Typen  
B22D und B23D mit Nennwärmebelastungen nicht über 6  
kW - Teil 2: Rationelle Energieverwendung

This European Standard was approved by CEN on 25 September 2011.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## Foreword

This document (EN 1458-2:2011) has been prepared by Technical Committee CEN/TC 299 “Gas-fired sorption appliances, indirect fired sorption appliances, gas-fired endothermic engine heat pumps and domestic gas-fired washing and drying appliances”, the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2012, and conflicting national standards shall be withdrawn at the latest by May 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1458-2:1999.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

The main purpose of this edition is to align the method of test more closely with that given in the equivalent electrical appliance standard, EN 61121.

The Directive makes no specification in respect of the maximum rating of appliances falling within its scope. However, the scope of this standard has been limited to appliances having heat inputs not greater than 6 kW.

The test gases, test pressures and appliance categories given in this European Standard are in accordance with those specified in EN 437:2003+A1:2009.

The first part of the standard specifies the requirements and test methods for the construction, safety, marking and testing of the appliances. The second part of the standard specifies the requirements for rational use of energy and a method of measuring the gas and electrical energy consumptions which enables comparison of gas and electrical Tumble dryers.

This standard covers type testing only.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## 1 Scope

This European Standard specifies the requirements and test methods for rational use of energy, including measurement of both gas and electrical energy consumption, of domestic direct gas-fired tumble dryers, of types B<sub>22D</sub> and B<sub>23D</sub>, of nominal heat input not exceeding 6 kW, hereafter referred to as "appliances".

This European Standard does not apply to:

- a) catalytic combustion appliances;
- b) appliances designed exclusively for industrial purposes;
- c) appliances intended to be used in locations where special conditions prevail, such as the presence of a corrosive or explosive atmosphere;
- d) appliances of the condensing type wherein the heated air and products of combustion used for the drying process are dehumidified by cooling with water or air;
- e) appliances intended to be used in vehicles or on board ships or aircraft.

This European Standard covers type testing only.

## 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 1458-1:2011, *Domestic direct gas-fired tumble dryers, of types B22D and B23D, of nominal heat input not exceeding 6 kW — Part 1: Safety*

EN 61121, *Tumble dryers for household use — Methods for measuring the performance (IEC 61121, modified)*

## 3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 1458-1:2011 apply.

## 4 Energy consumption

### 4.1 Requirements

The gas and electrical energy consumptions of the appliance shall be determined in kW/h in accordance with the method of test given in 4.2.

The gas energy consumption of the appliance shall be recorded separately from the electrical energy consumption.

The appliance shall have a gas energy consumption (based on gross calorific value) not exceeding 1,11 kWh/kg of standard load.
