This European Standard was approved by CEN on 1 October 2003 and includes Amendment 1 approved by CEN on 24 October 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 1466:2004+A1:2007) has been prepared by Technical Committee CEN/TC 252 "Child use and care articles", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2008, and conflicting national standards shall be withdrawn at the latest by May 2008.

This document supersedes ~~EN 1466:2004~~.

This document includes Amendment 1, approved by CEN on 2007-10-24.

The start and finish of text introduced or altered by amendment is indicated in the text by tags ~~A1~~ A1.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

1 Scope (see C.3)

This European Standard specifies safety requirements and test methods for products which are intended for the purpose of carrying a child in a lying position by means of handle(s) and for stands which may be used in conjunction with these products.

These products are intended for a child who cannot sit unaided, roll over or push up on its hands and knees, with a maximum weight of 9 kg. Hereafter, in this European Standard these articles are called "carry cots" and include all types of carry cots with rigid or soft sides as well as moses baskets and any similar articles. Any other functions of the product shall comply with relevant European standards.

The safety requirements specified in this European Standard are intended to assure that the carrying and sleeping functions do not present hazards to the child when the product is used in a normal way taking into account the foreseeable behaviour of the child.

This European Standard is not applicable to car seats and reclining cradles.

This European Standard has not considered the requirements of children with special needs.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

 EN 71-1:2005+A4:2007 , *Safety of toys – Part 1 : Mechanical and physical properties*

 EN 71-2:2006+A1:2007 , *Safety of toys – Part 2 : Flammability*

EN 71-3, *Safety of toys – Part 3 : Migration of certain elements*

ISO 48, *Rubber, vulcanized or thermoplastic – Determination of hardness (hardness between 10 IRHD and 100 IRHD)*

3 Terms and definitions

For the purposes of this European Standard, the following terms and definitions apply.

3.1

"carry cot" (generic term)

product consisting of a base, sides, ends and carrying handle(s), within which a child can be laid down and transported by hand(s)

3.2

stand

static structure designed to accommodate and support a carry cot

4 Materials

4.1 General

Wood, wood based material and material of vegetable origin shall be free from decay and insect attack when assessed by visual inspection.
